

Participant 1: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | converged; parameter near bound

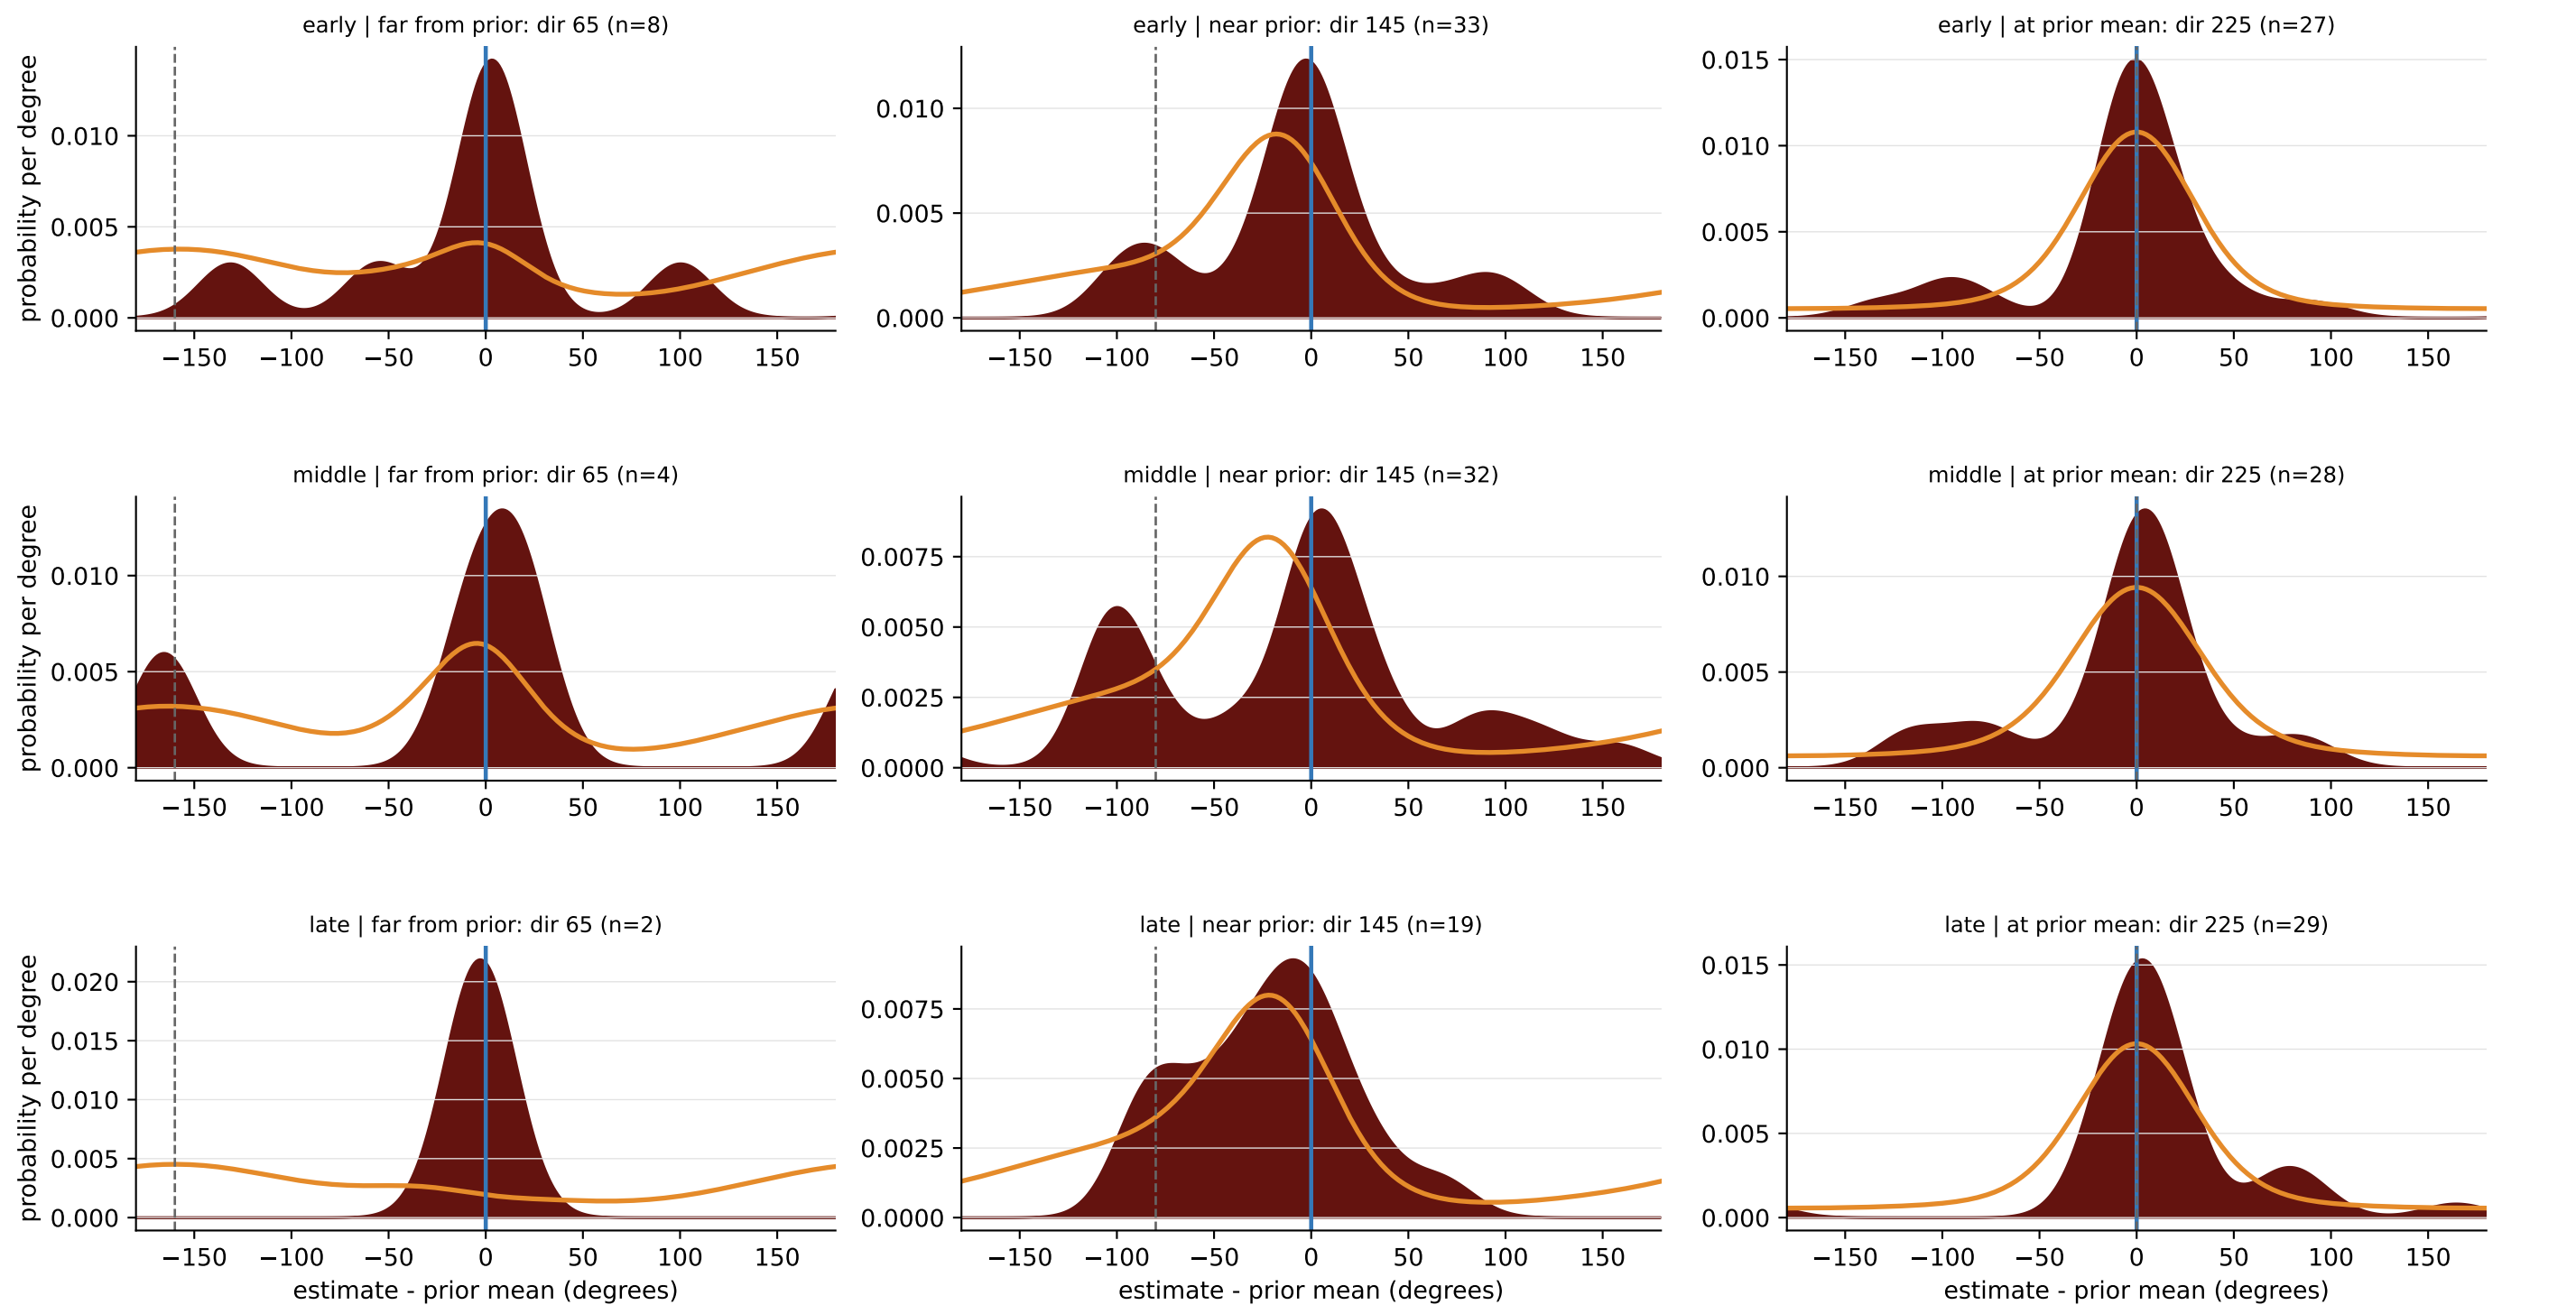

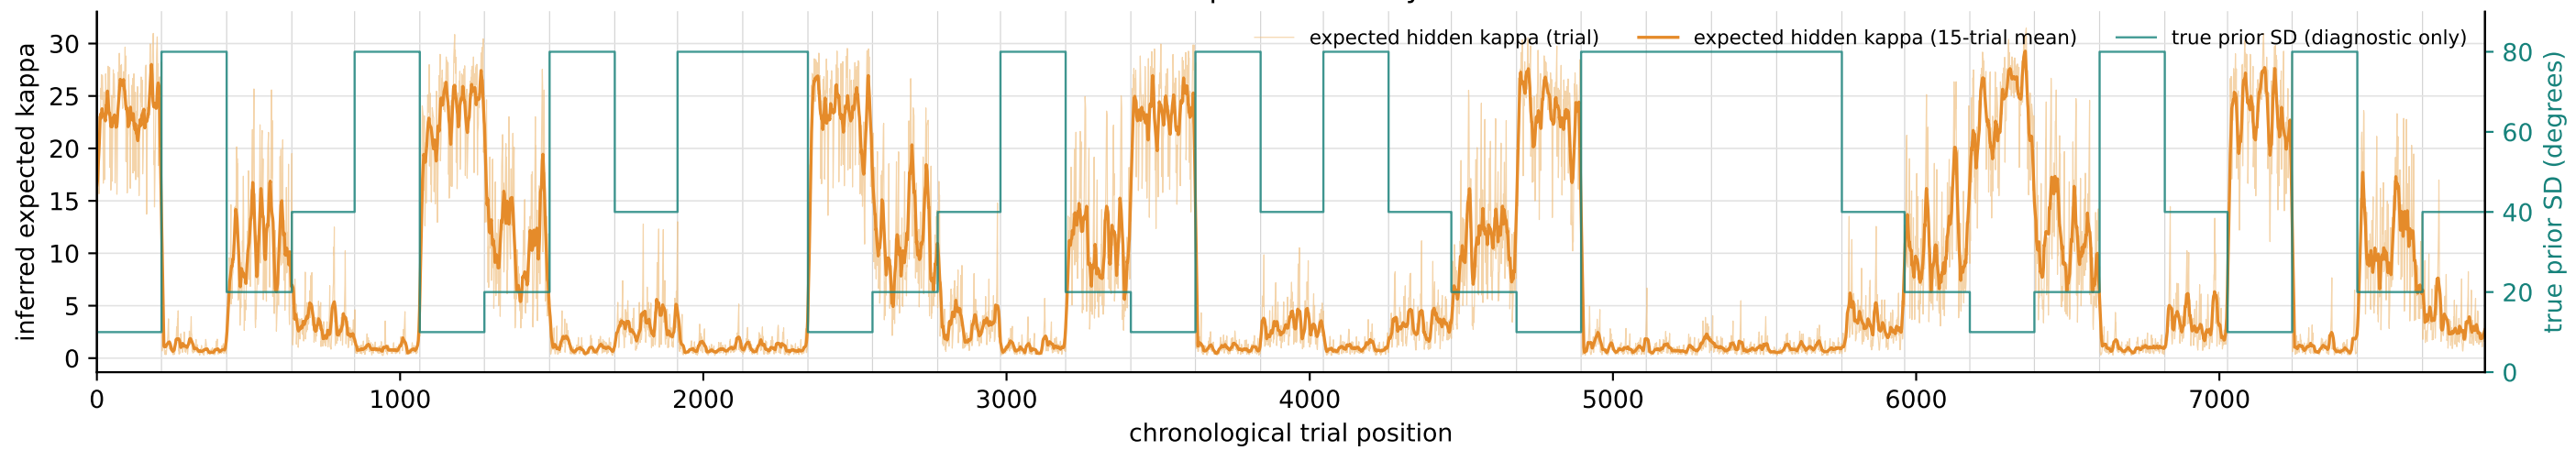

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus

Participant 2: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | converged

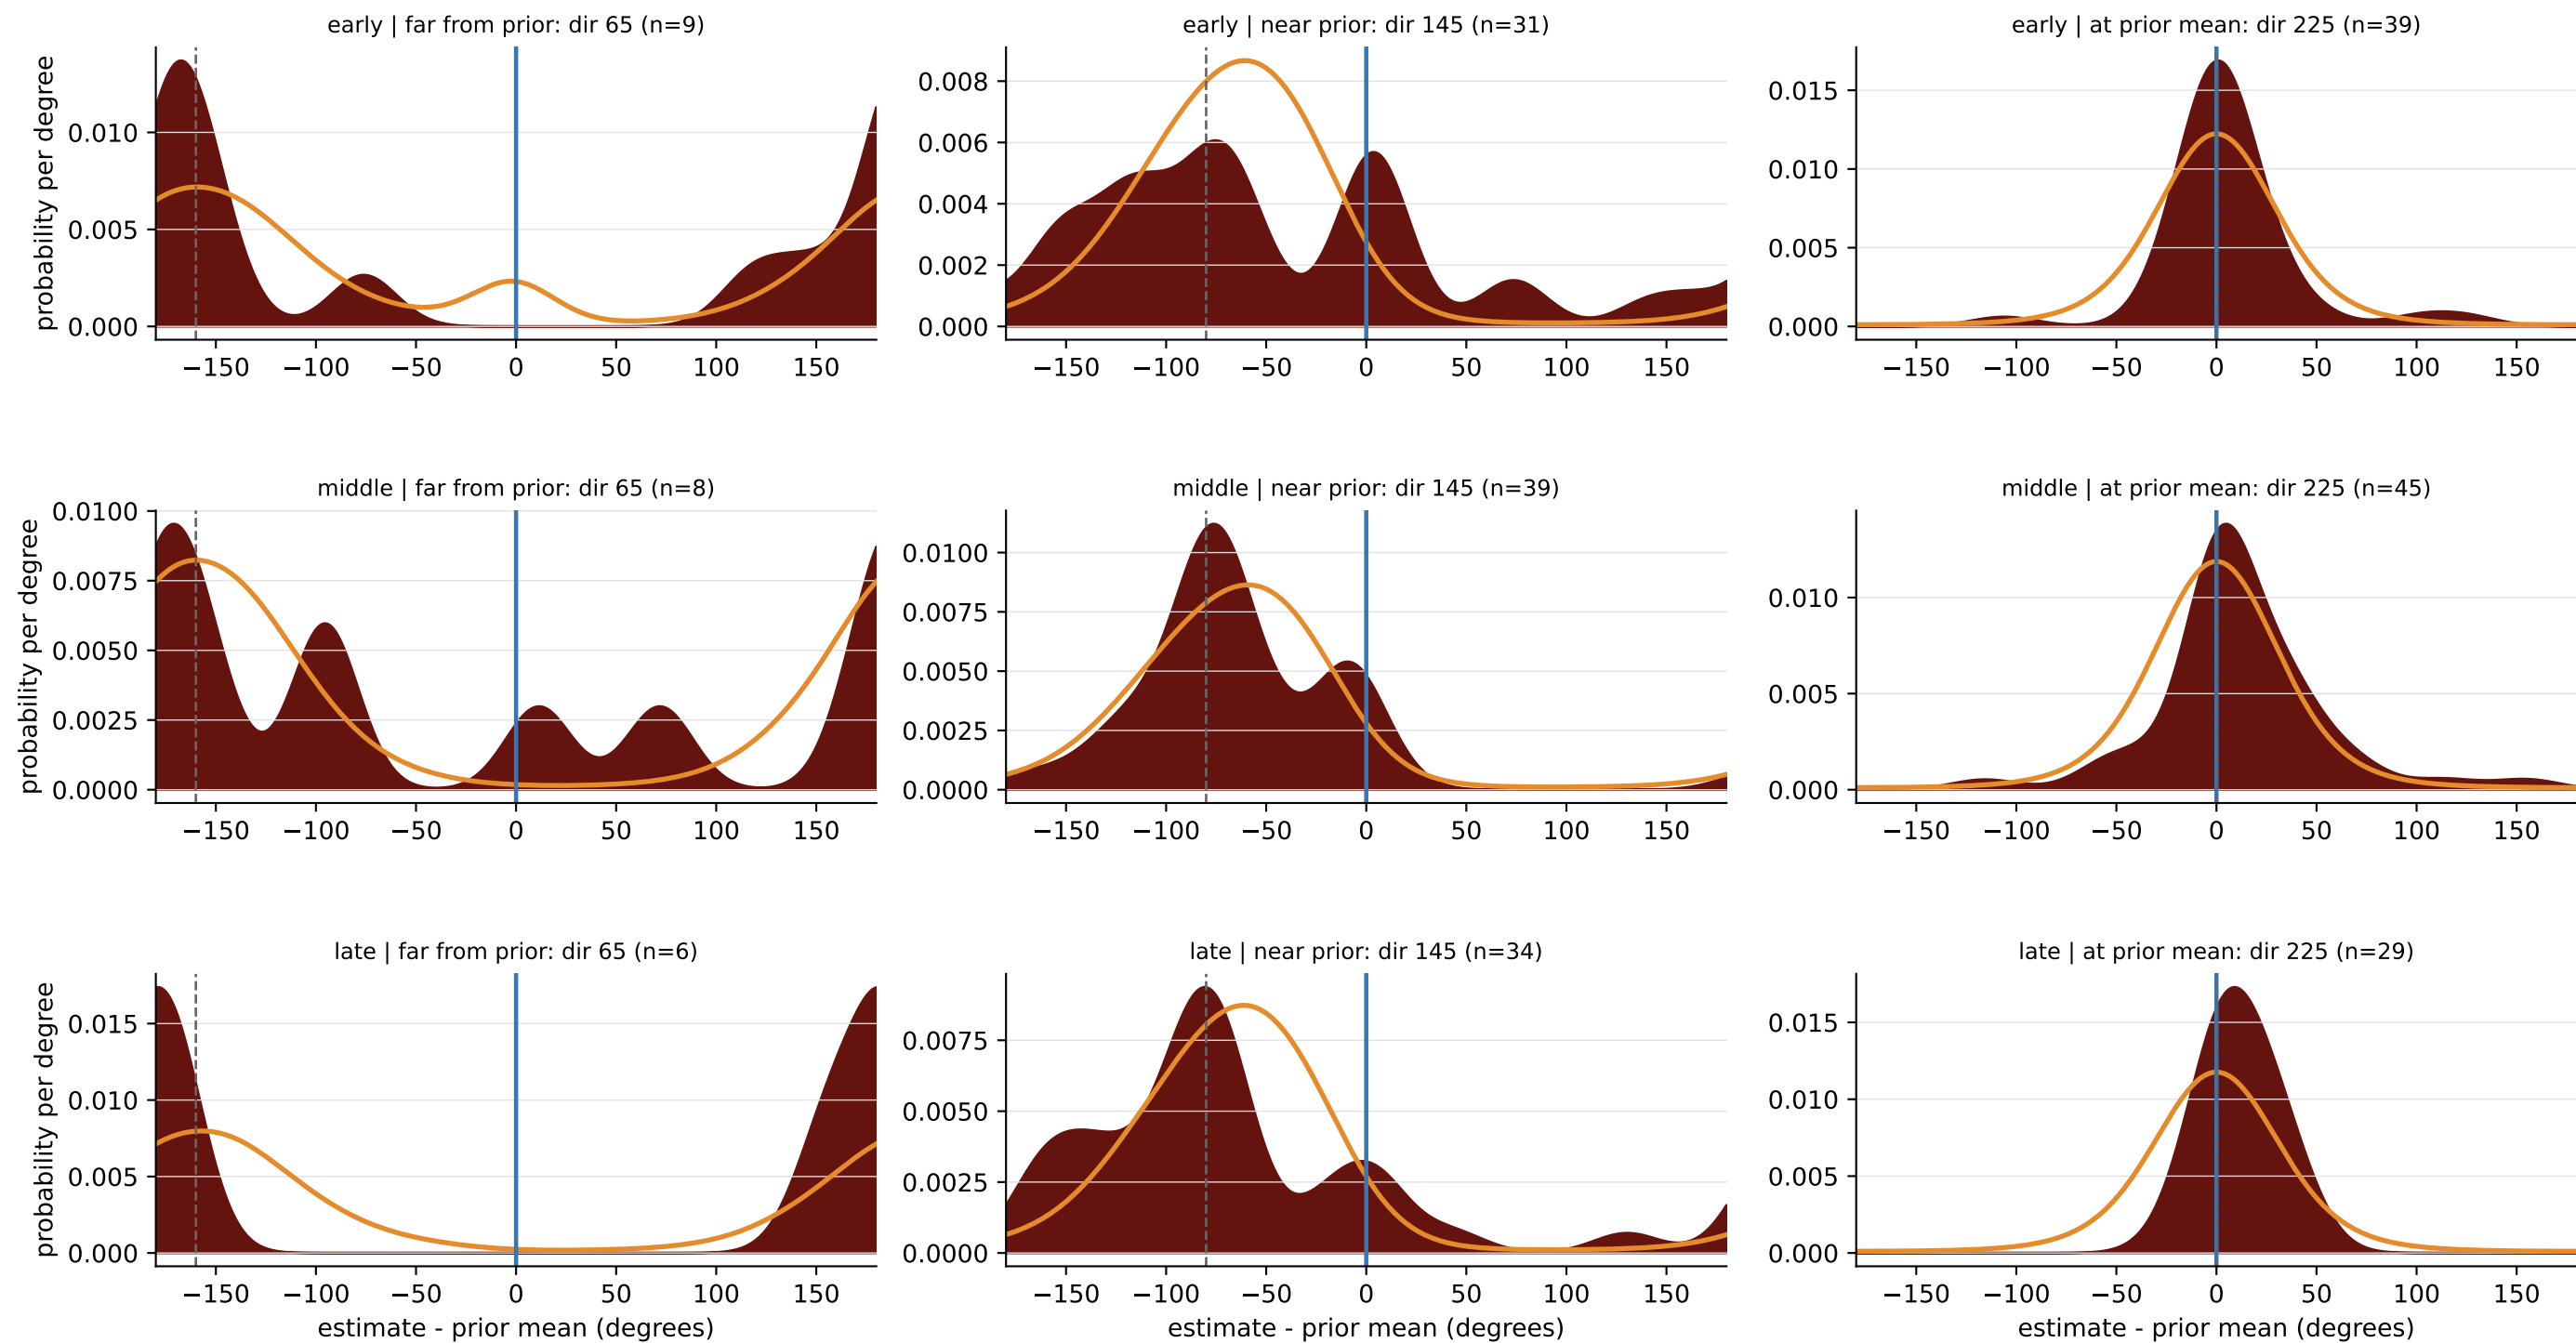

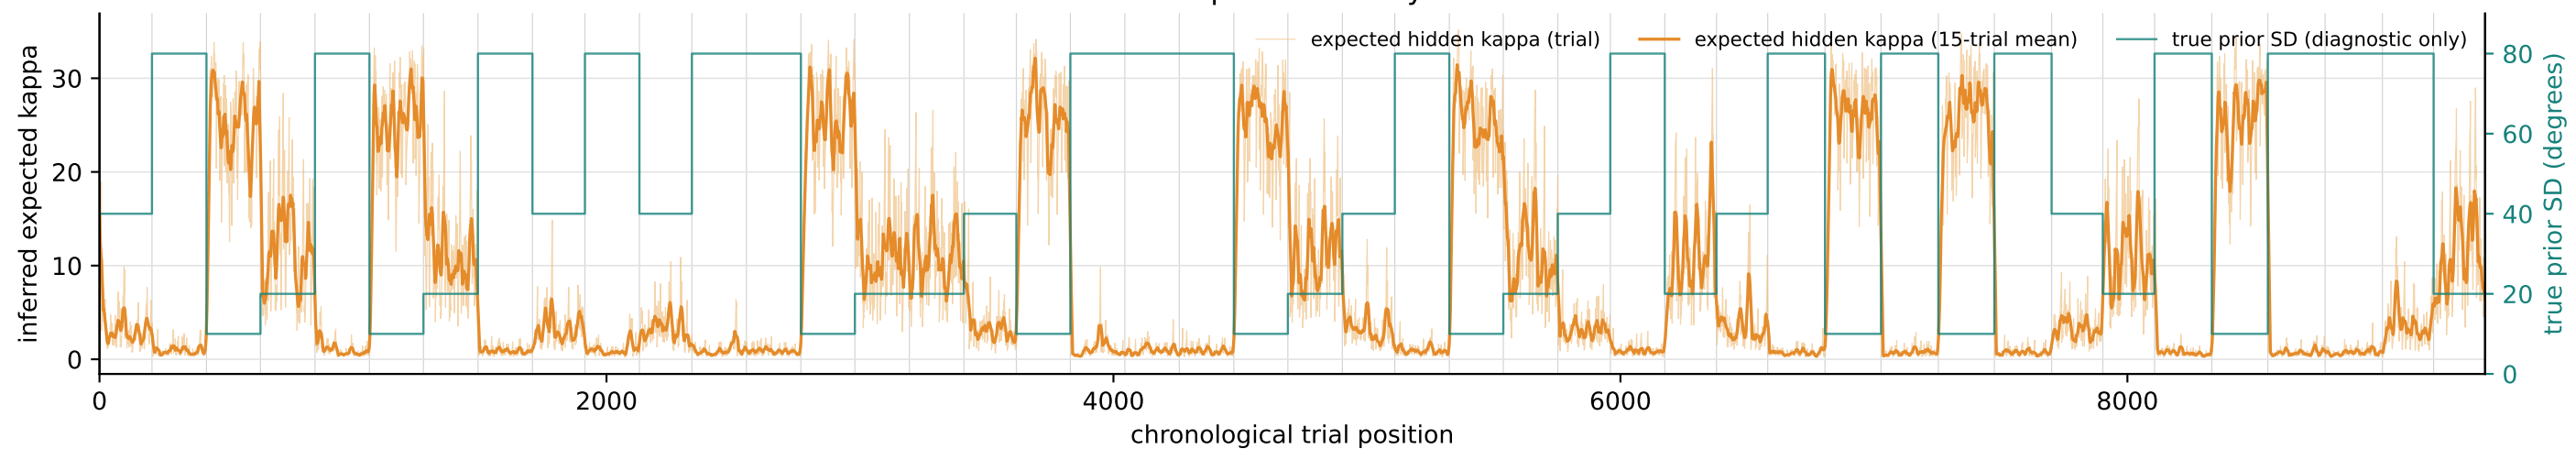

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus

Participant 3: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | converged; parameter near bound

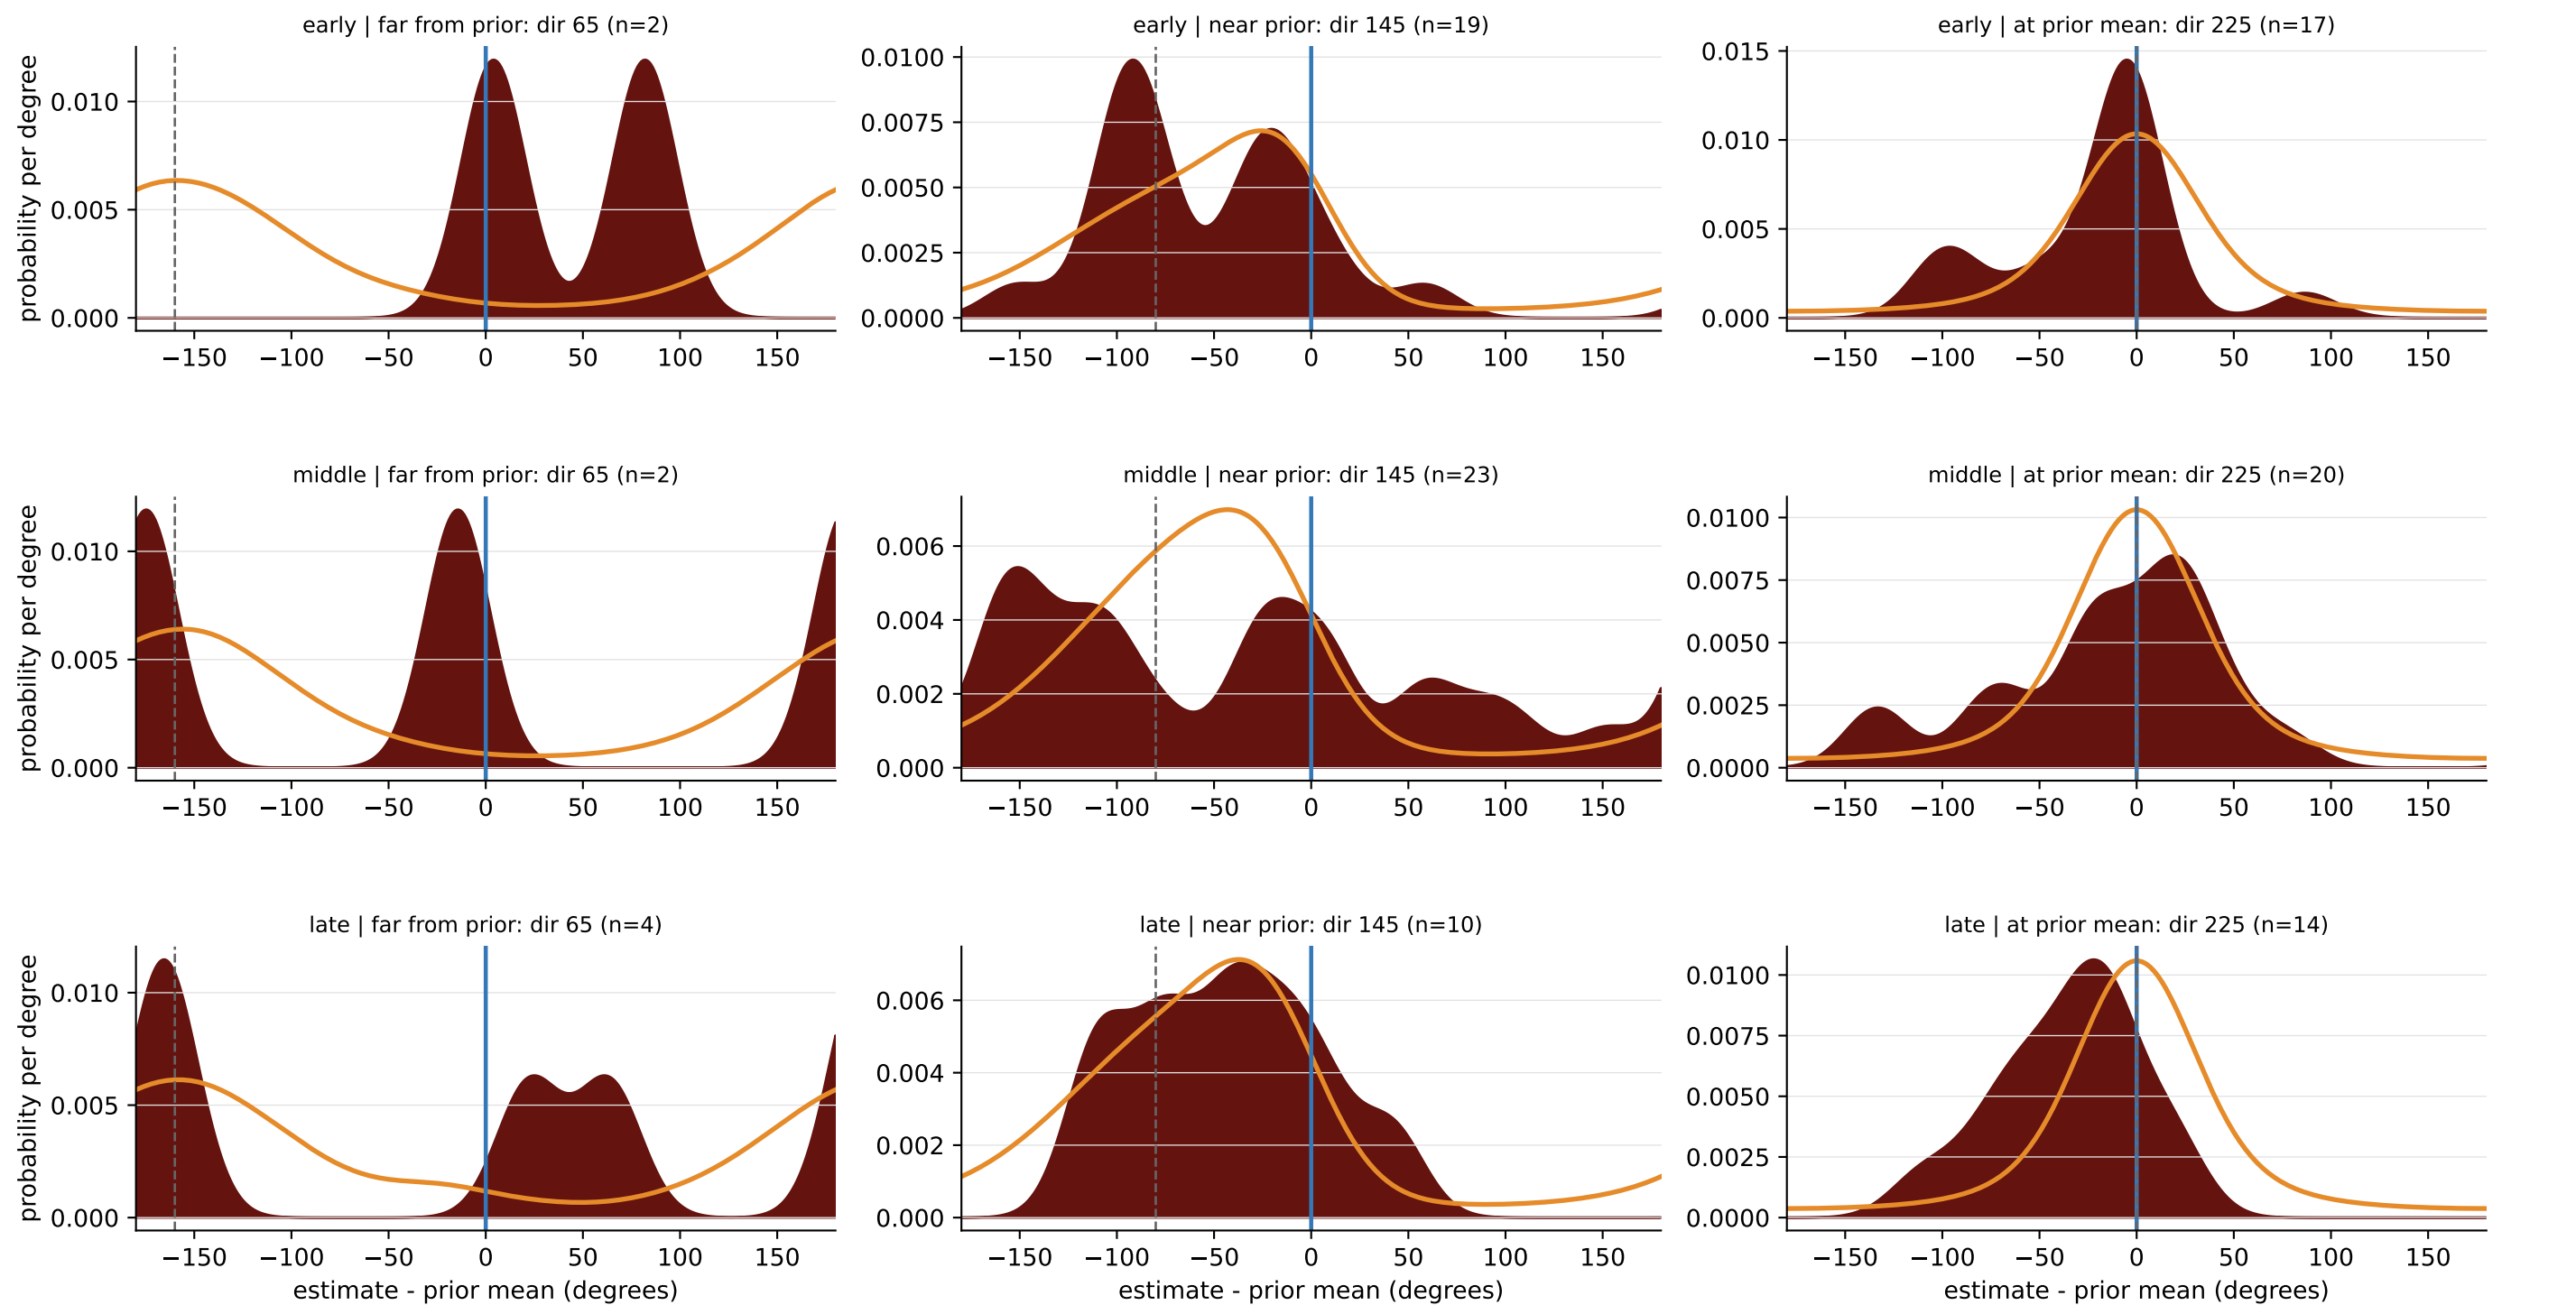

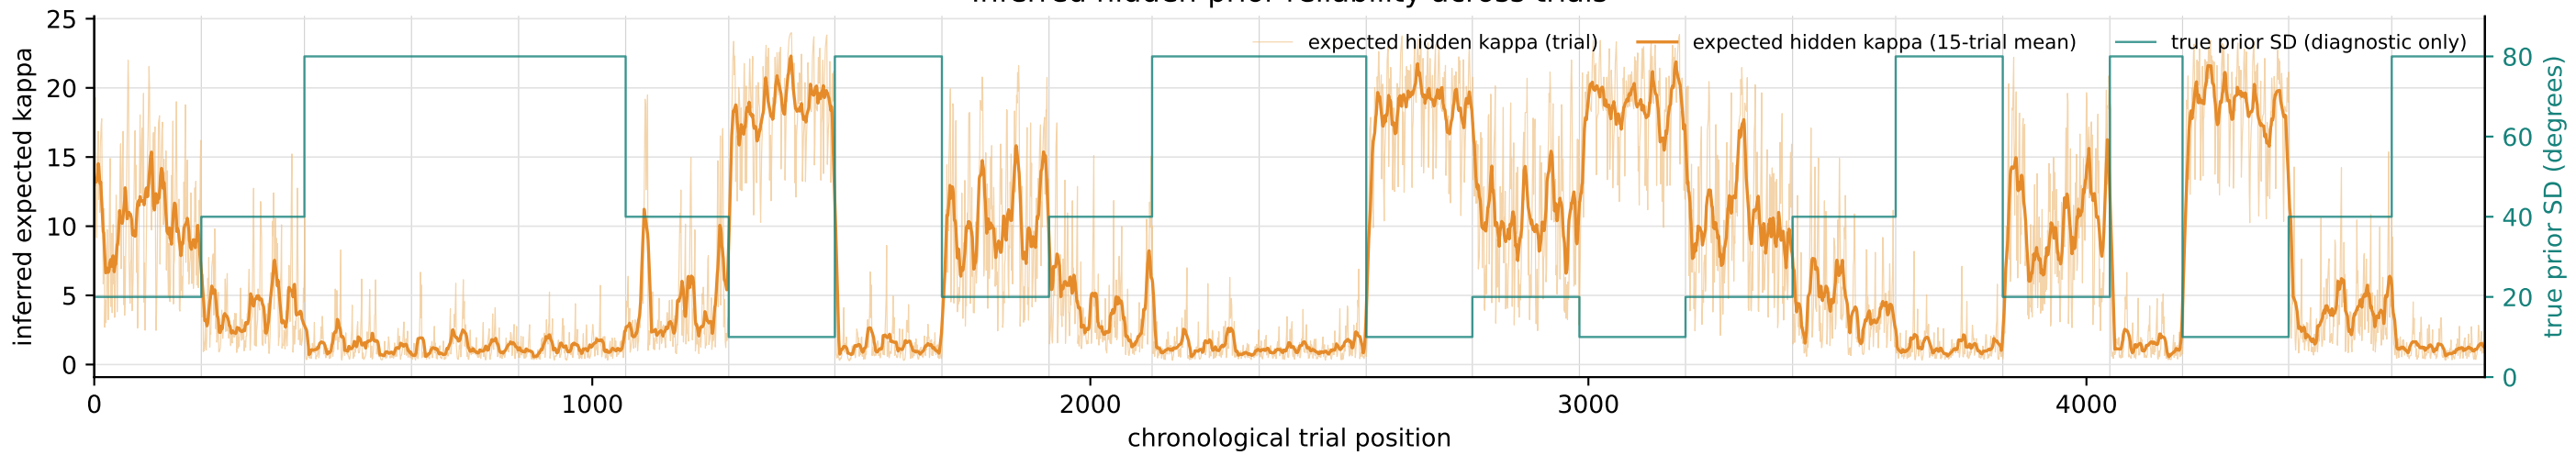

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus

Participant 4: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | converged

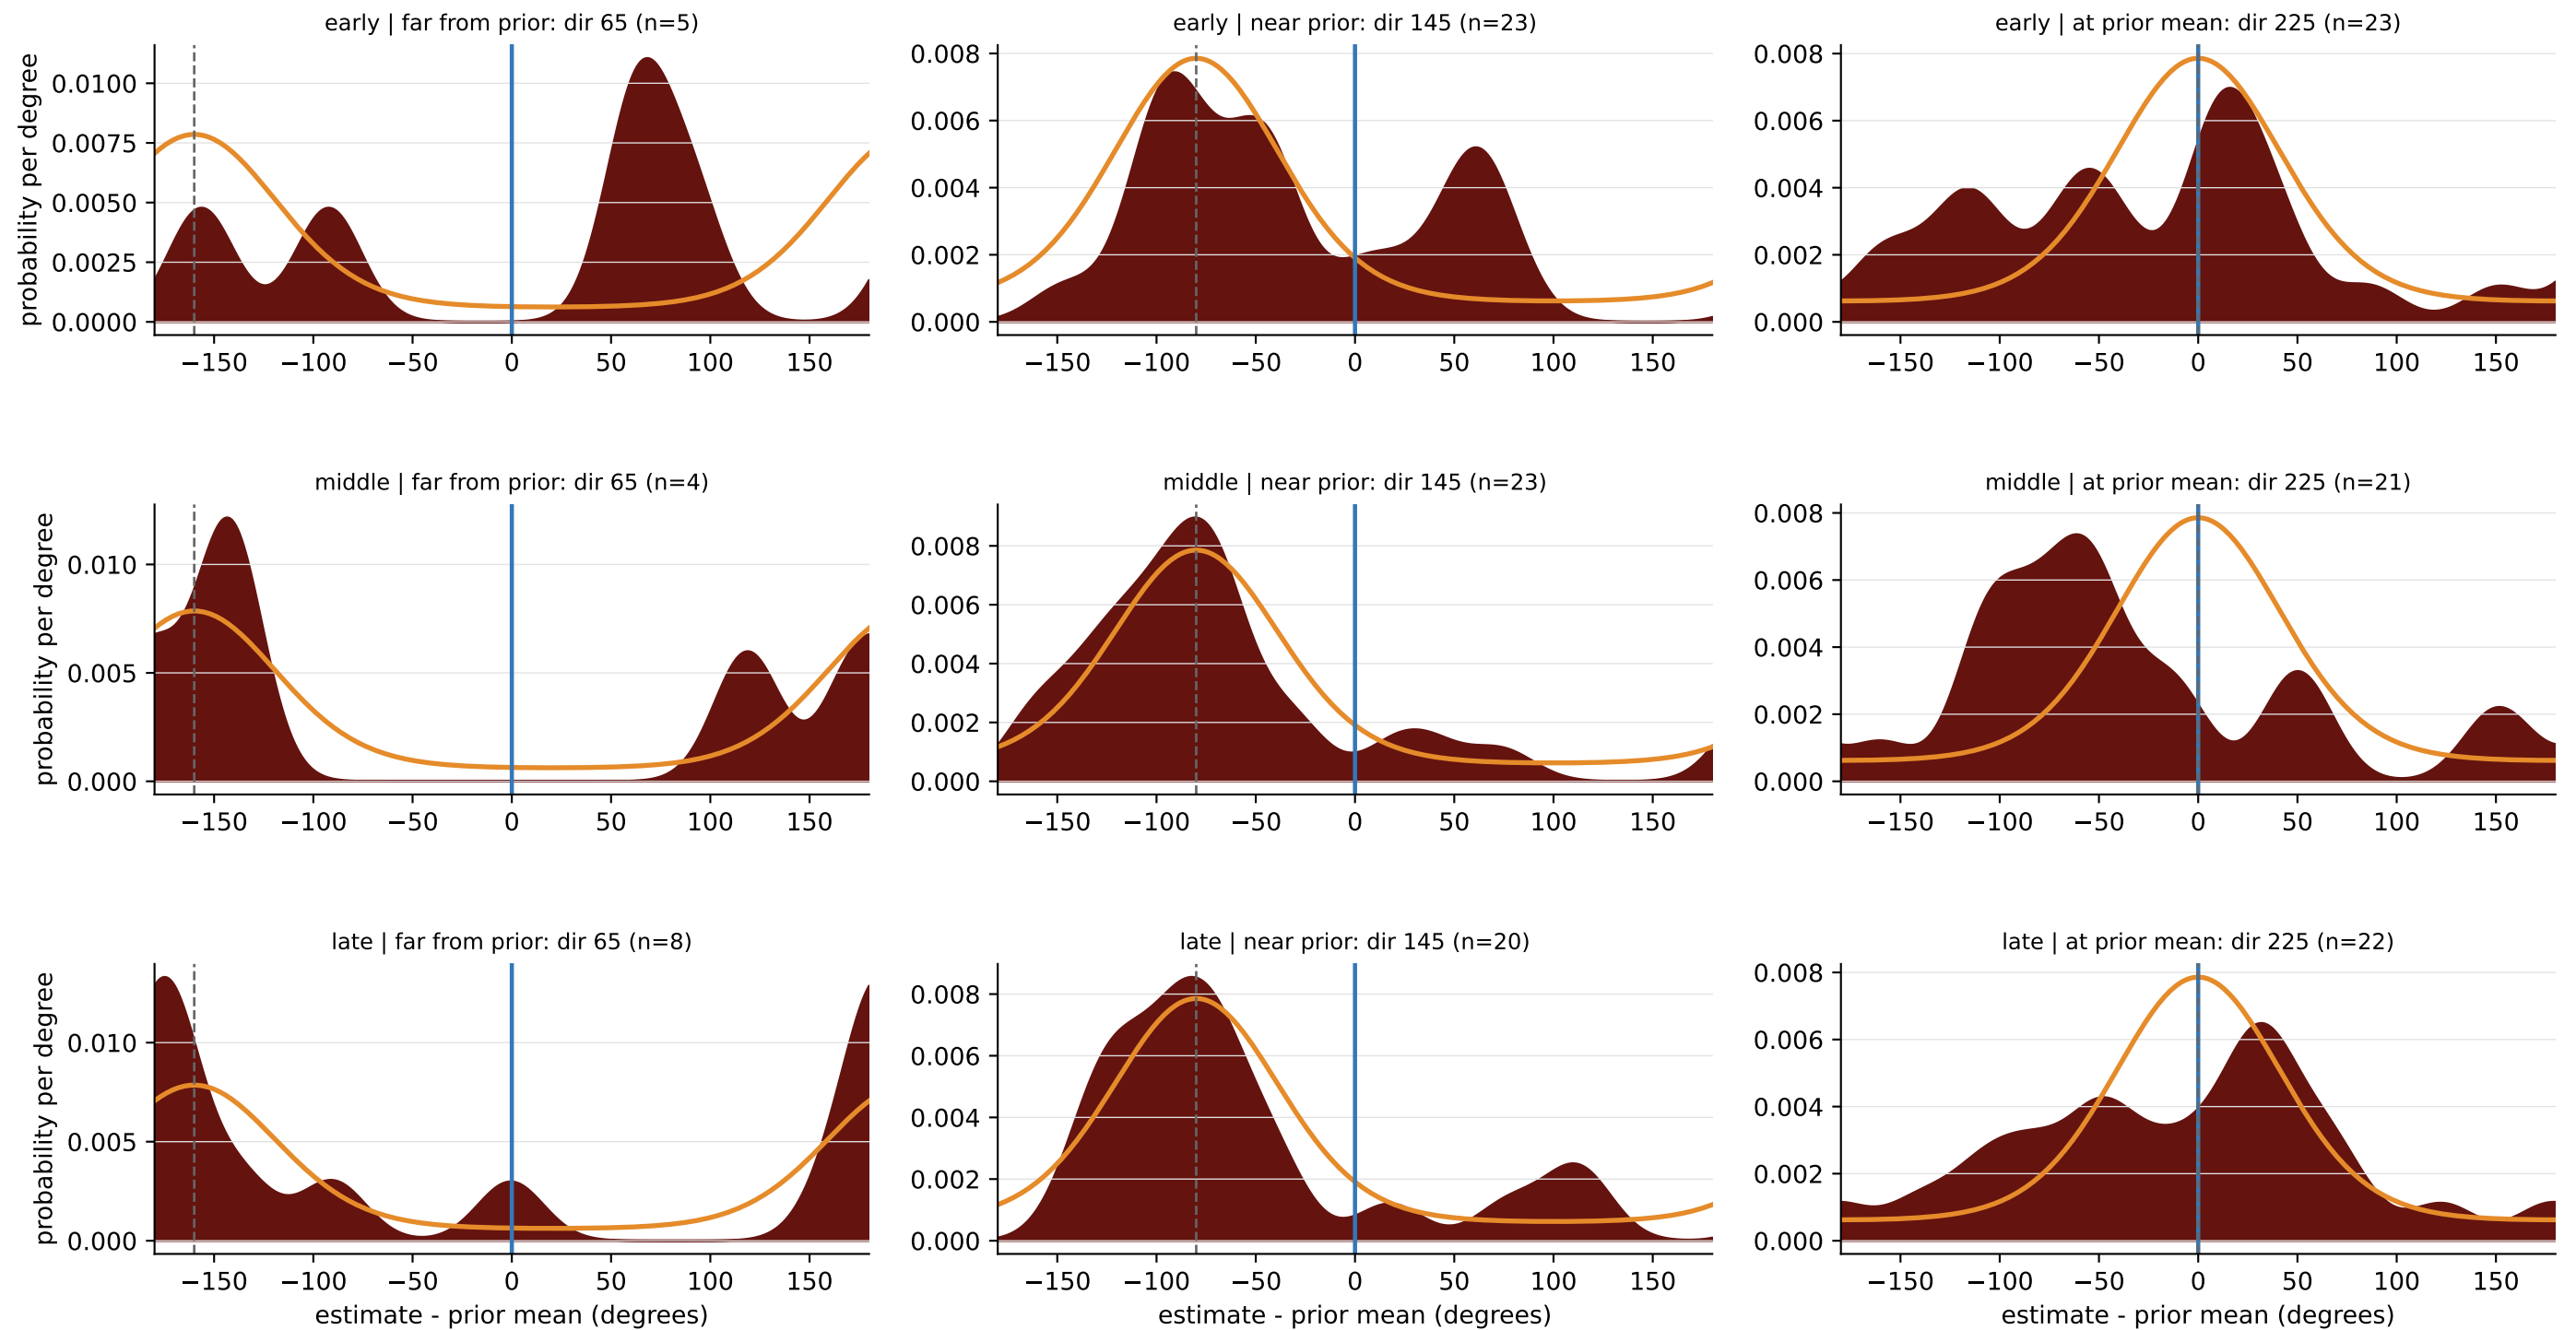

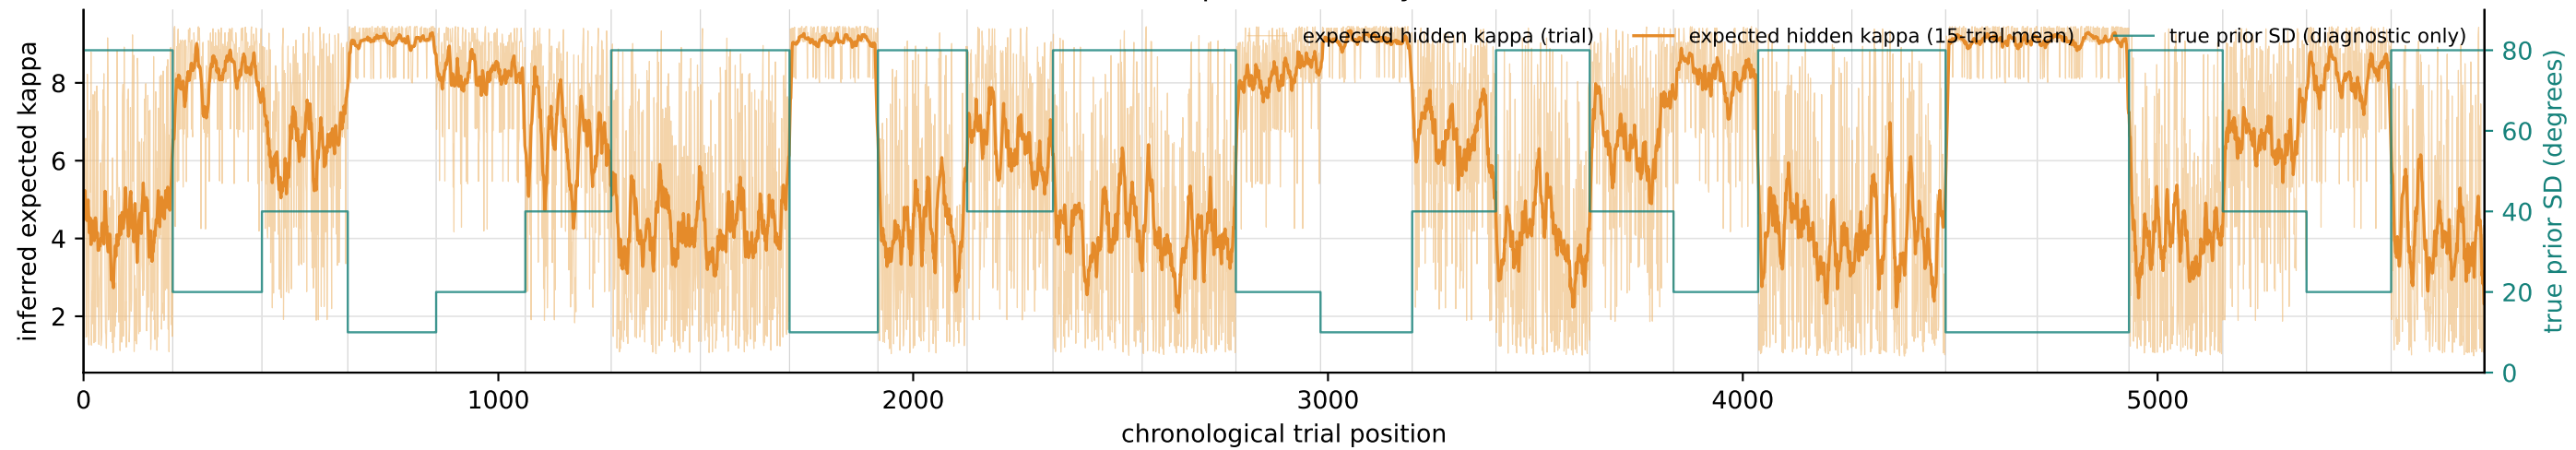

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus

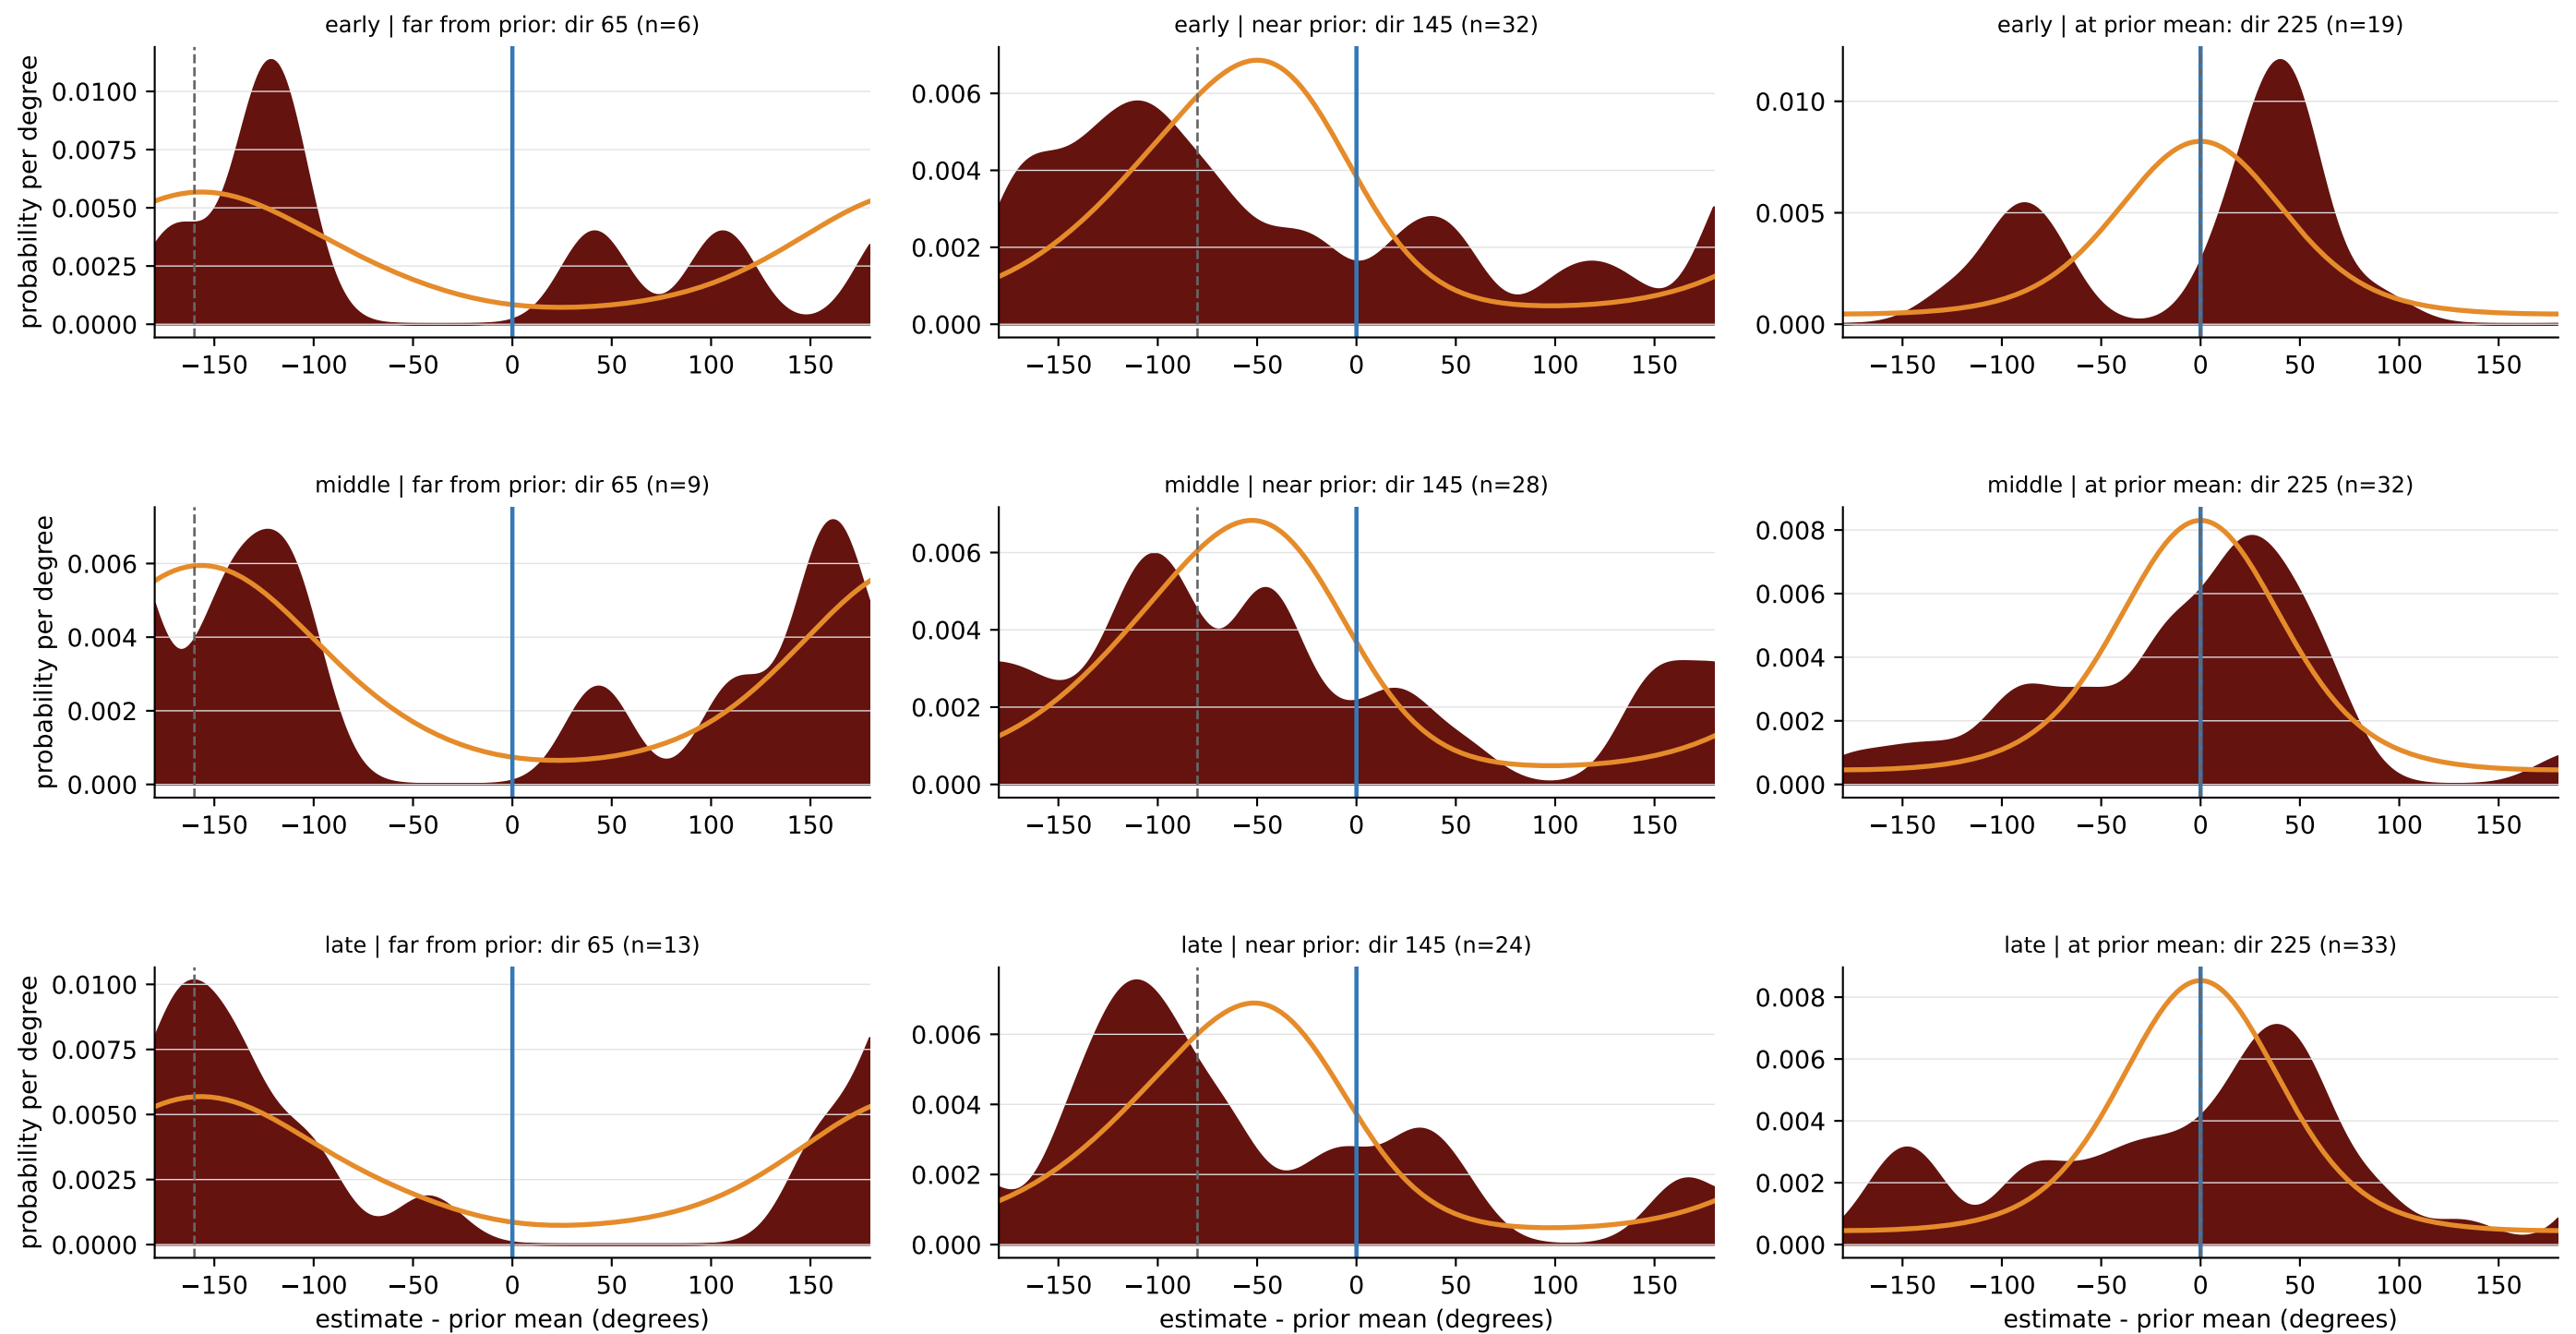

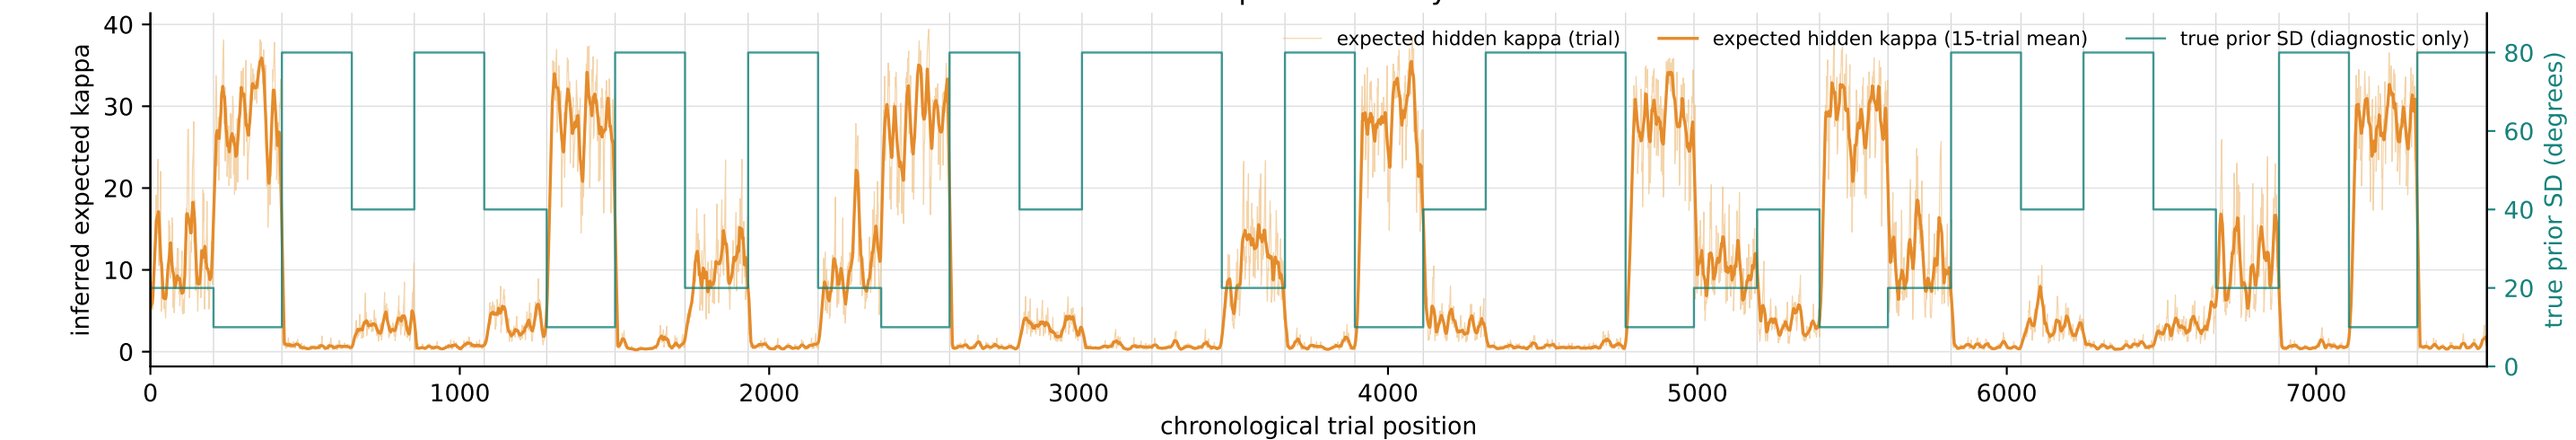

Participant 5: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | NON-CONVERGED FIT

Inferred hidden-prior reliability across trials

Participant 6: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | converged; parameter near bound

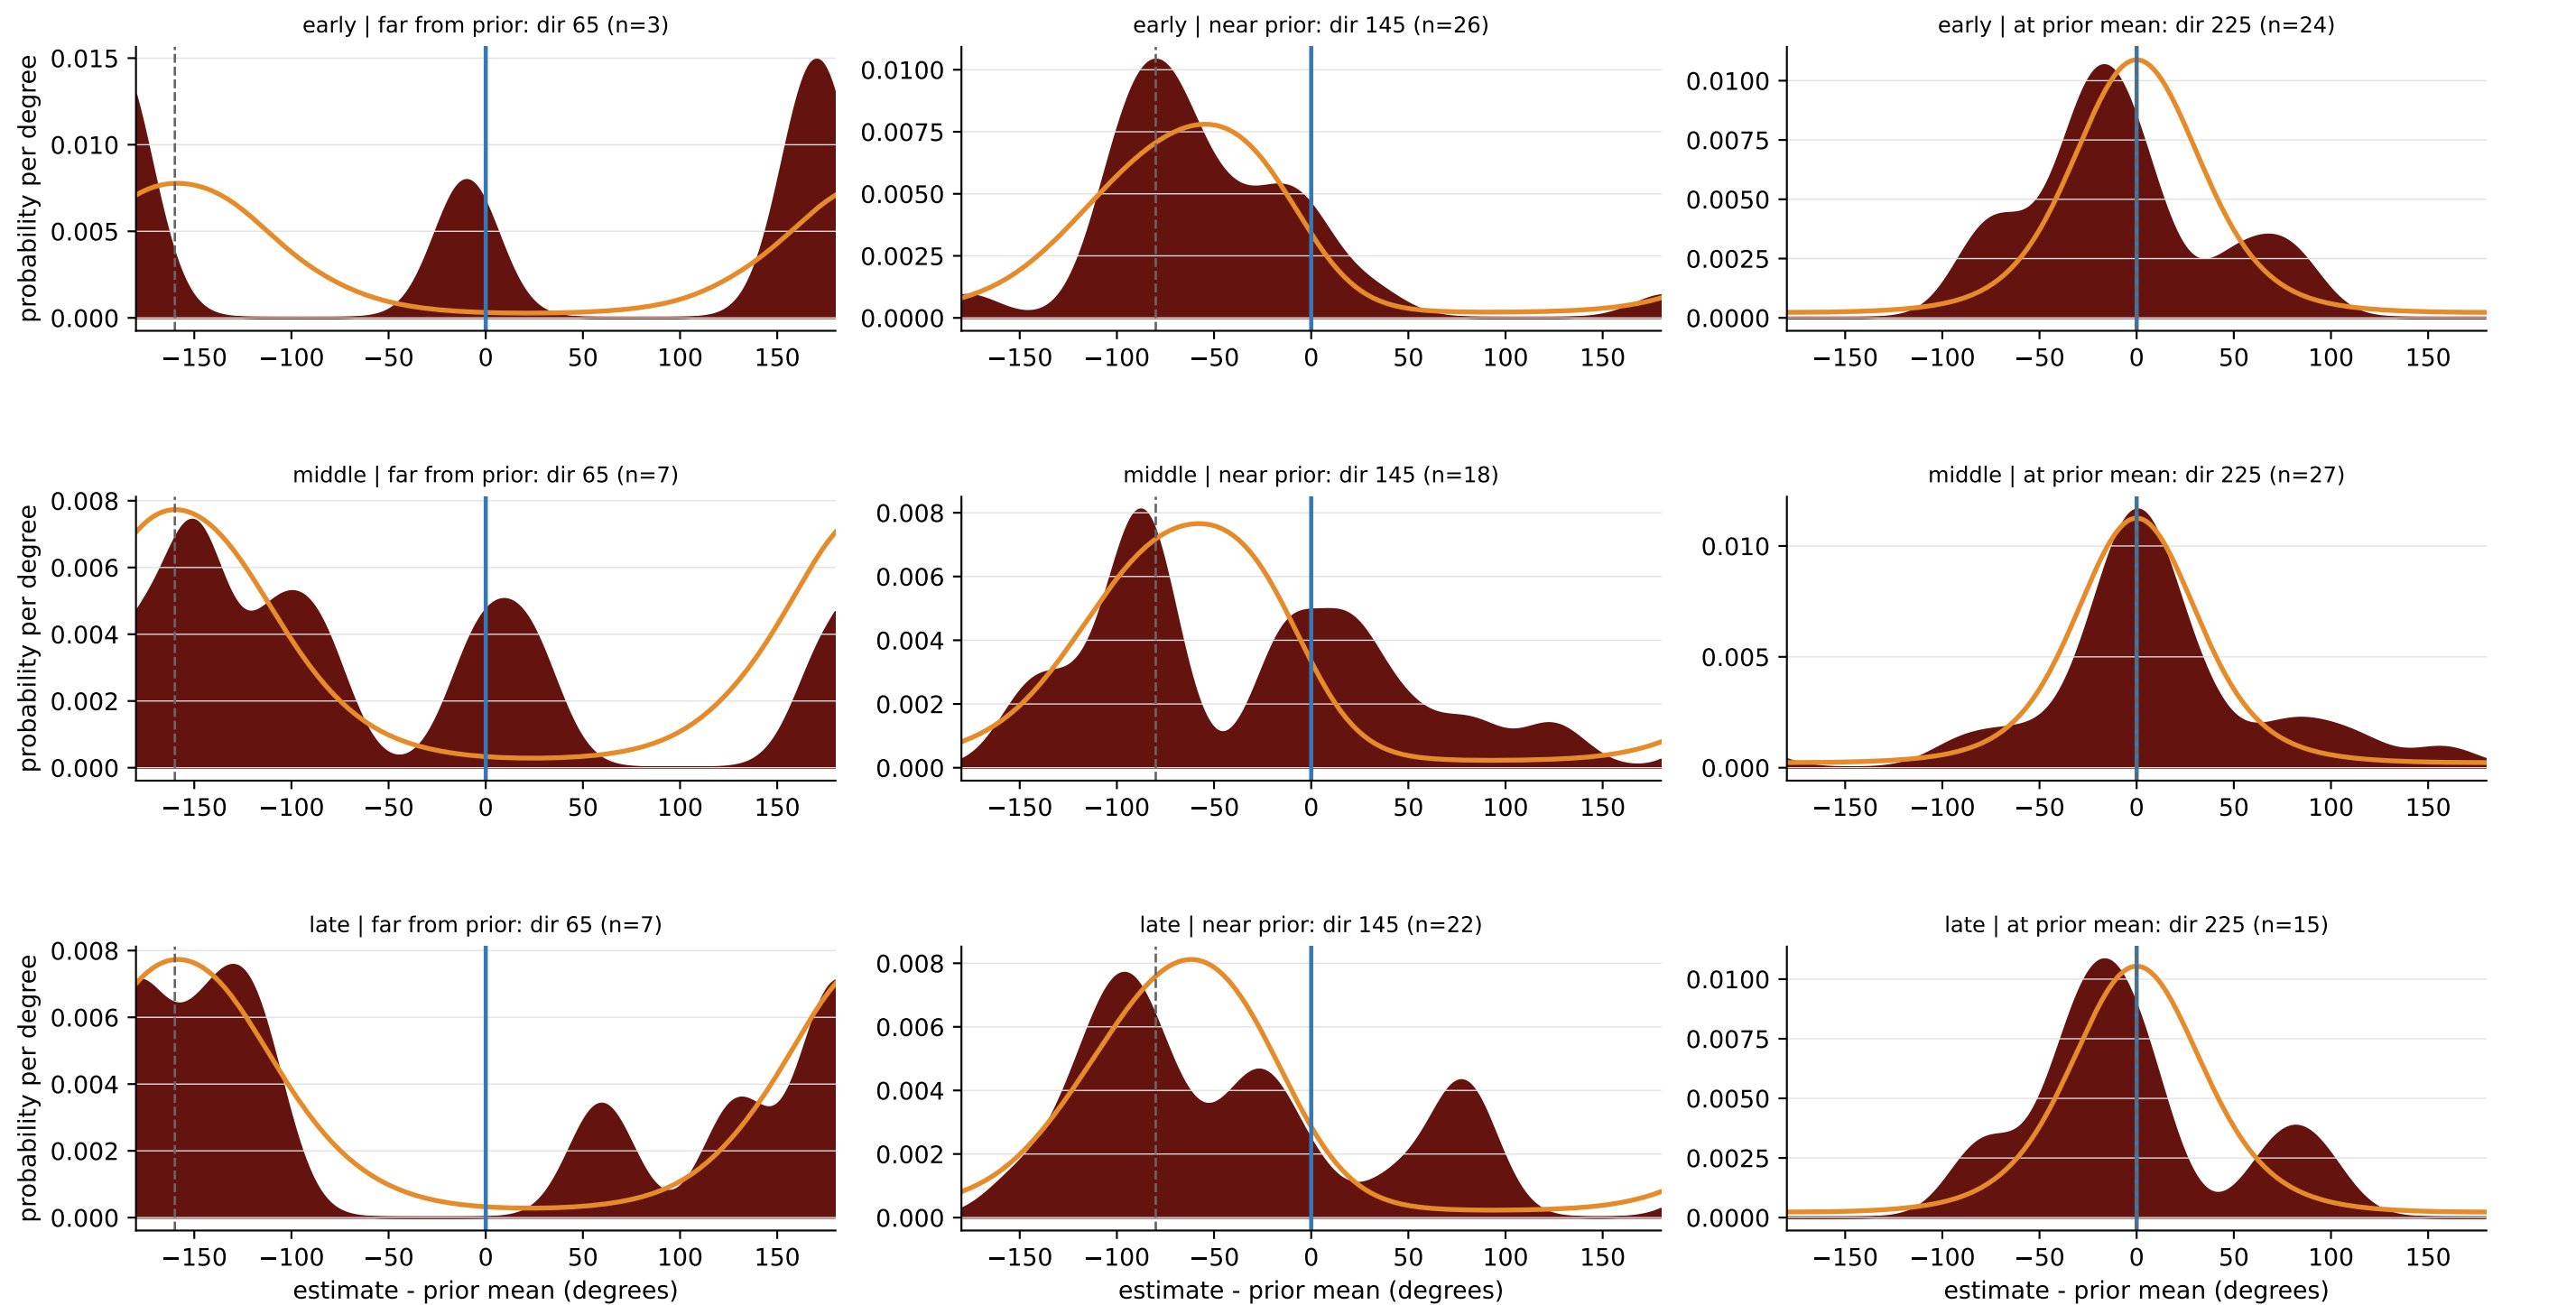

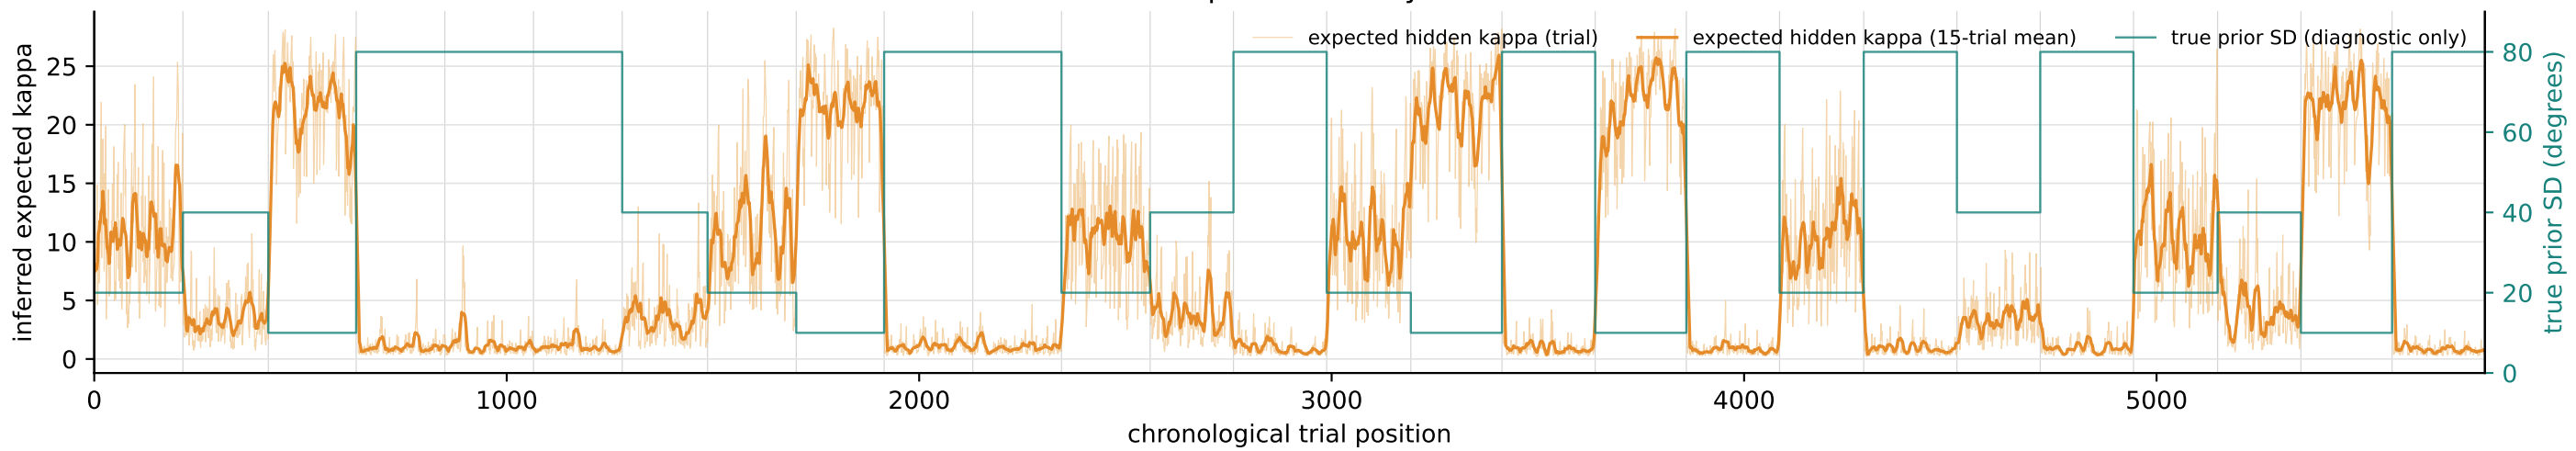

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus

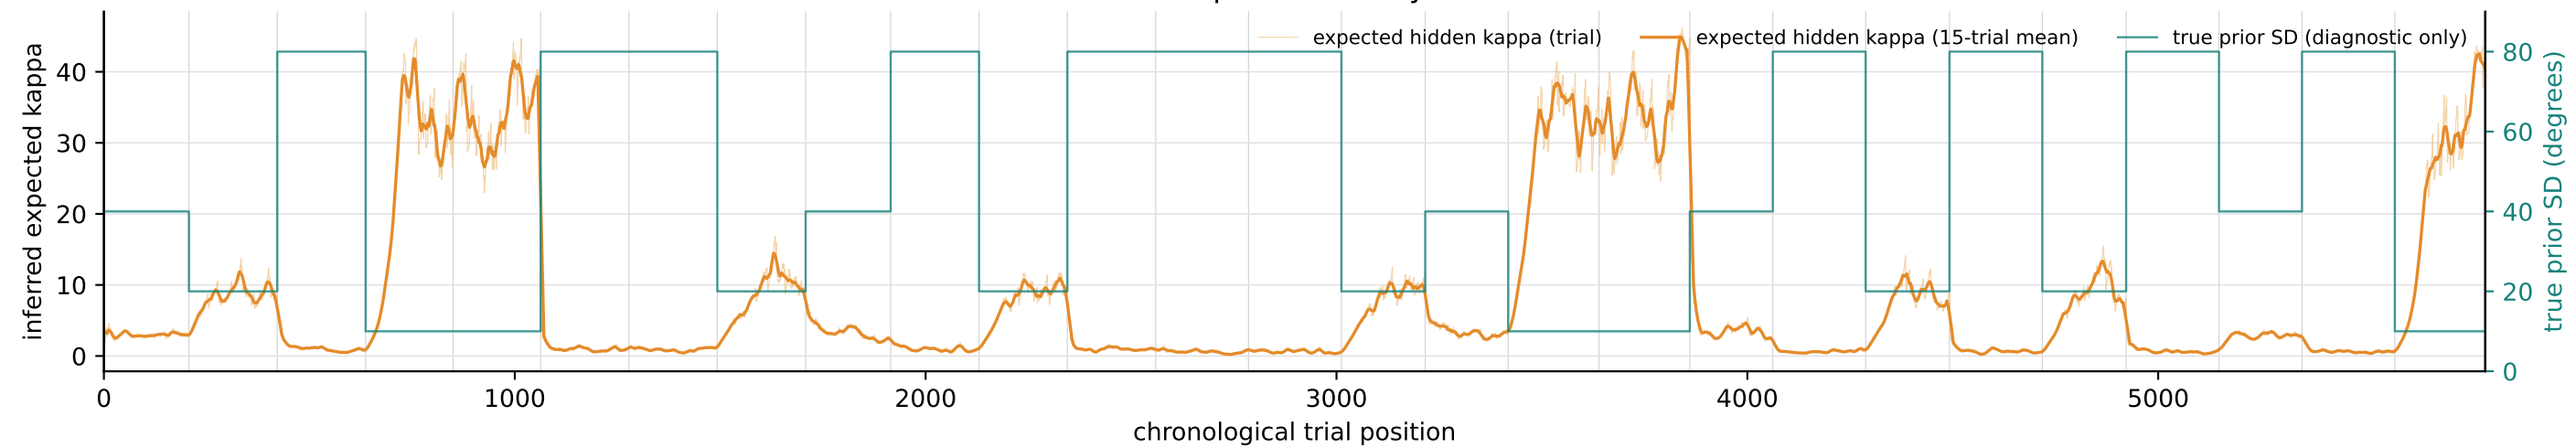

Participant 7: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | NON-CONVERGED FIT

Inferred hidden-prior reliability across trials

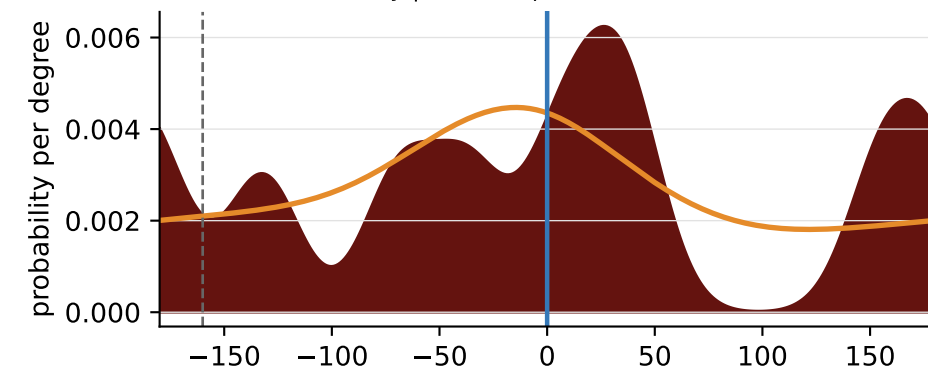

Participant 8: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | NON-CONVERGED FIT

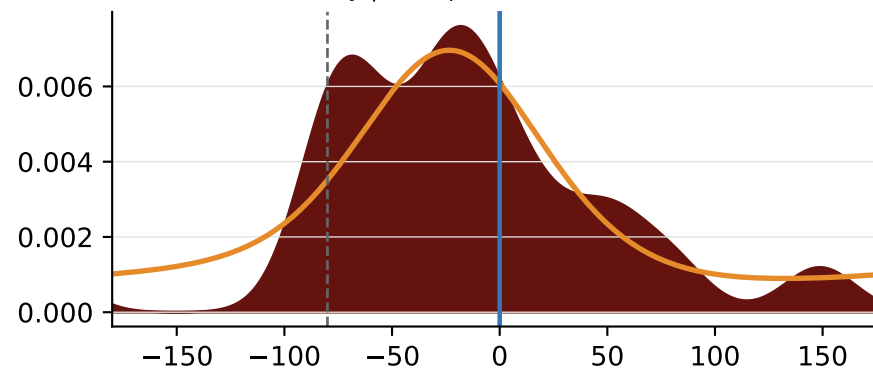

Inferred hidden-prior reliability across trials

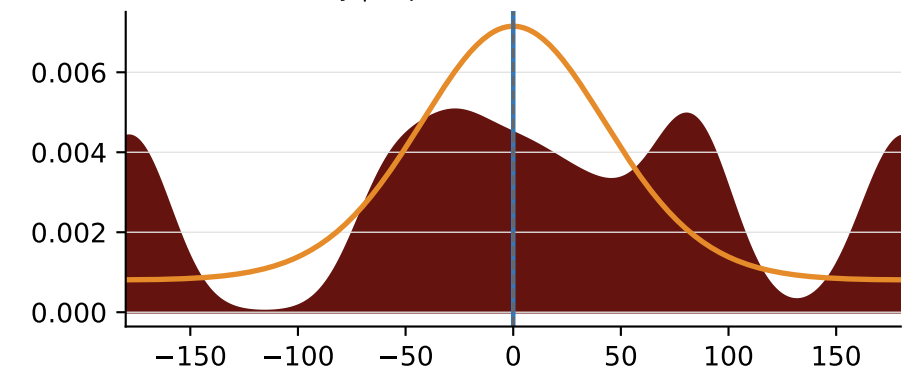

early | far from prior: dir 65 (n=8)

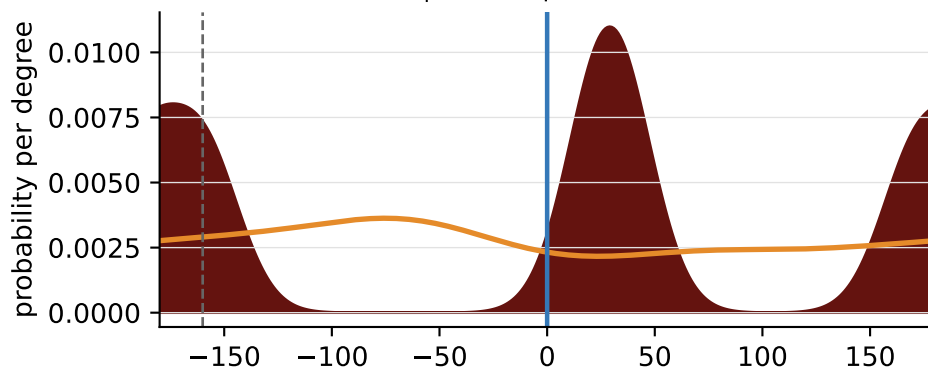

early | near prior: dir 145 (n=20)

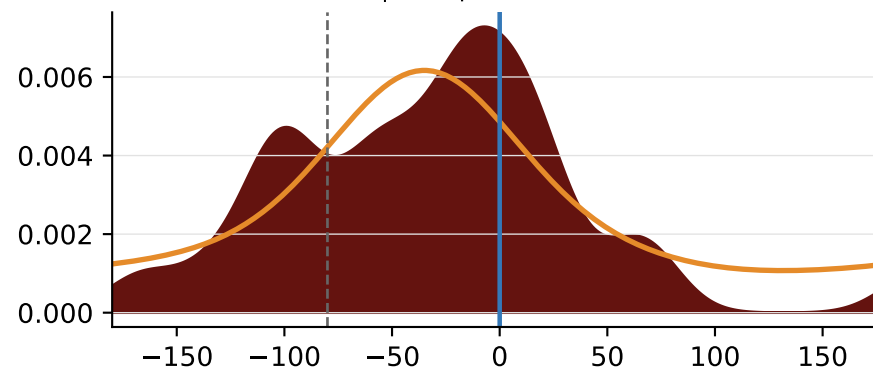

early | at prior mean: dir 225 (n=19)

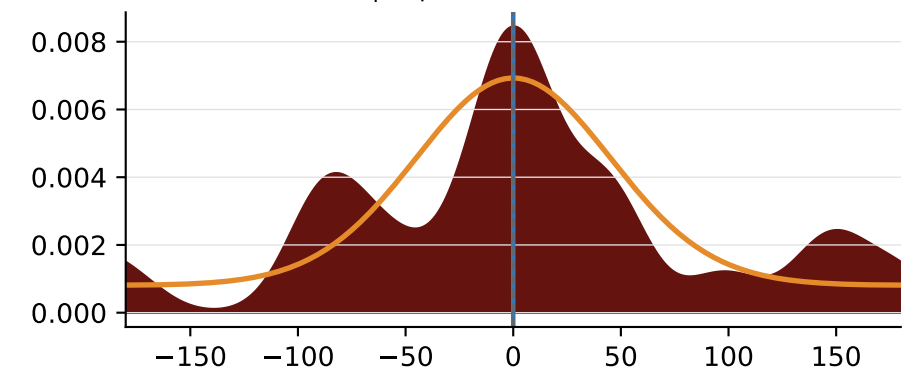

middle | far from prior: dir 65 (n=4)

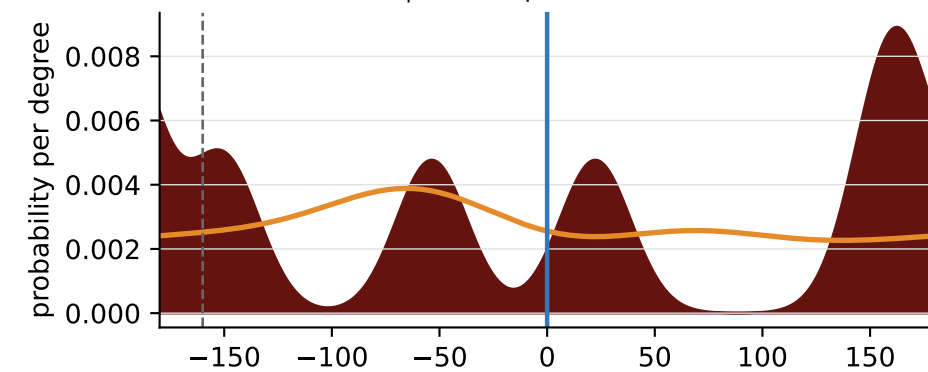

middle | near prior: dir 145 (n=26)

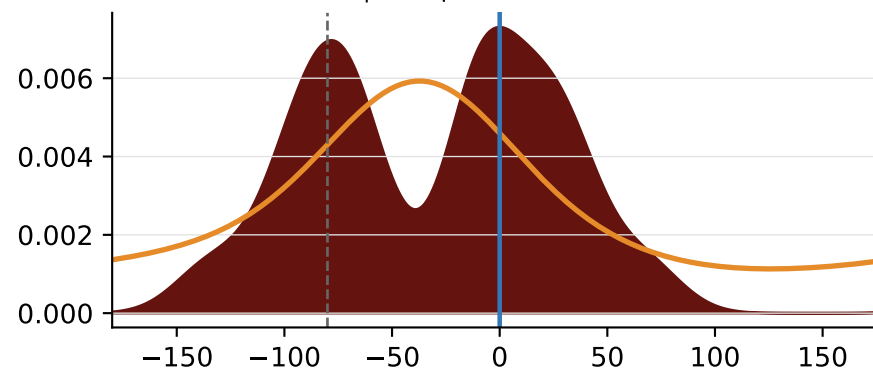

middle | at prior mean: dir 225 (n=21)

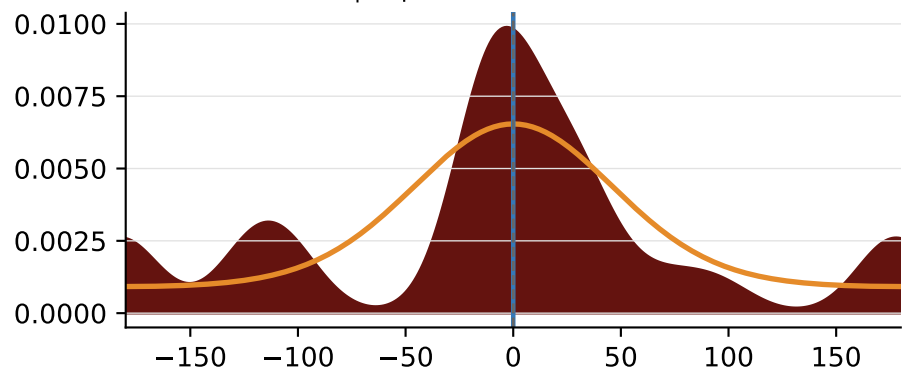

late | far from prior: dir 65 (n=5)

late | near prior: dir 145 (n=20)

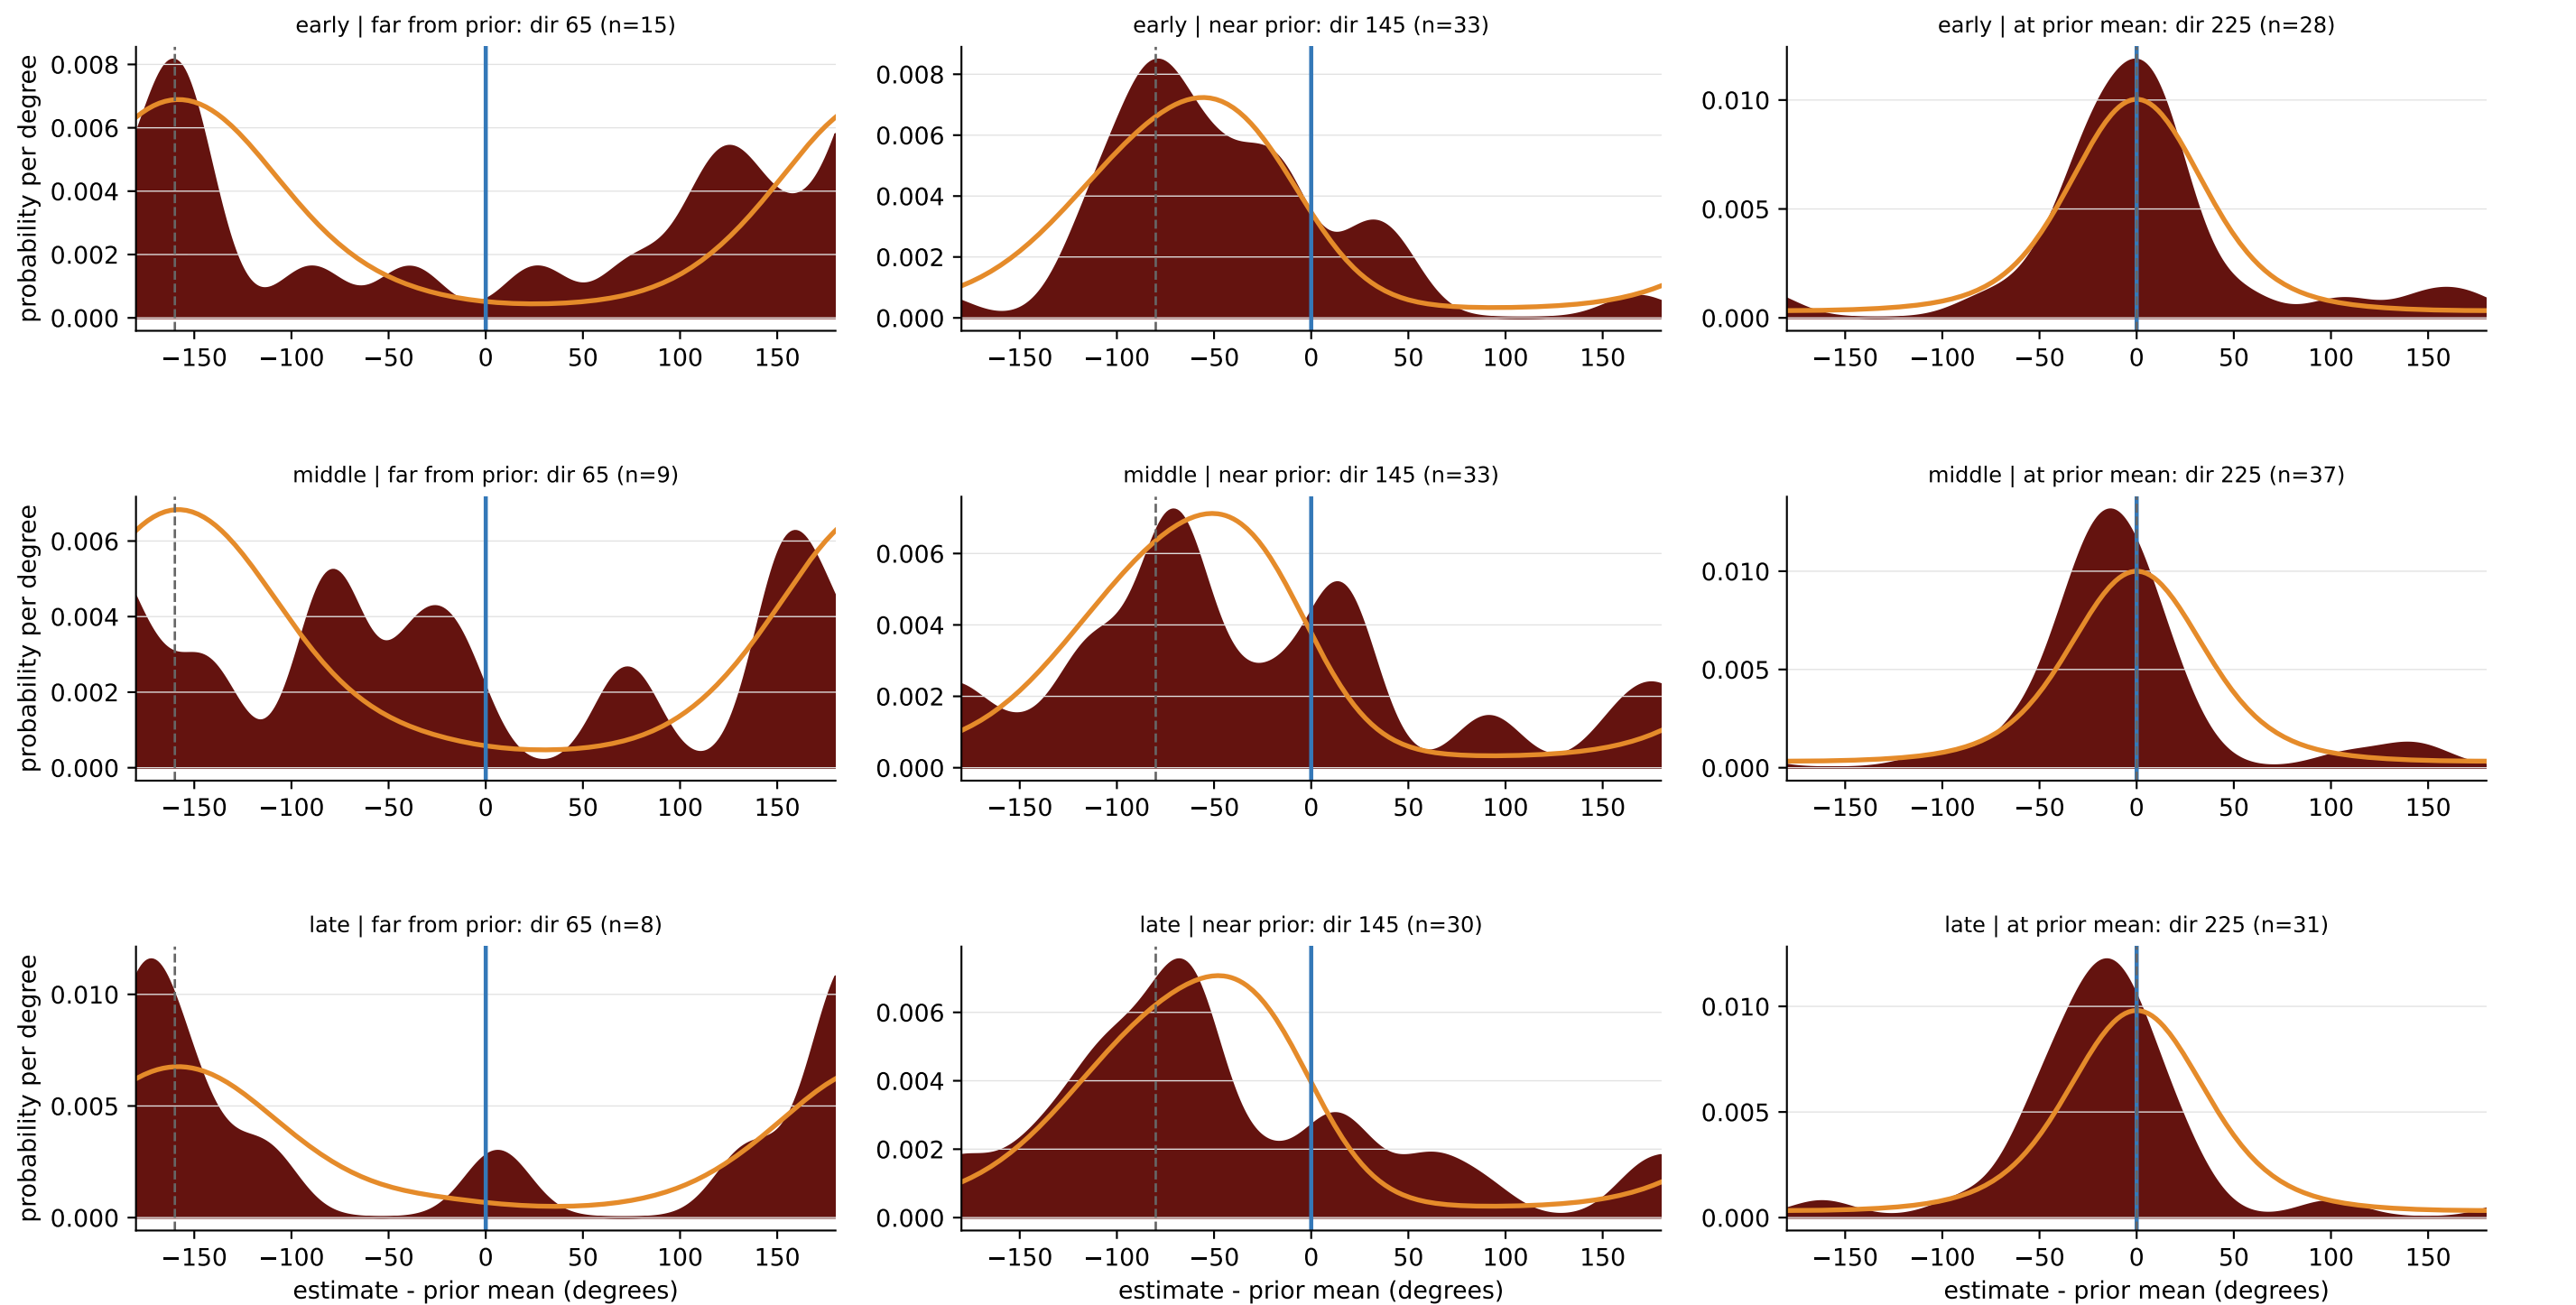

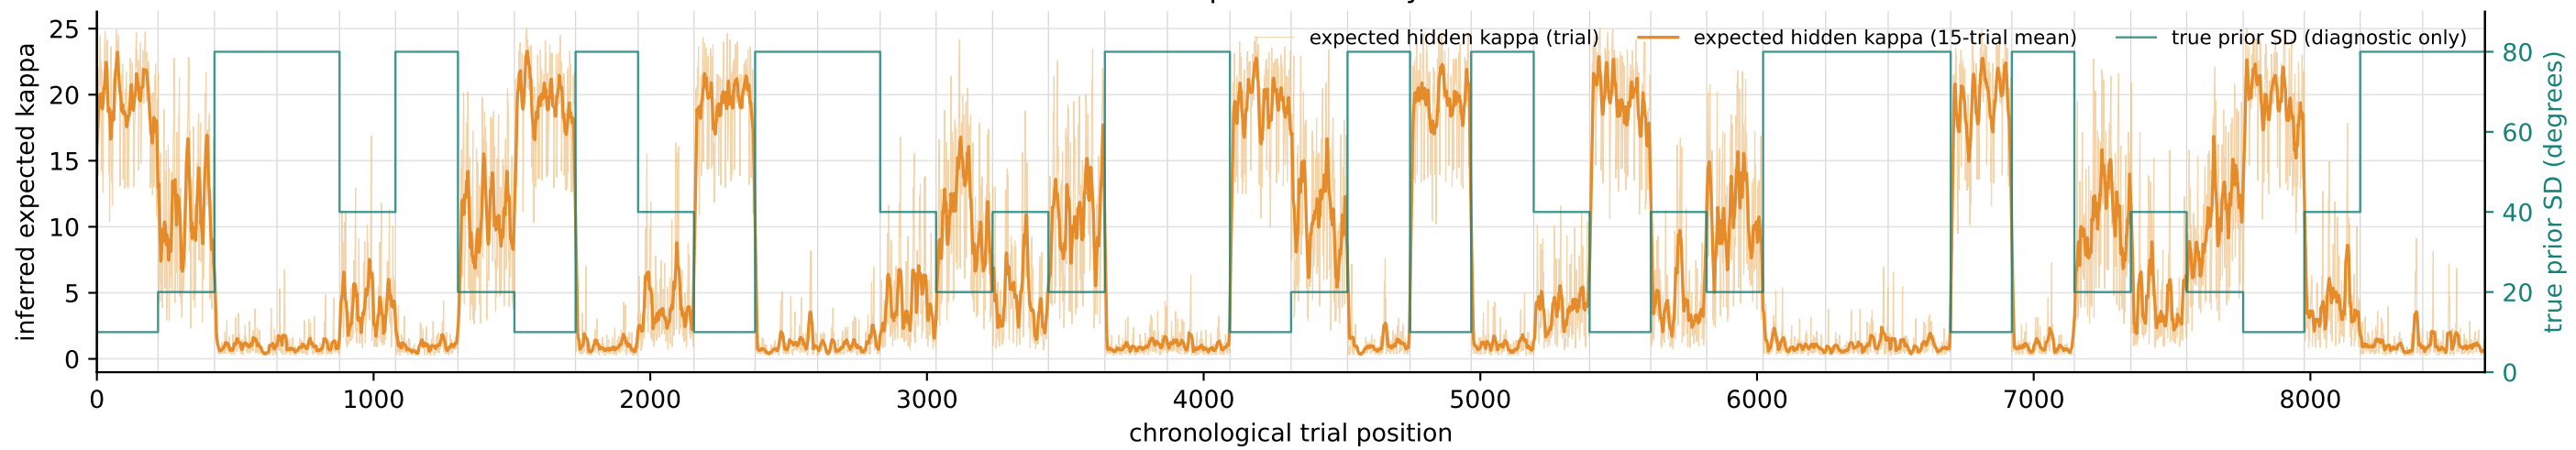

late | at prior mean: dir 225 (n=26)

observed data hierarchical model prior mean stimulus

Participant 9: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | NON-CONVERGED FIT

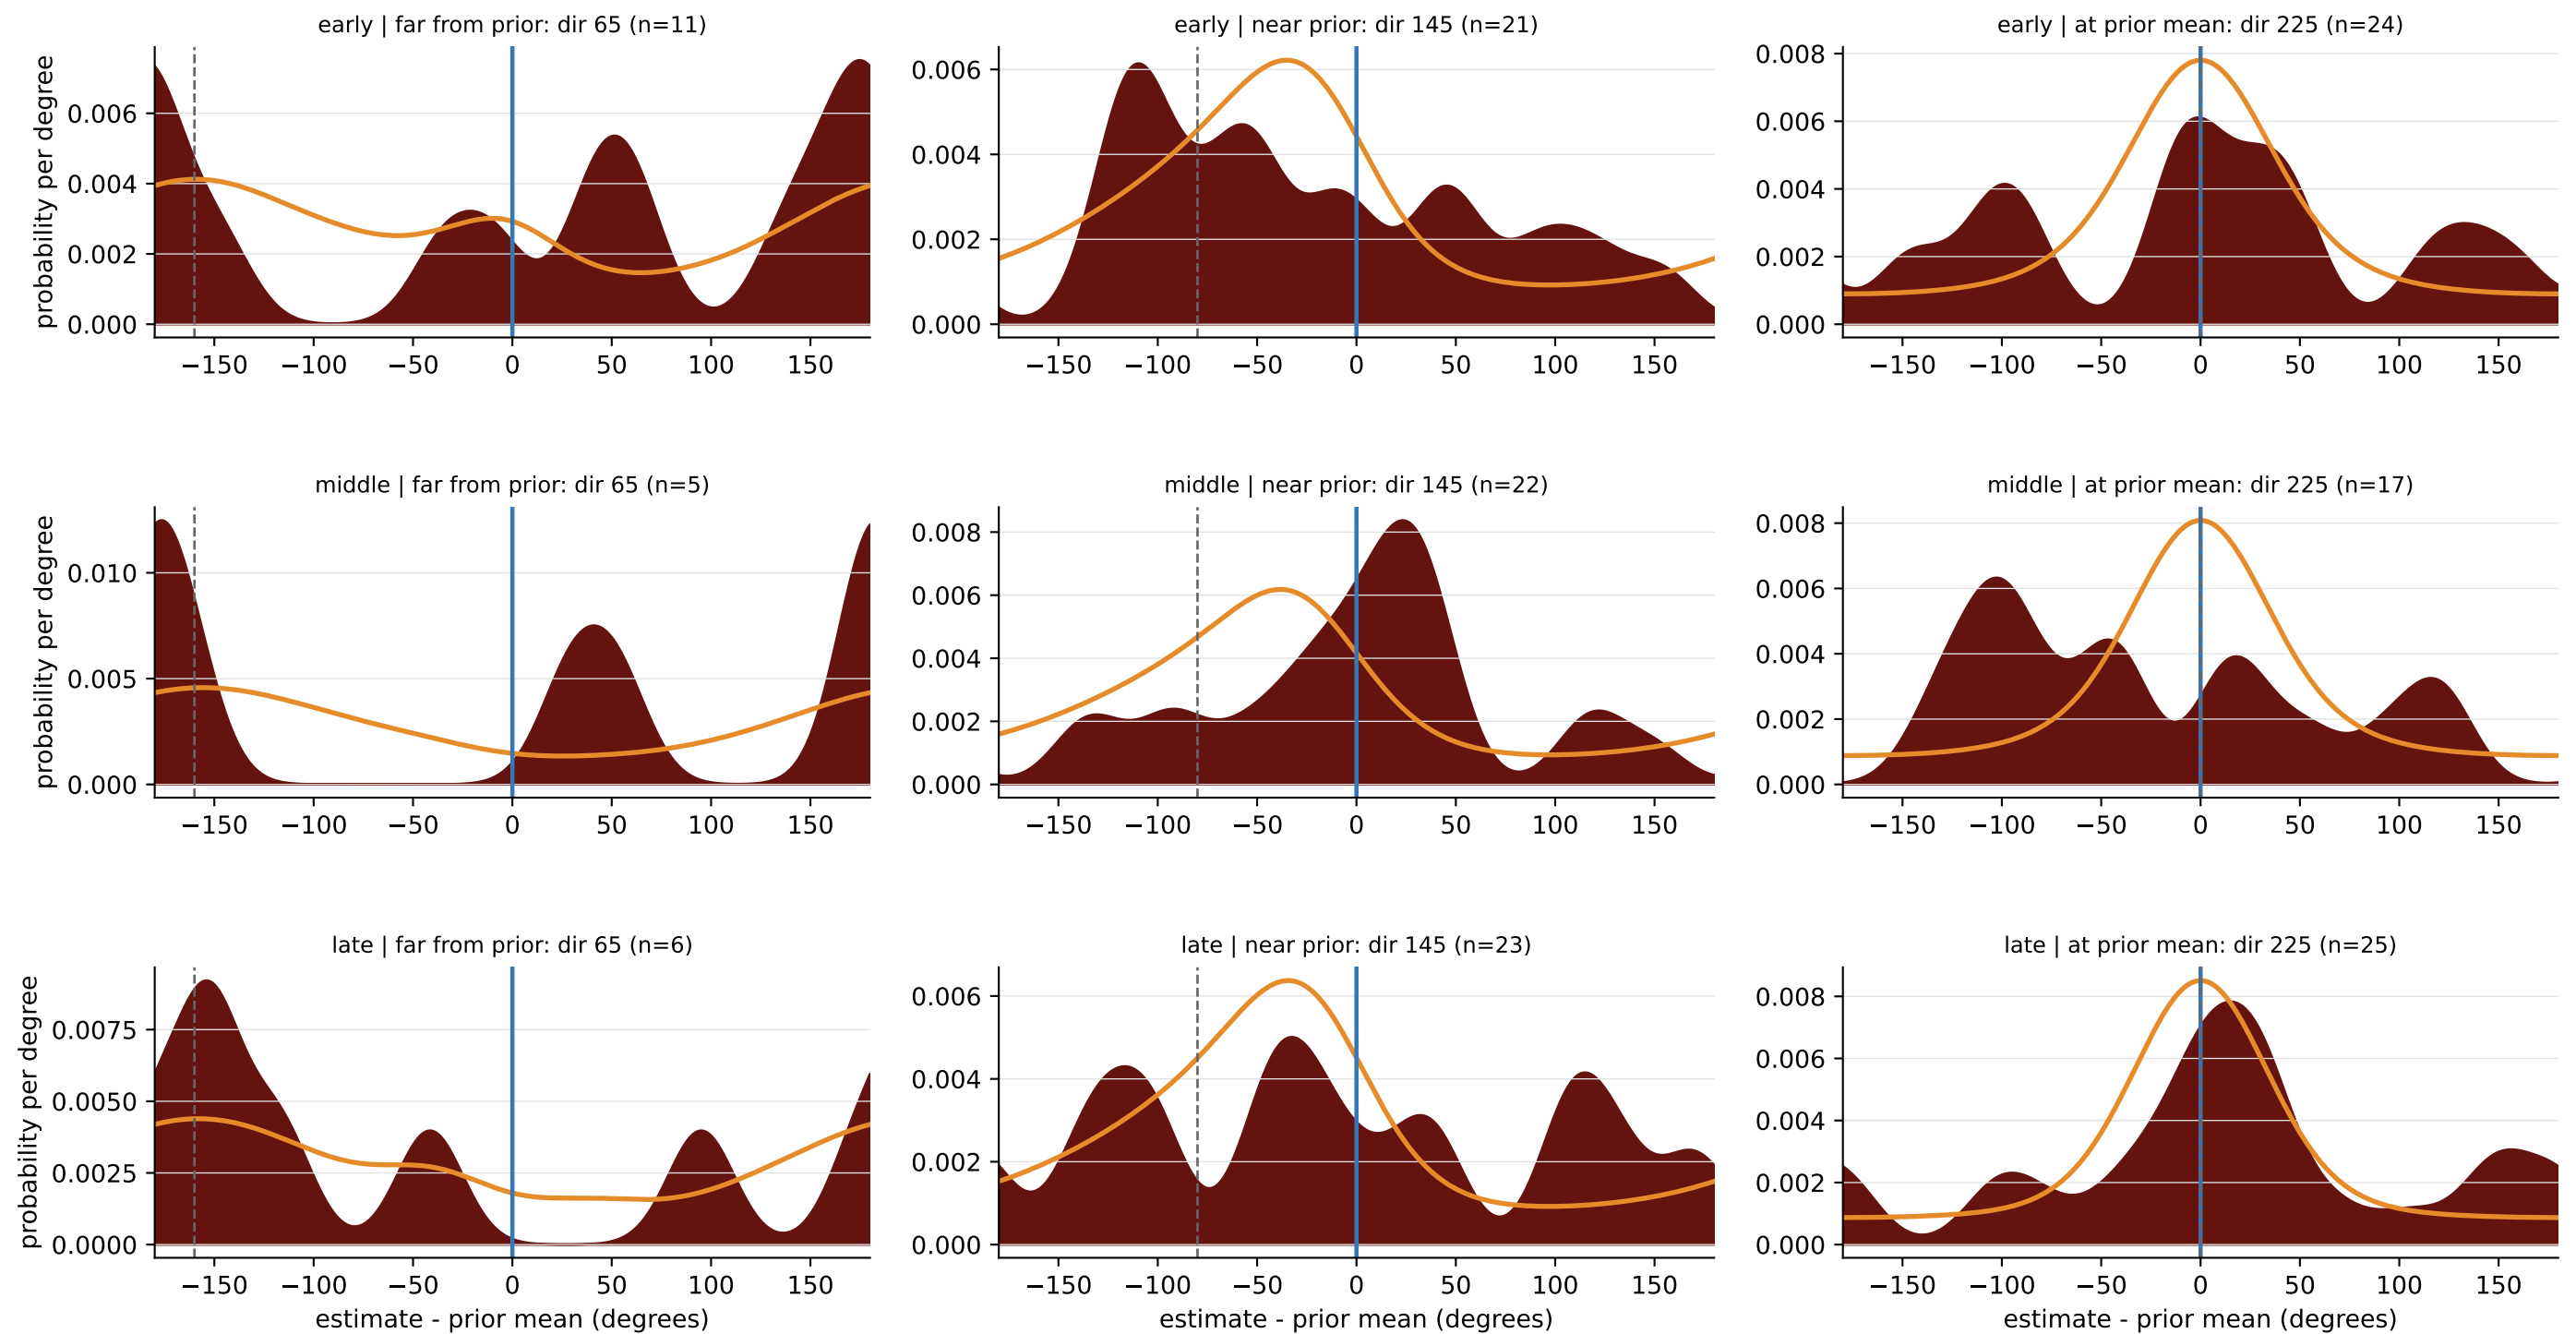

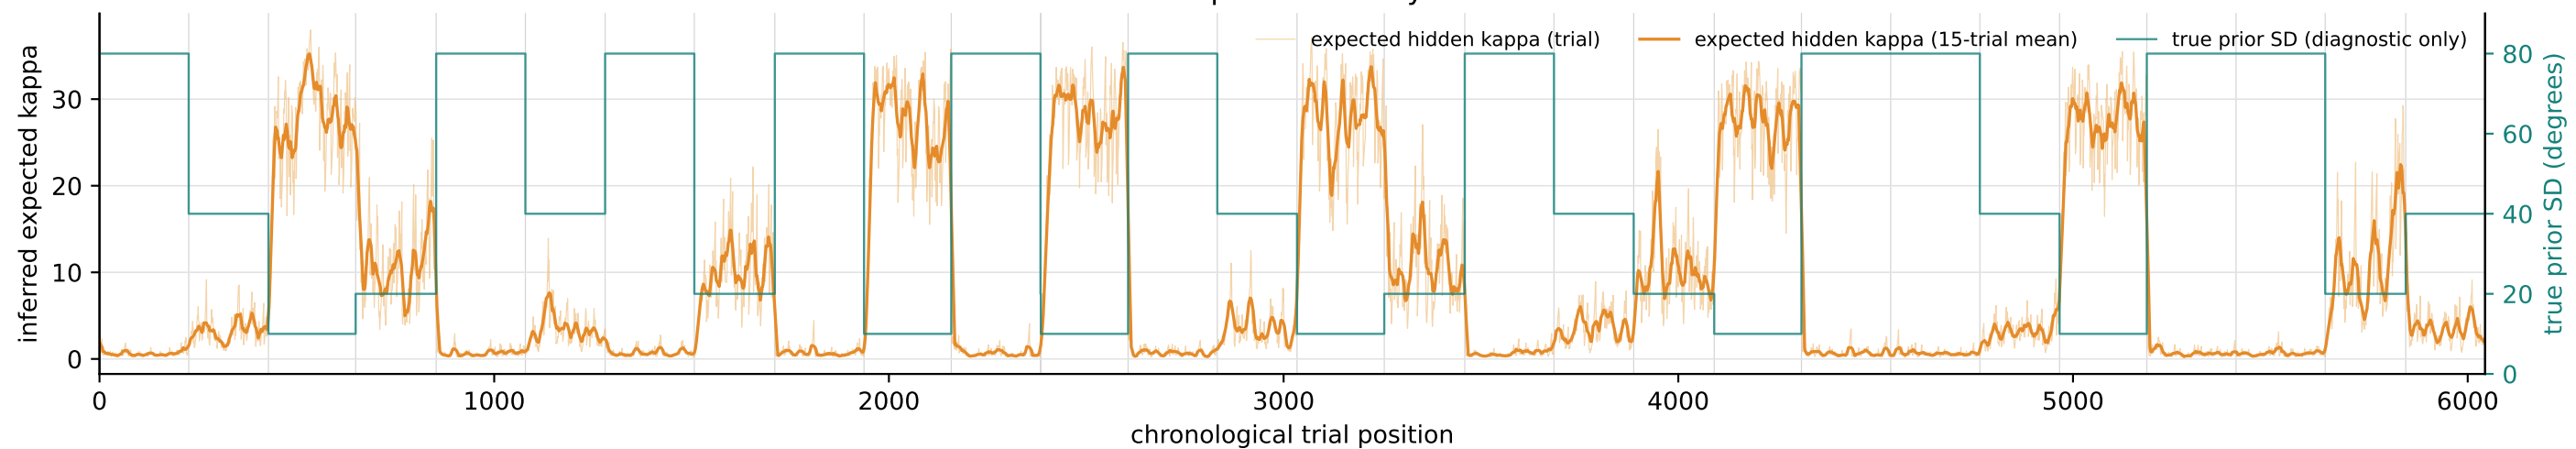

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus

Participant 10: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | converged; parameter near bound

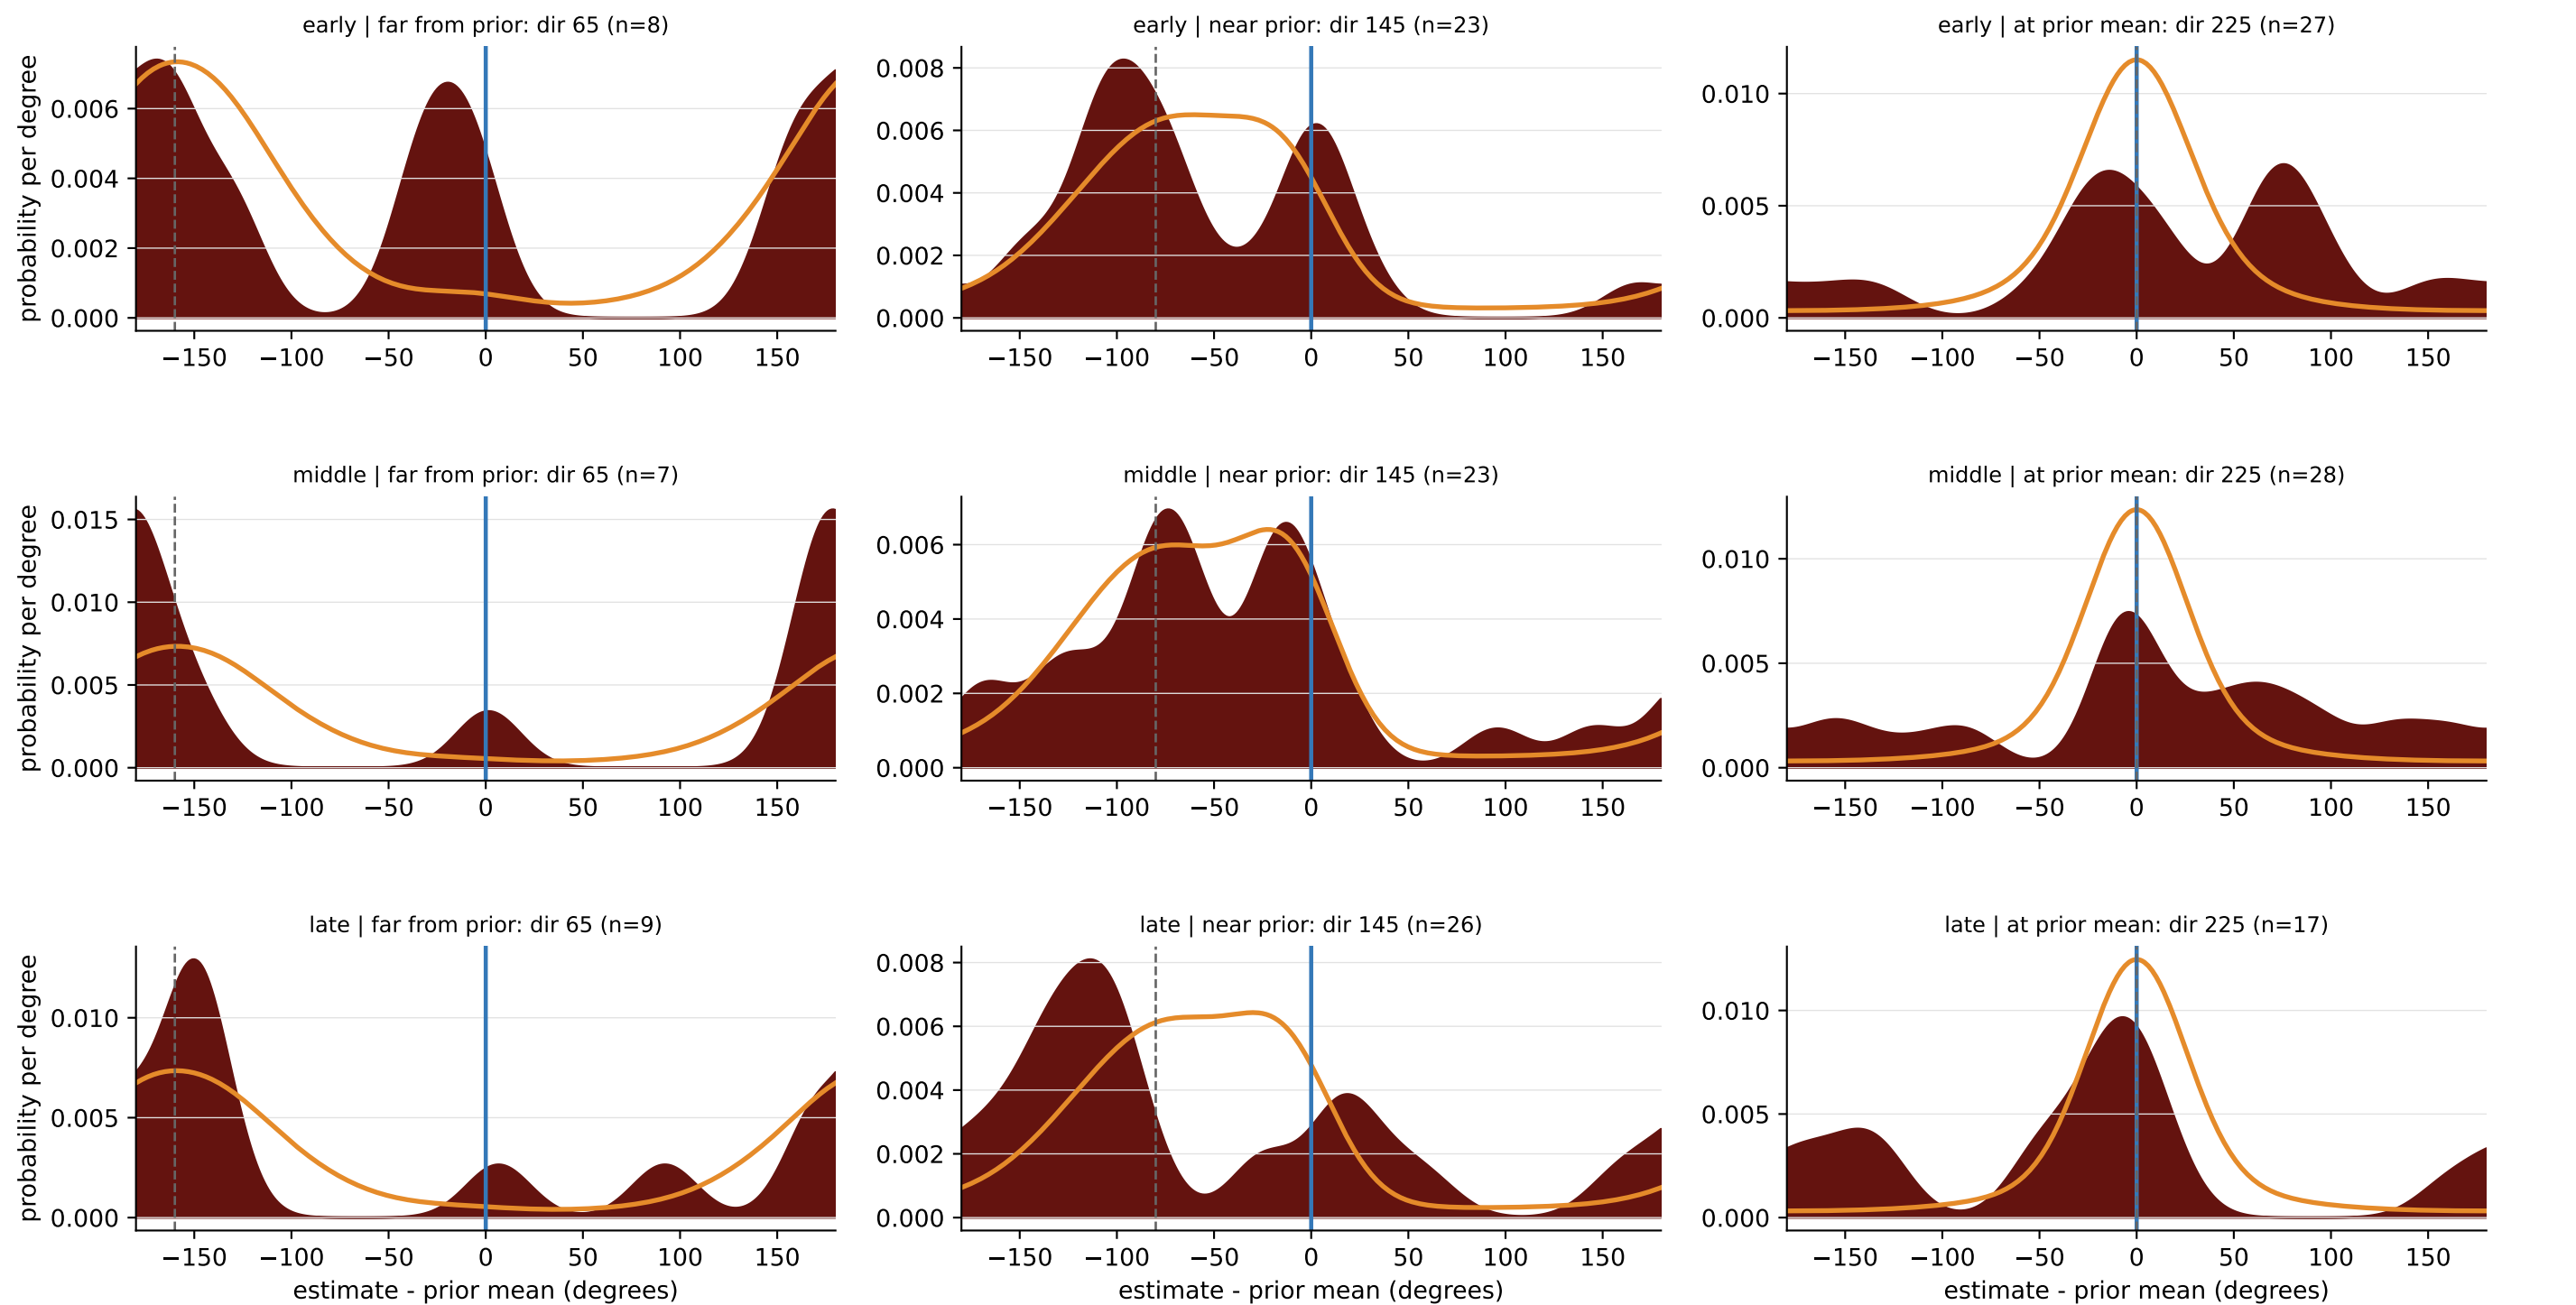

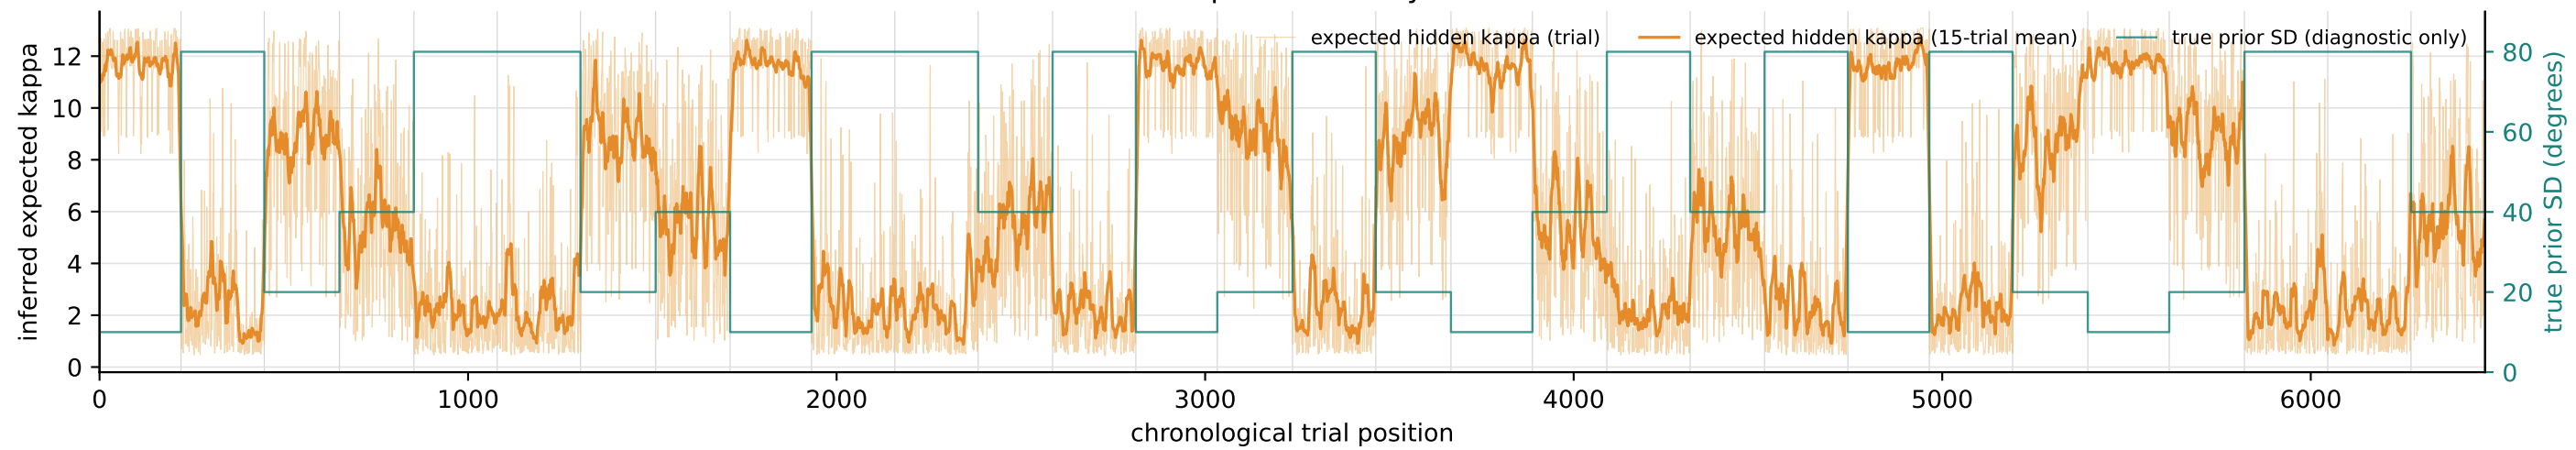

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus

Participant 11: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | converged; parameter near bound

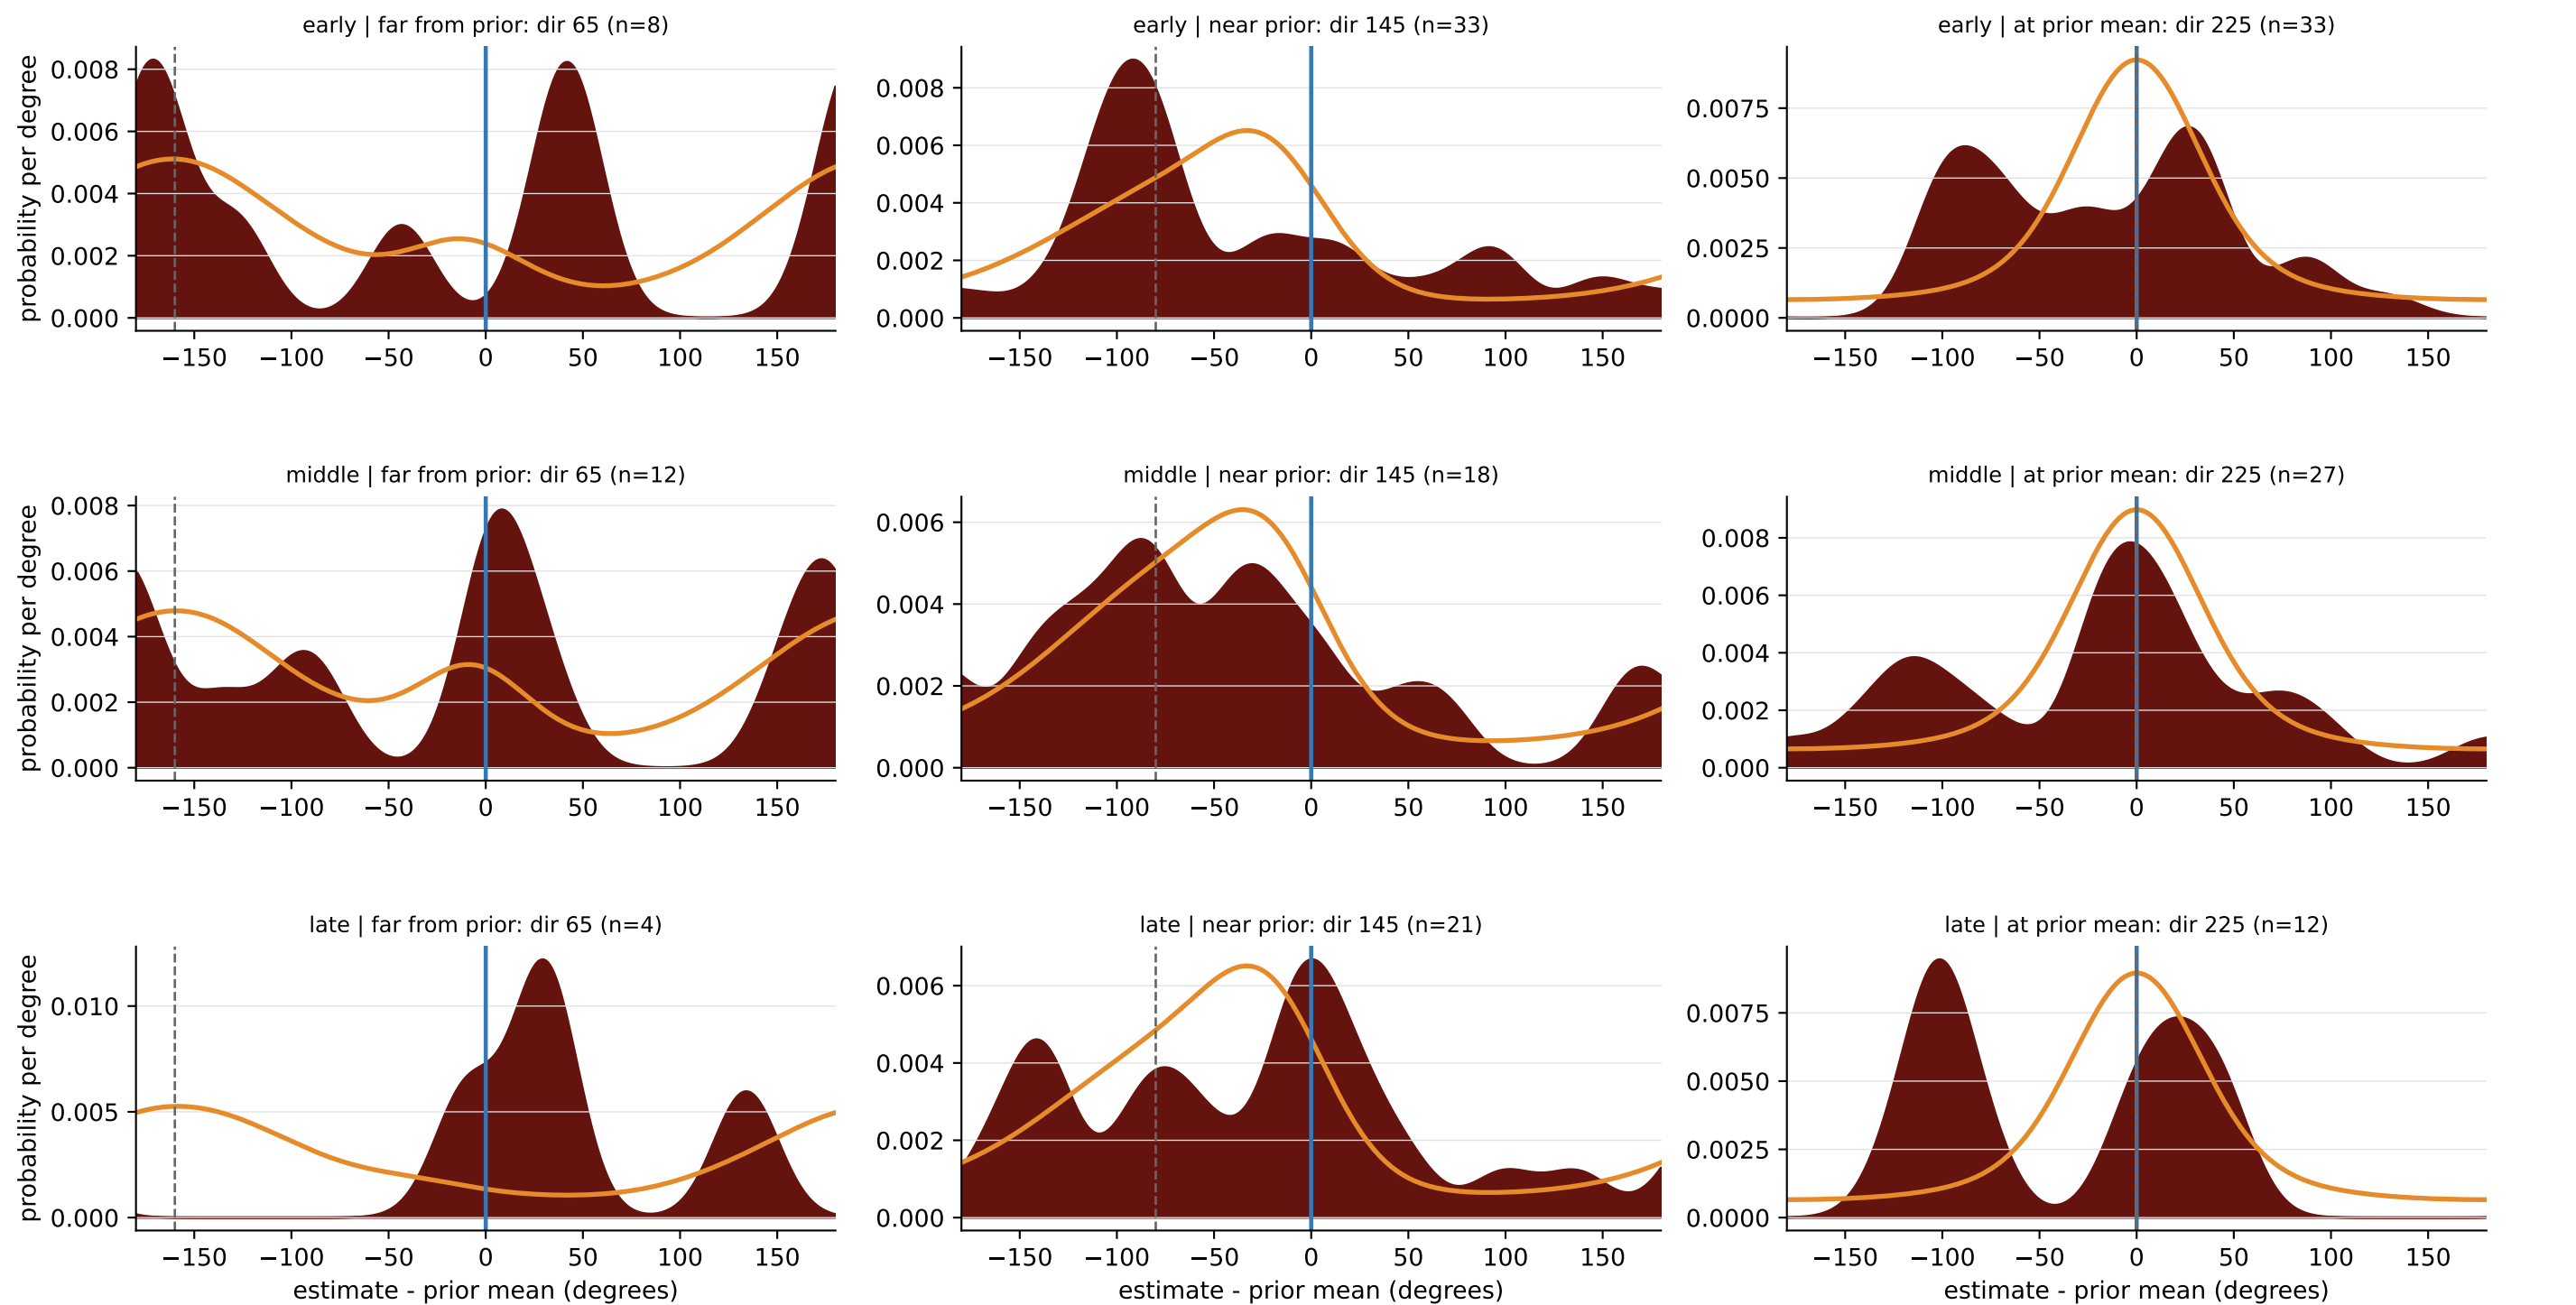

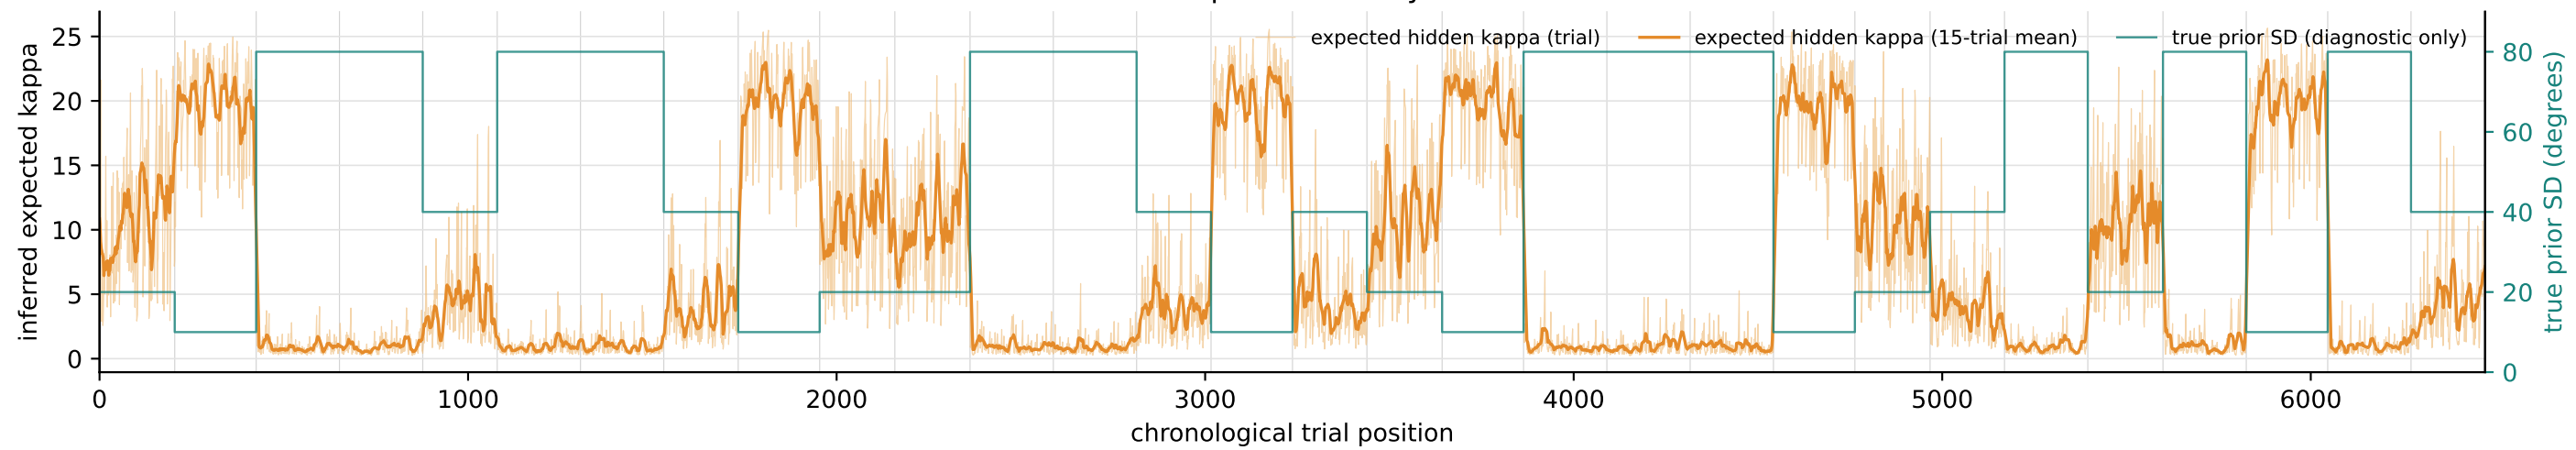

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus

Participant 12: hierarchical learning and responses by block phase
6% coherence, prior SD 80 degrees | converged

Inferred hidden-prior reliability across trials

observed data hierarchical model prior mean stimulus
