

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

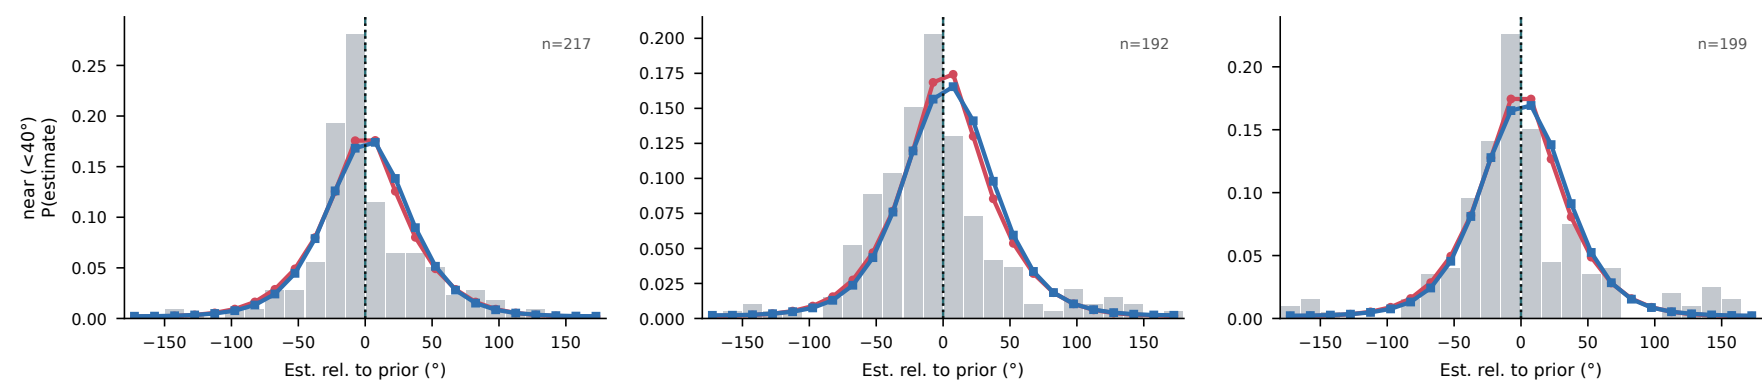

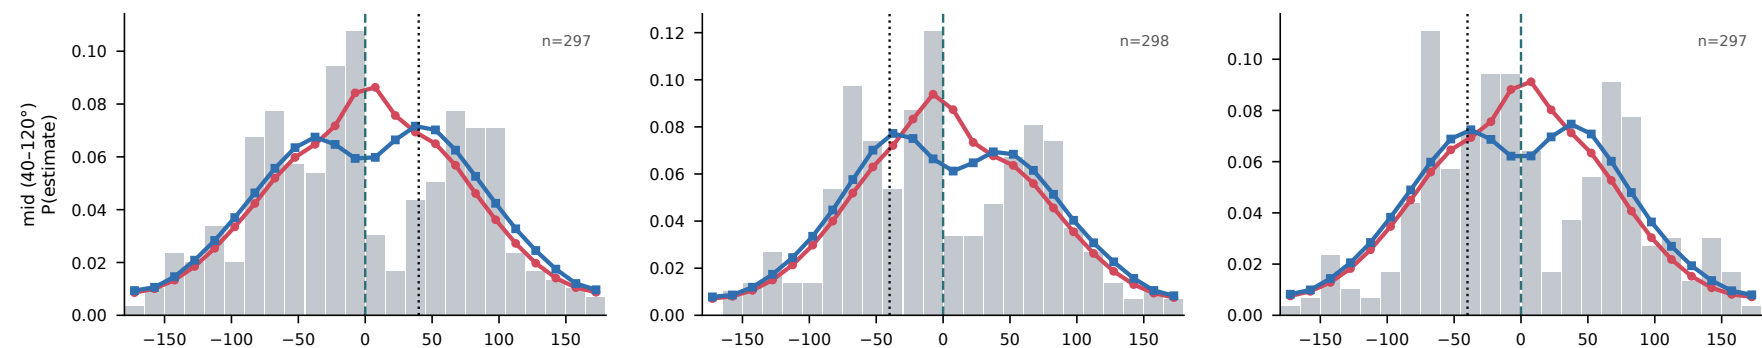

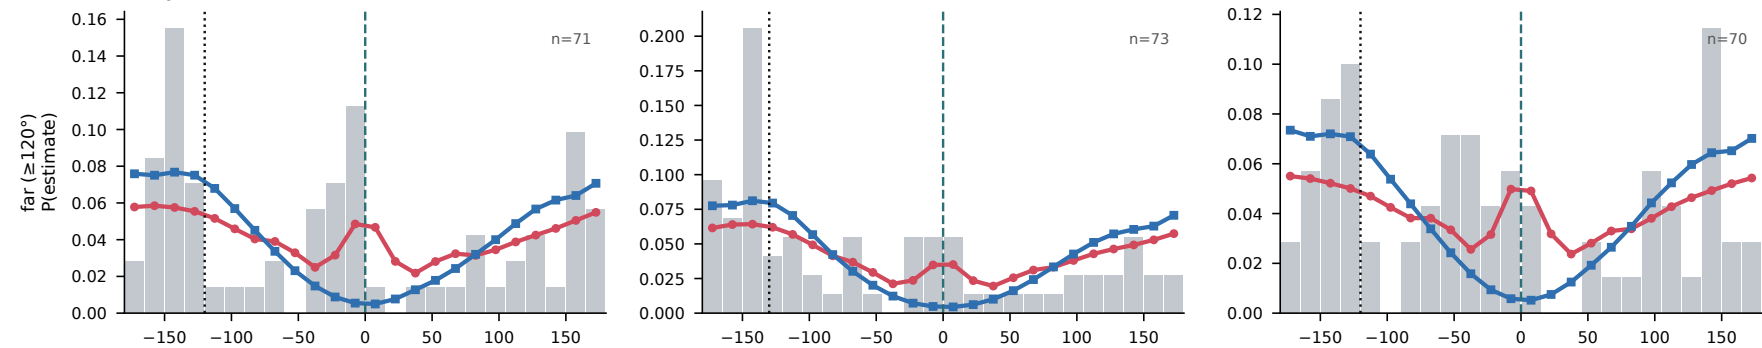

Participant 1 — learned prior confidence (our HB) vs true block width

Early

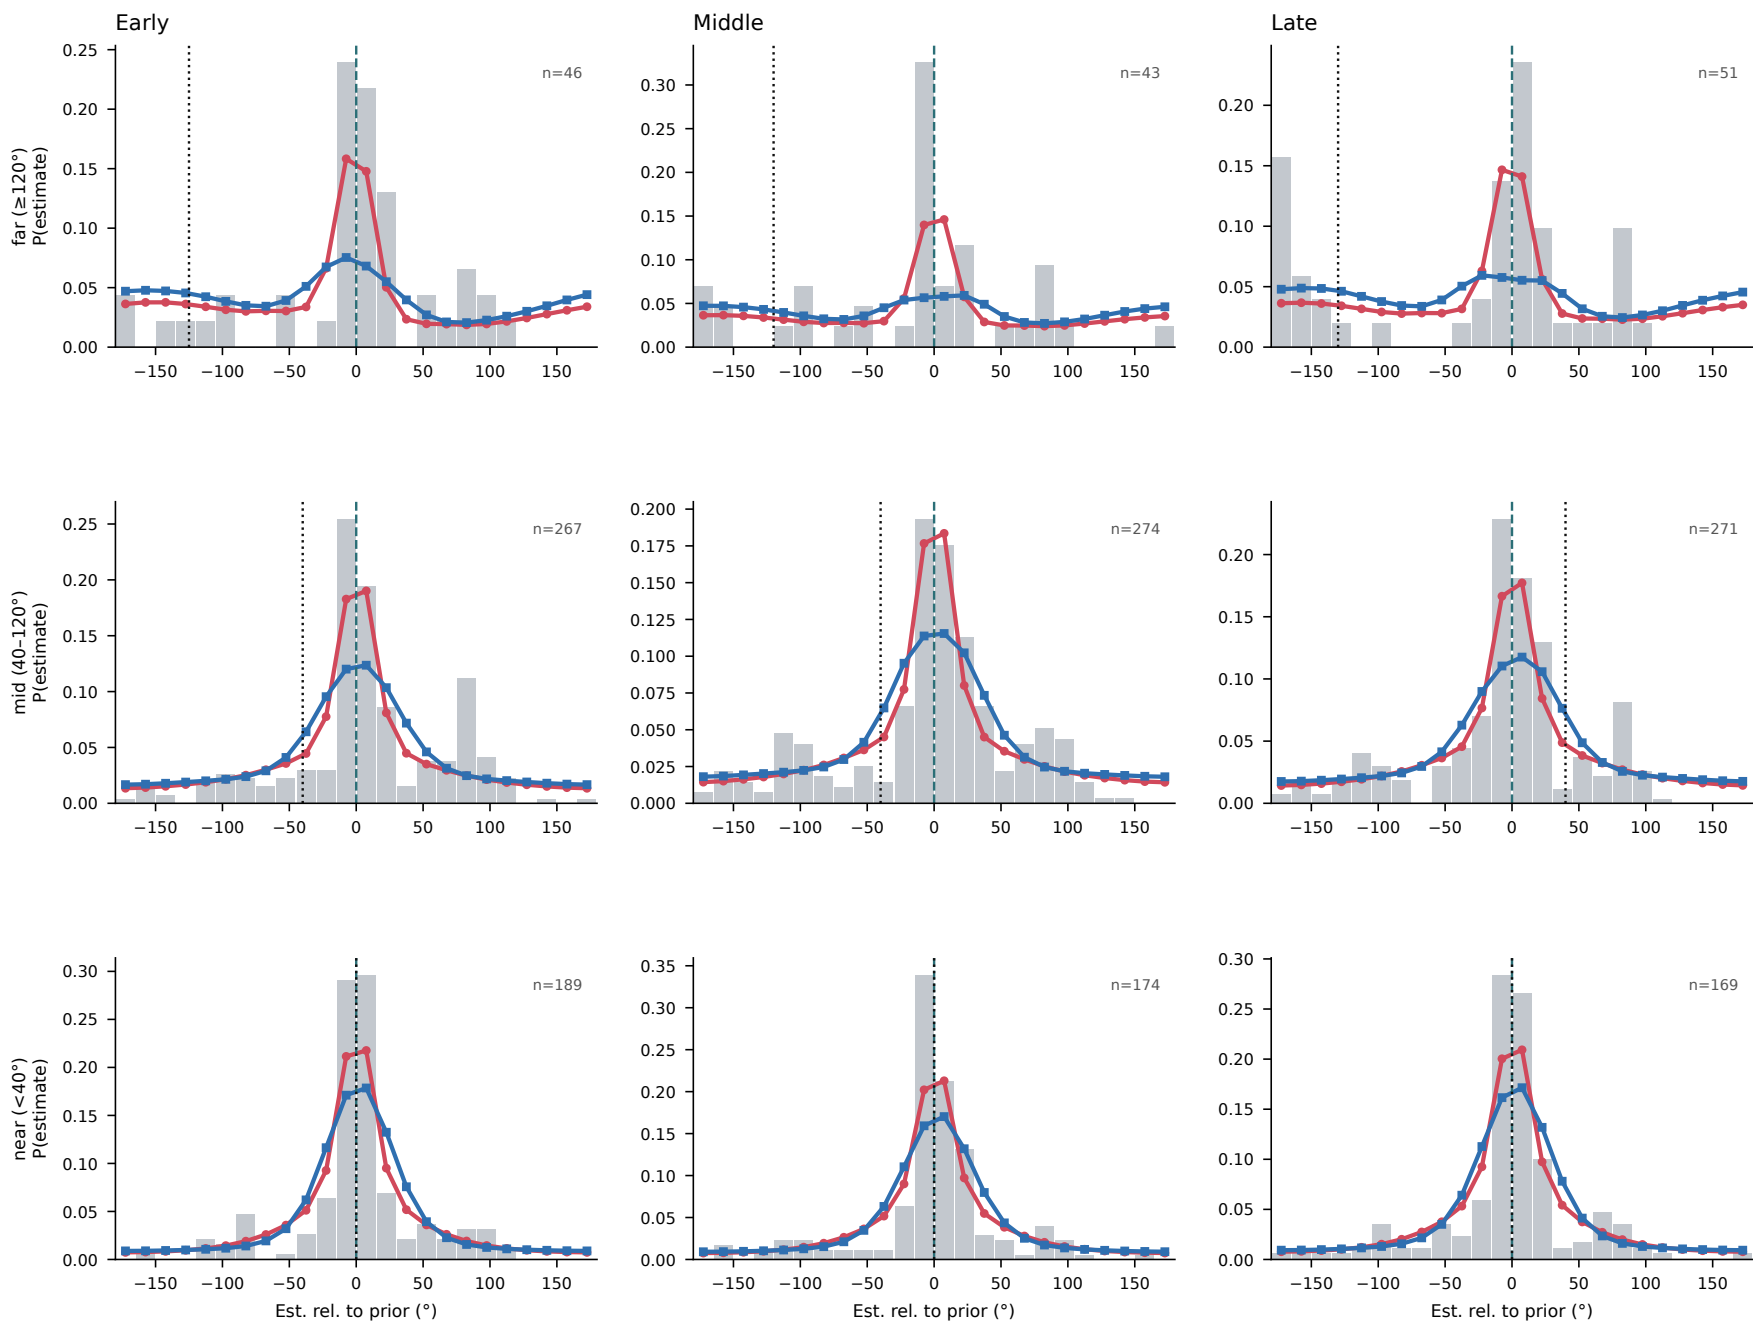

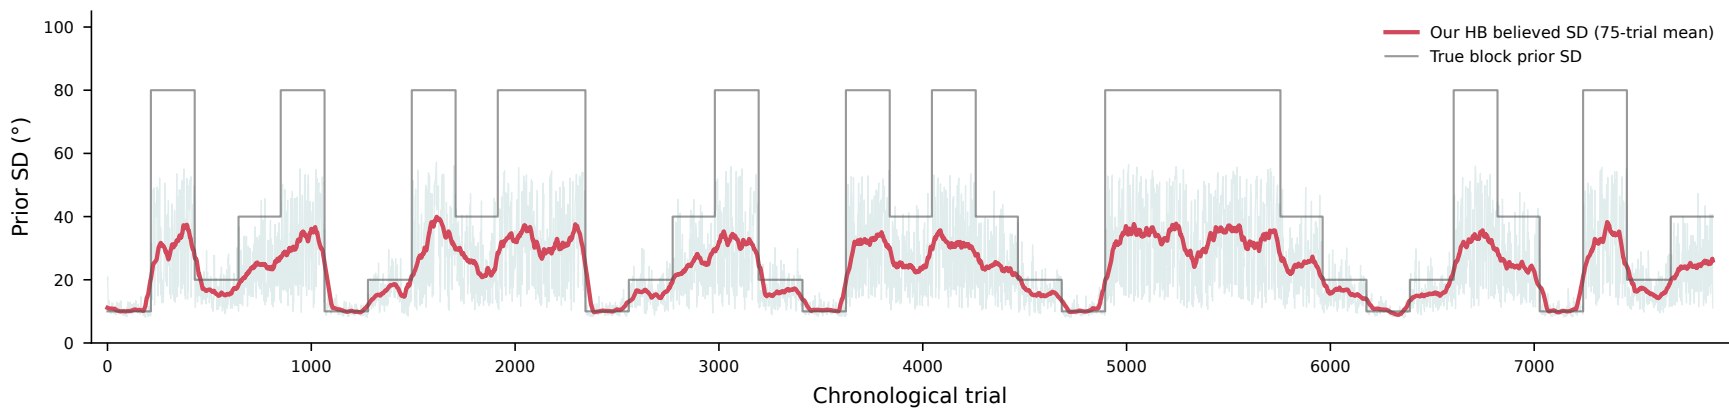

Middle

Late

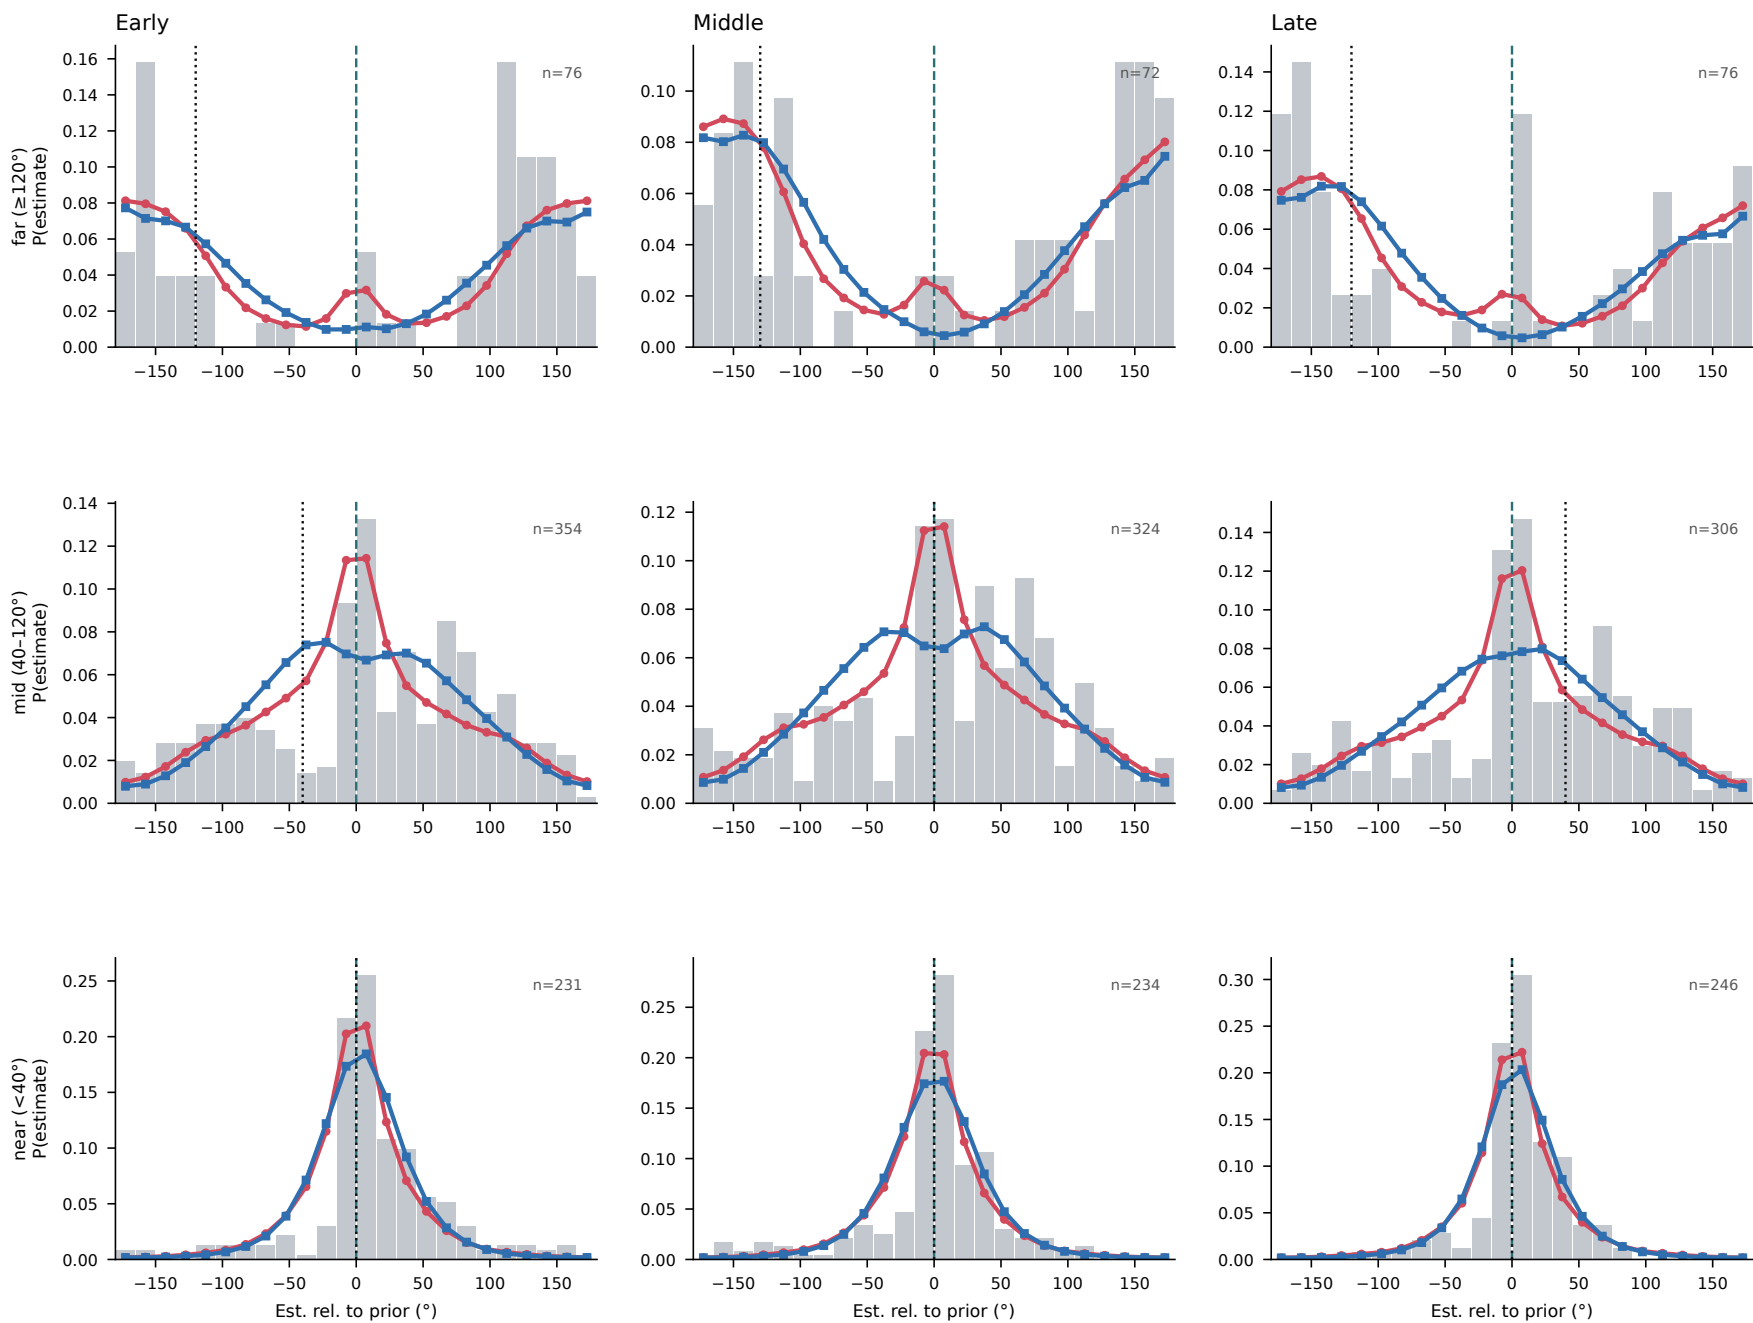

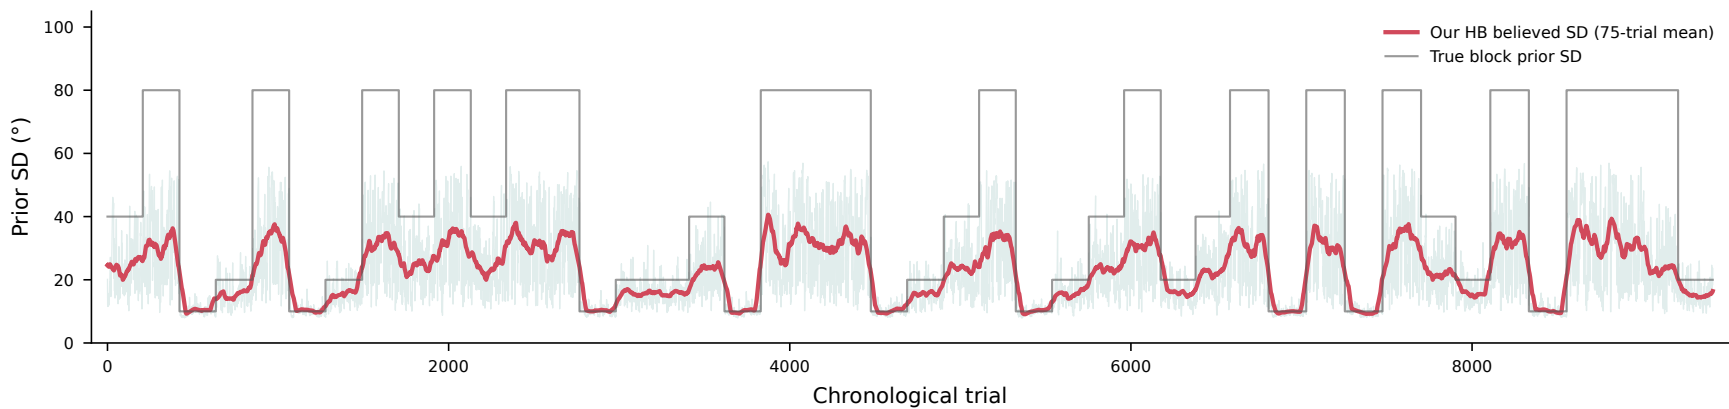

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

Participant 2 — learned prior confidence (our HB) vs true block width

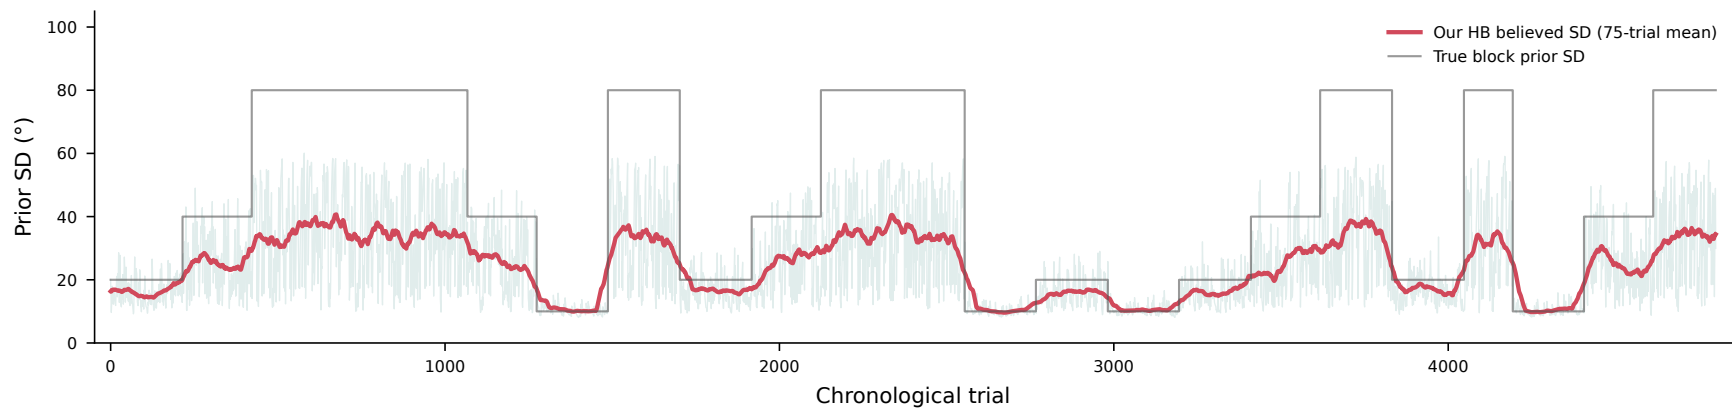

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

Participant 3 — learned prior confidence (our HB) vs true block width

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

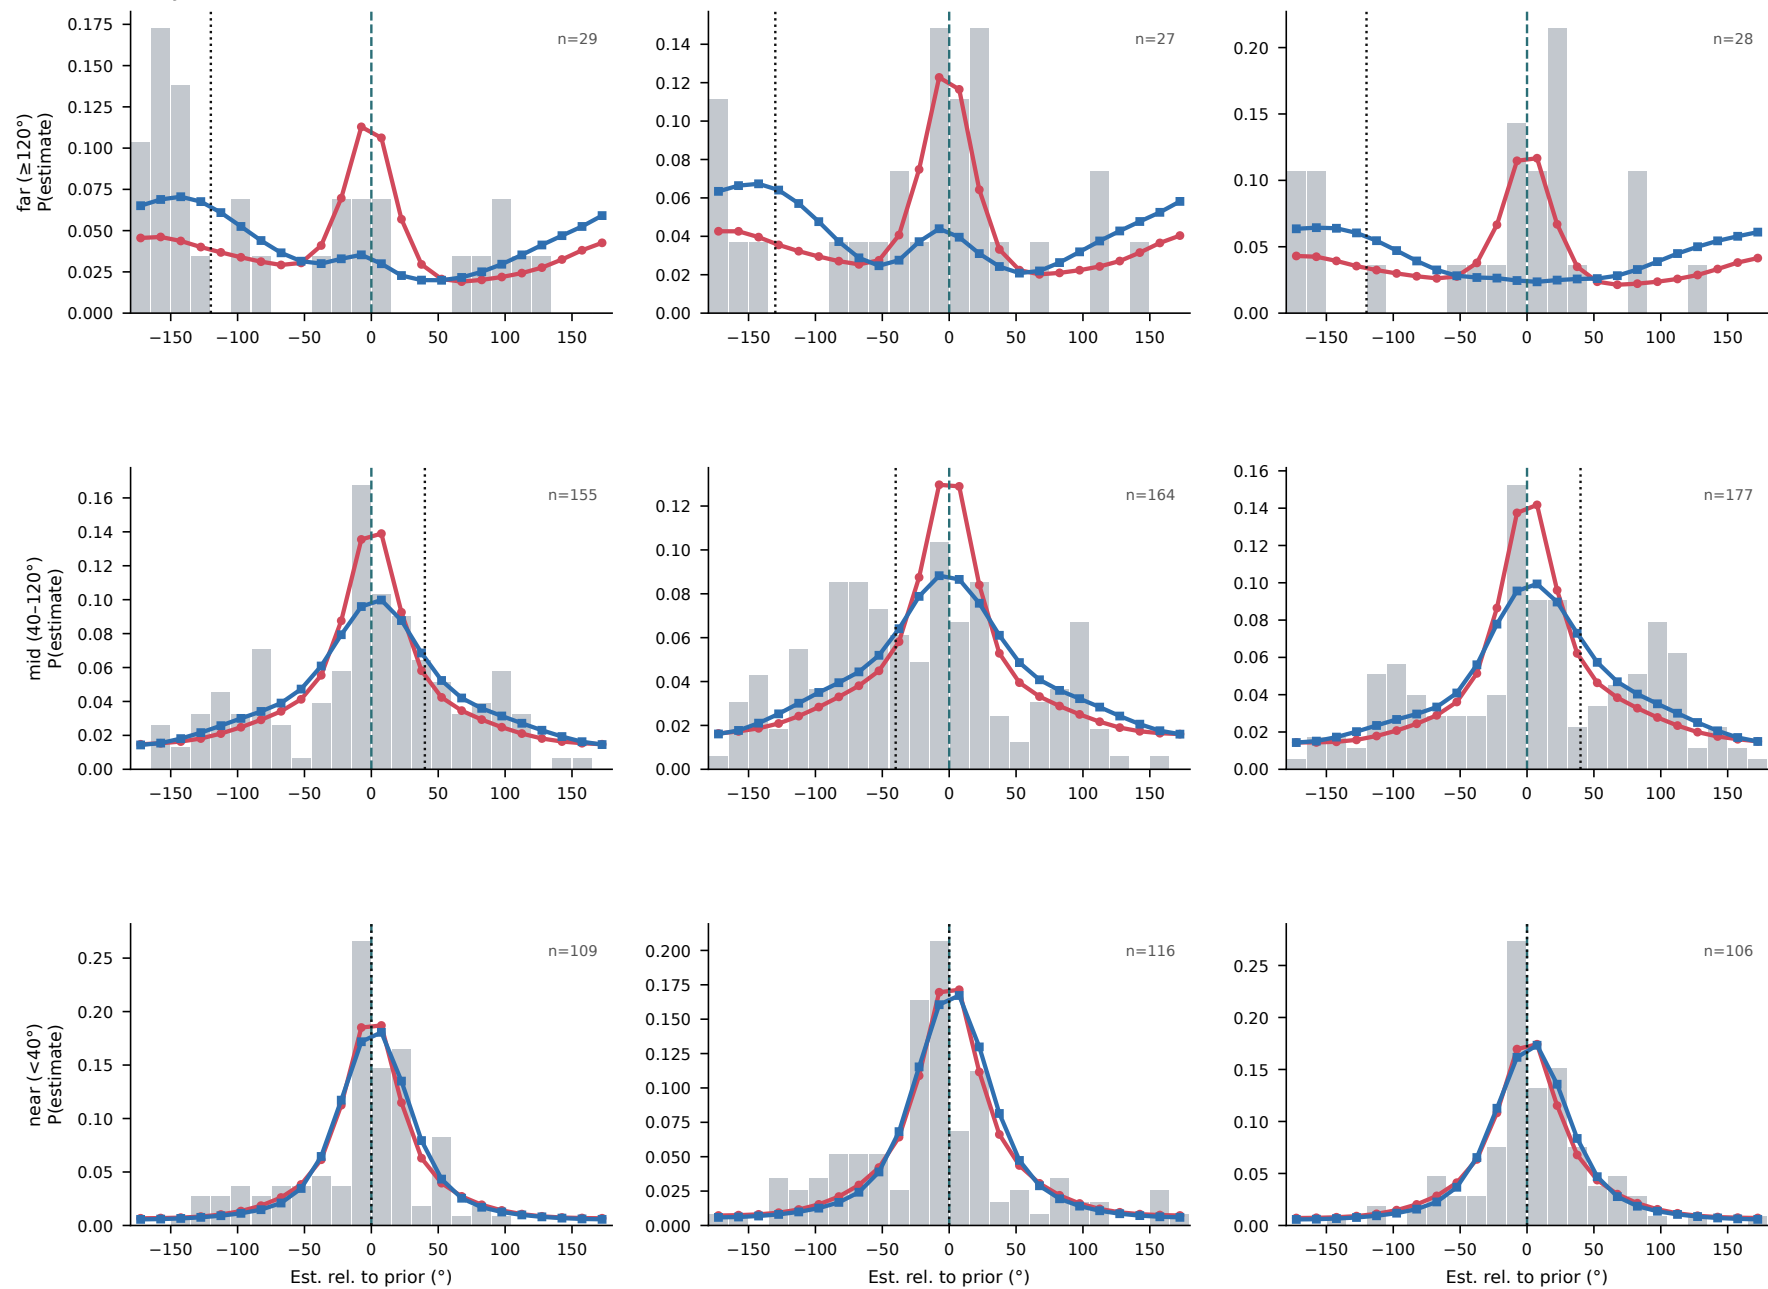

Participant 4 — learned prior confidence (our HB) vs true block width

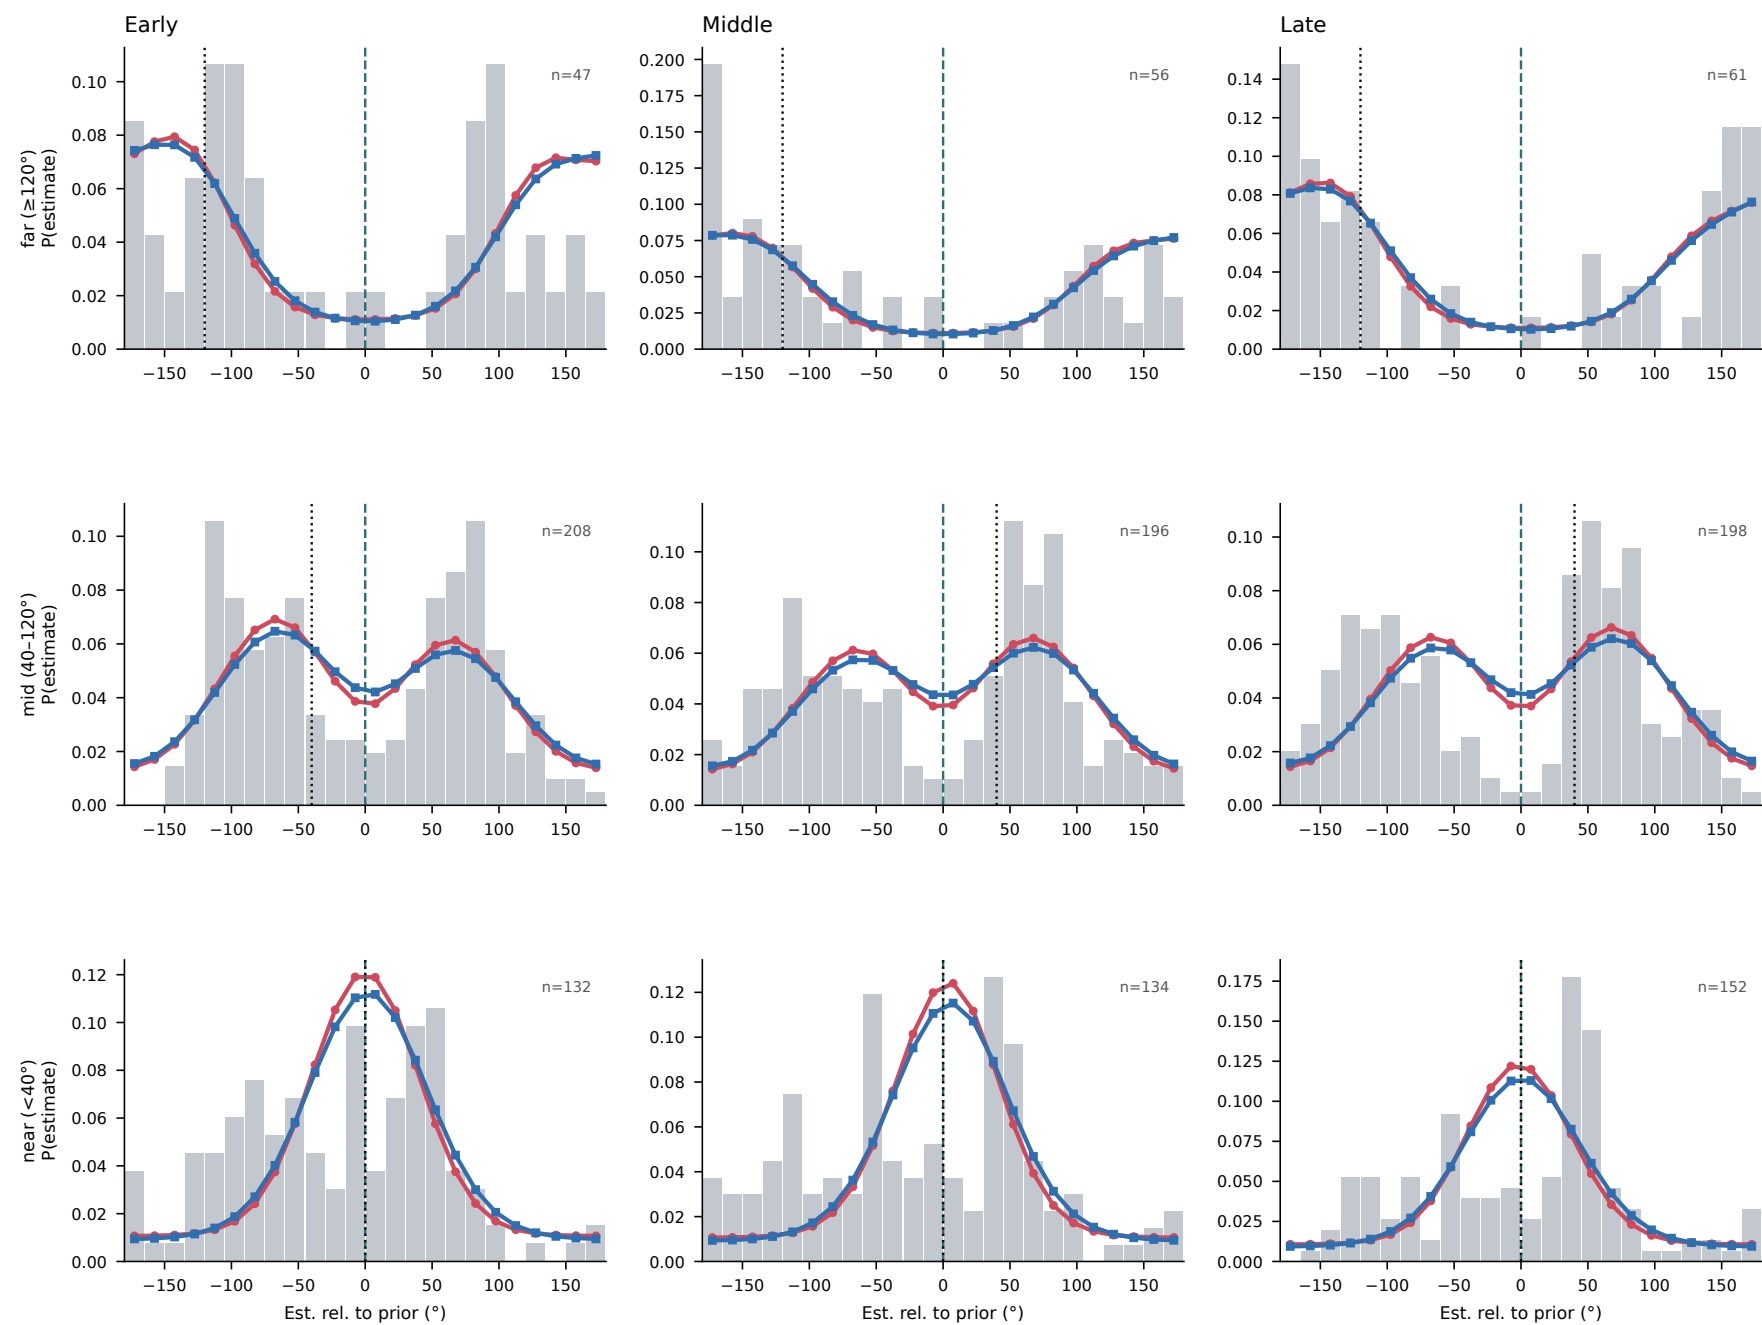

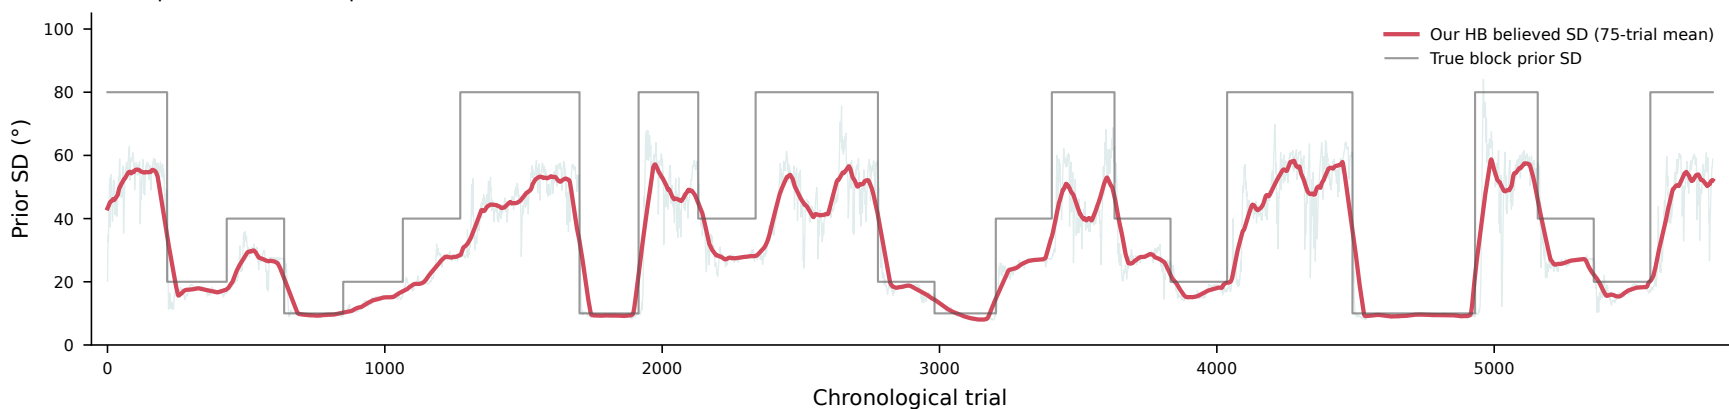

Early

Middle

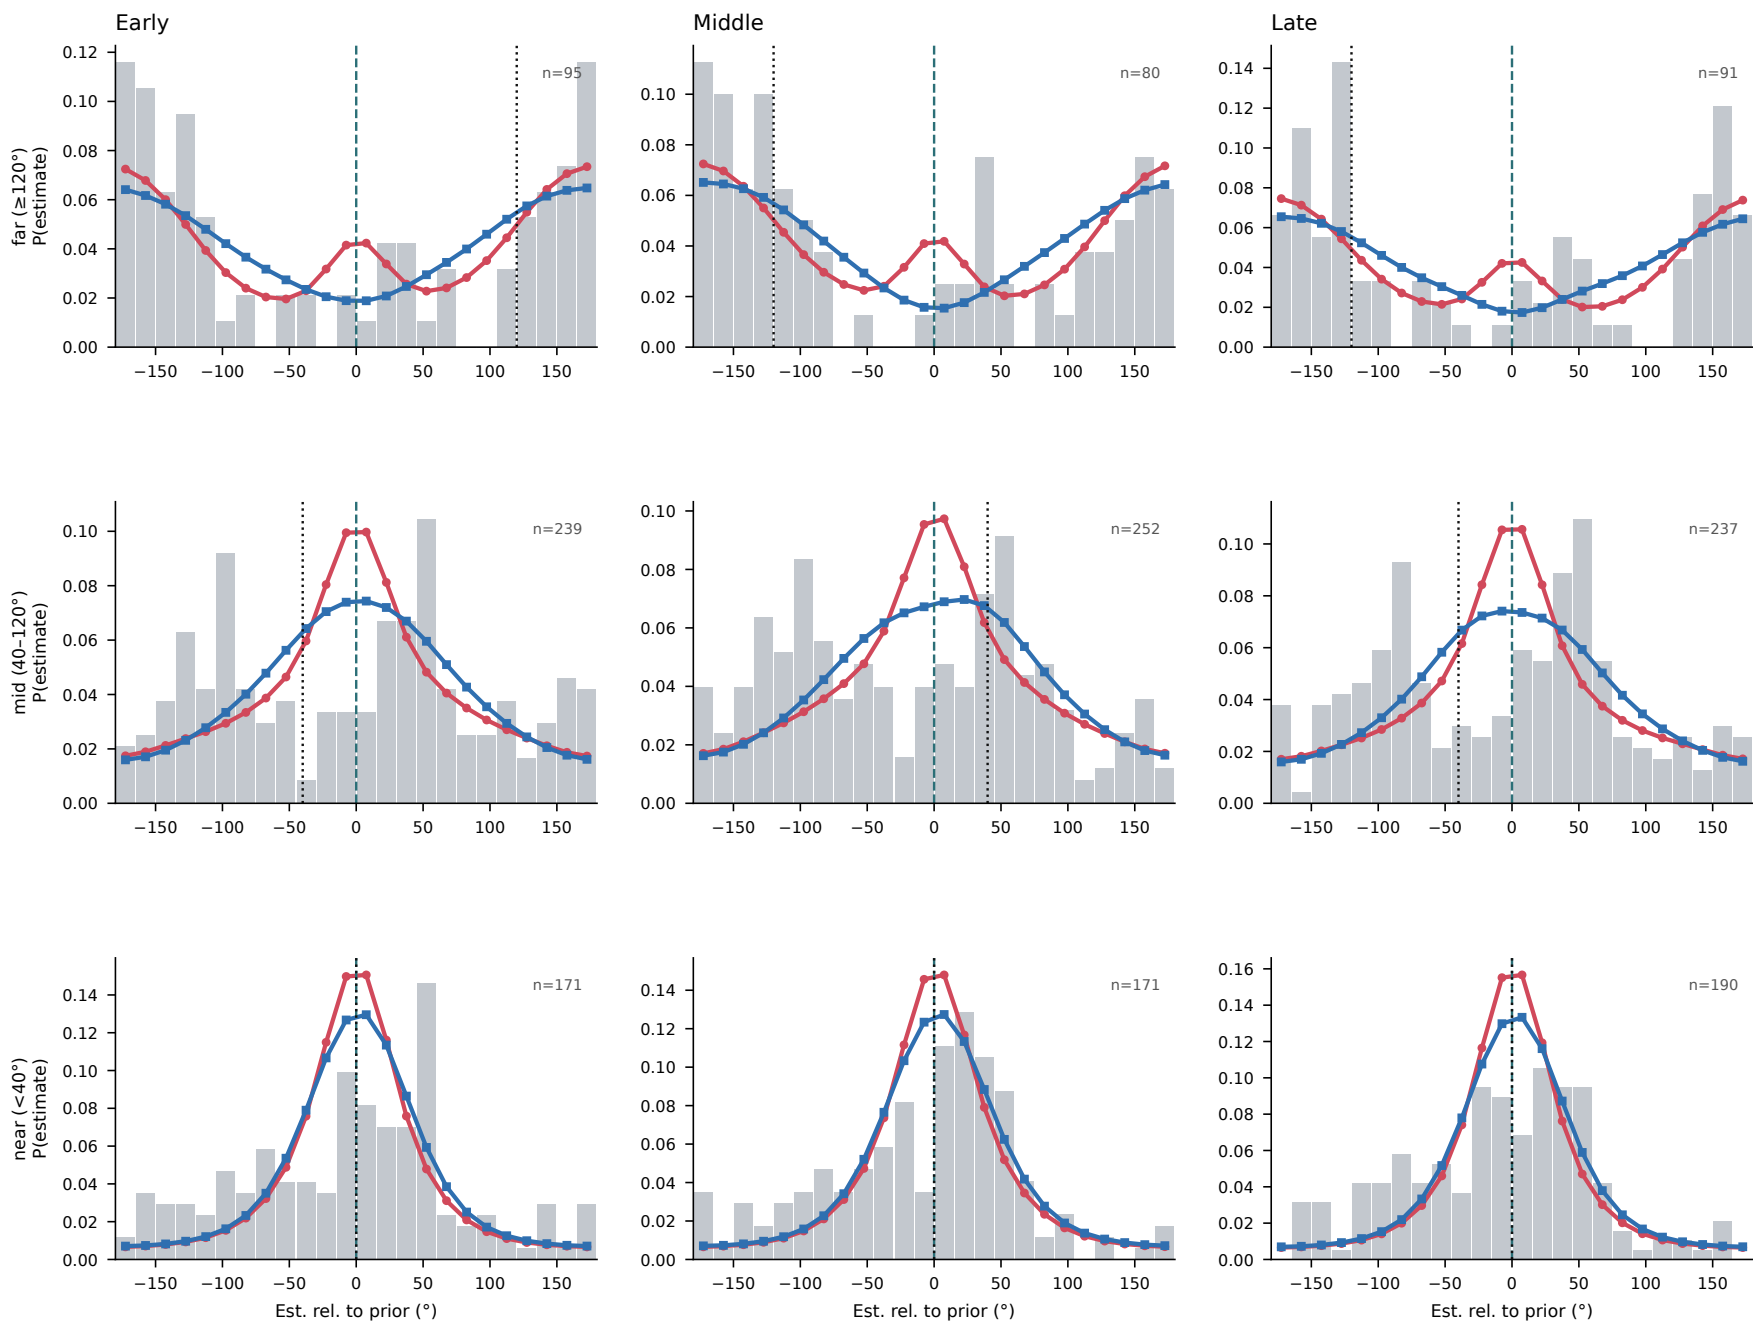

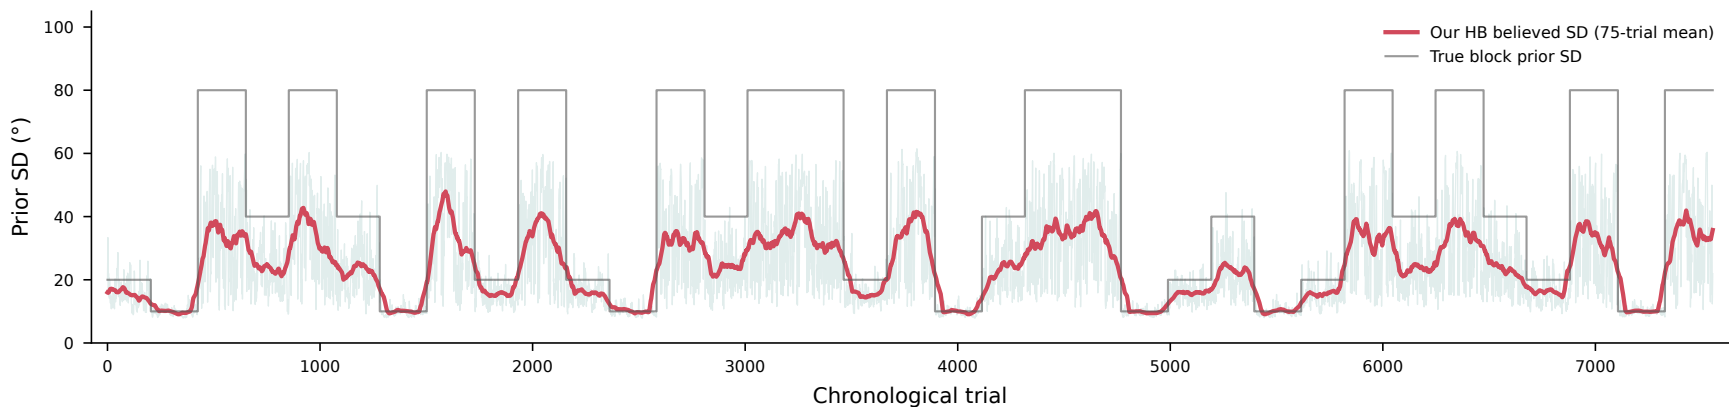

Late

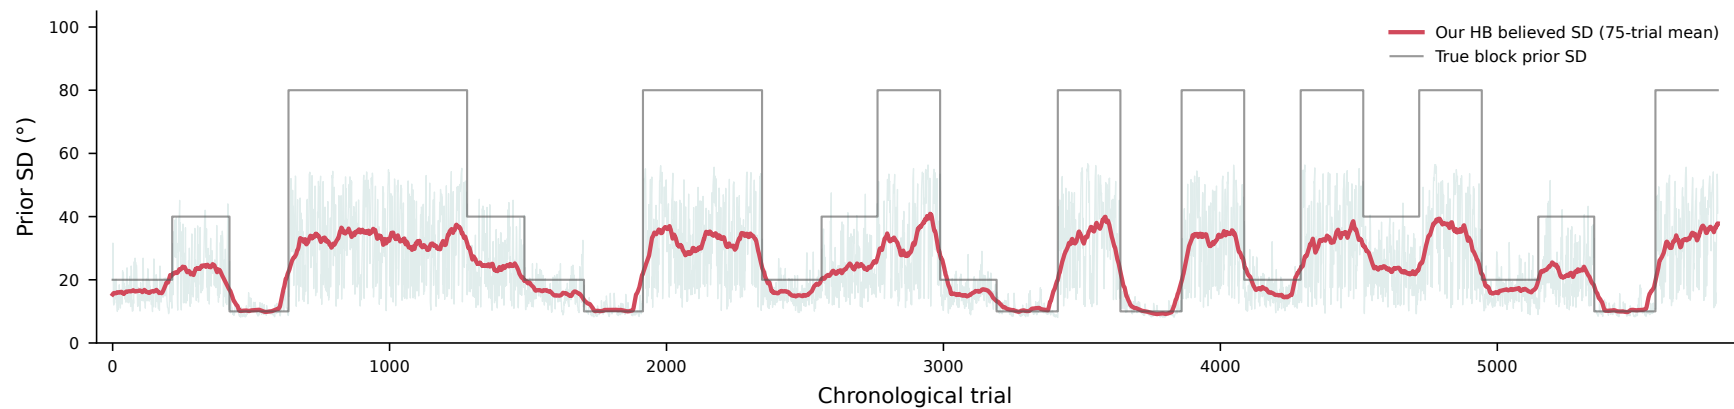

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

Participant 6 — learned prior confidence (our HB) vs true block width

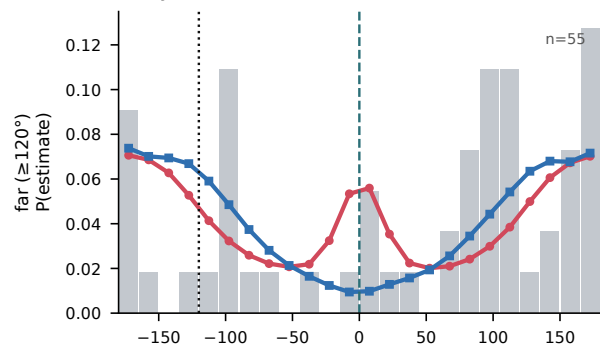

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

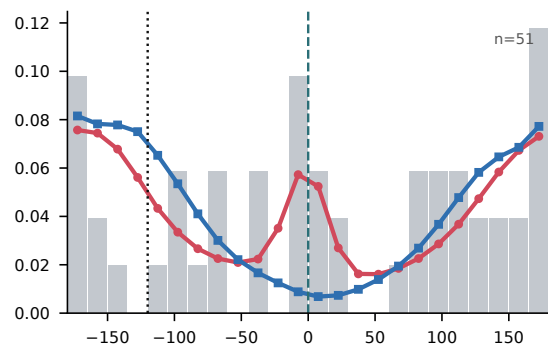

Participant 7 — learned prior confidence (our HB) vs true block width

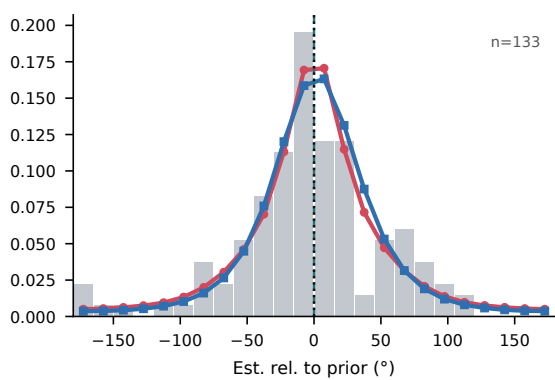

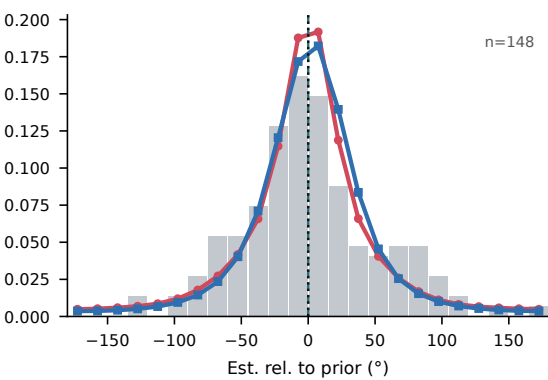

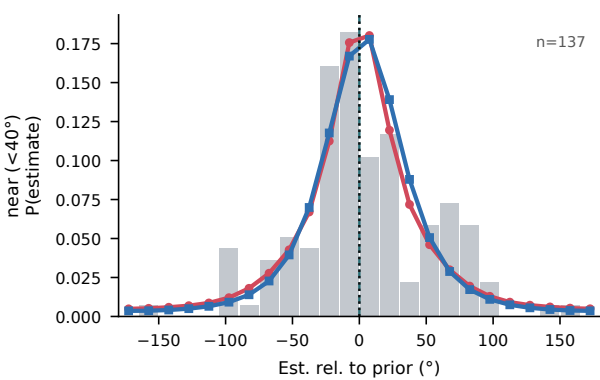

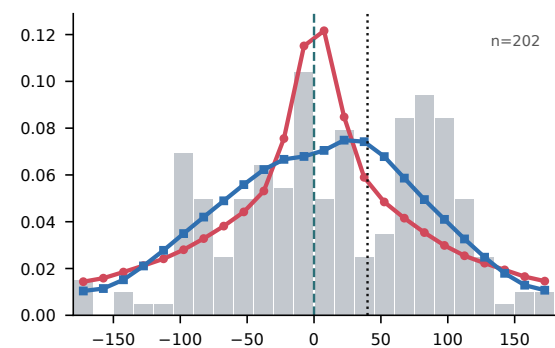

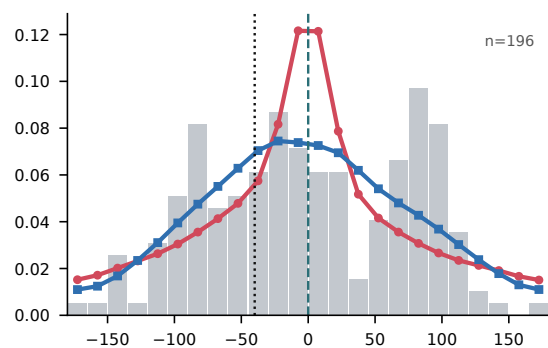

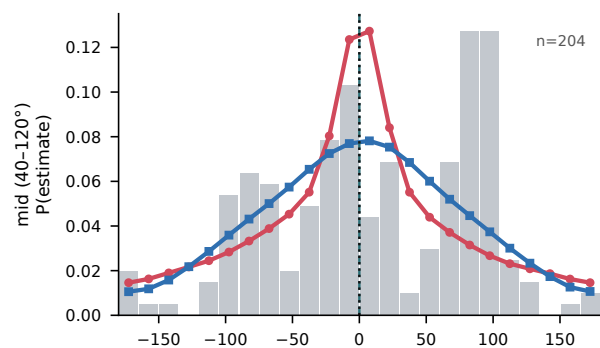

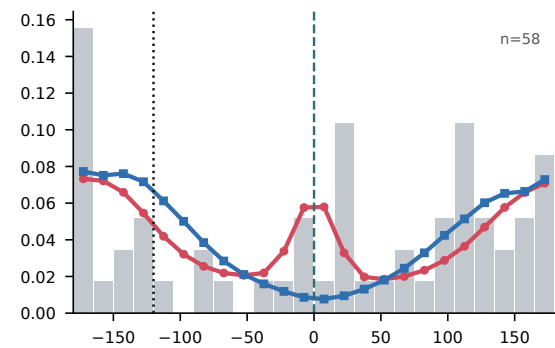

Early

Middle

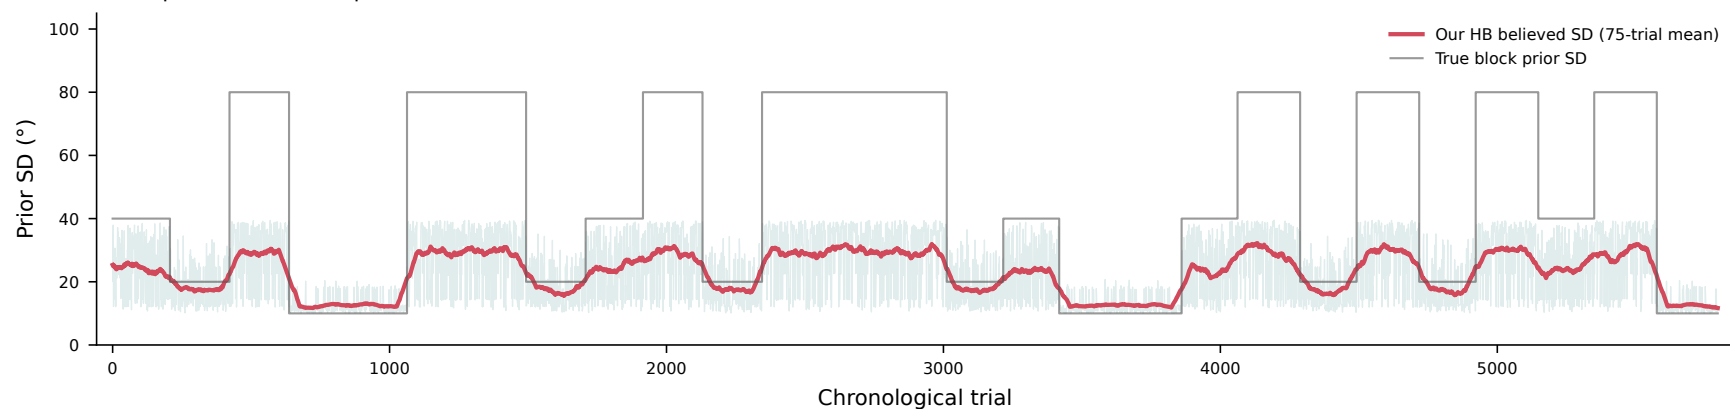

Late

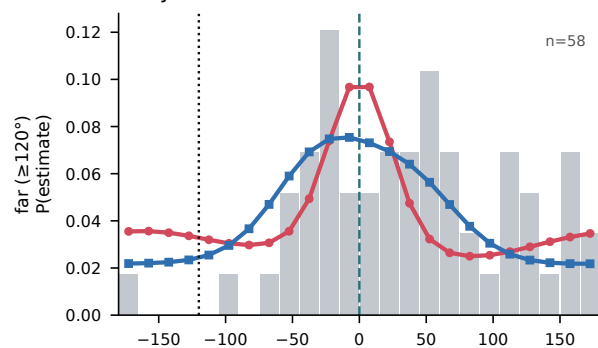

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

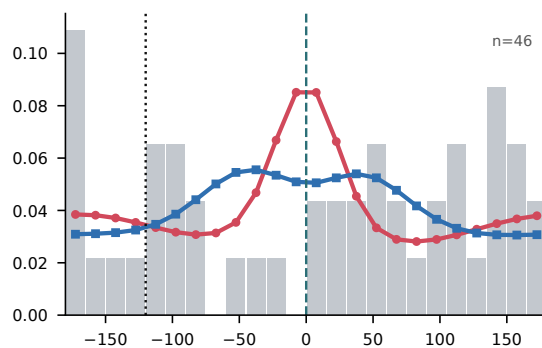

Participant 8 — learned prior confidence (our HB) vs true block width

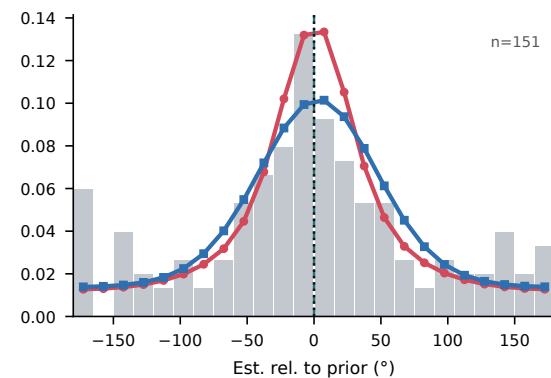

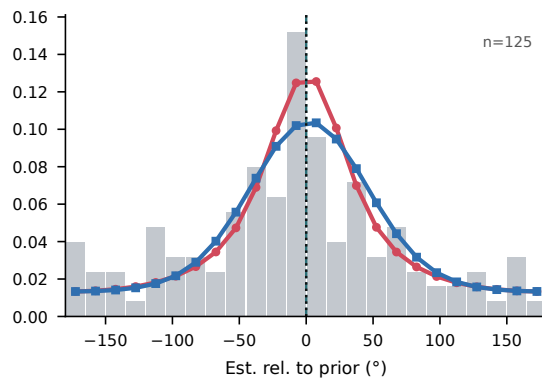

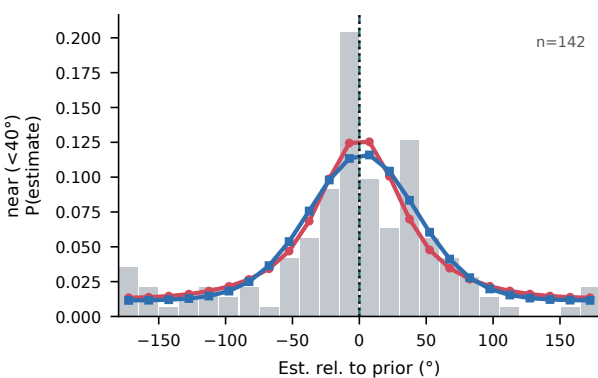

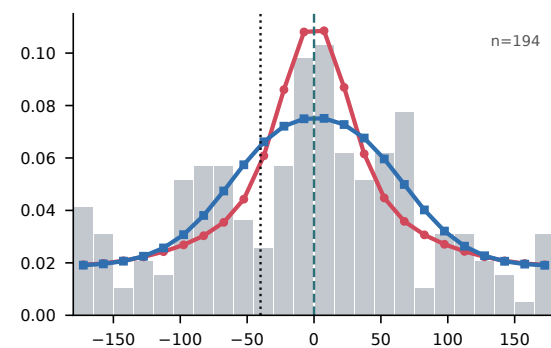

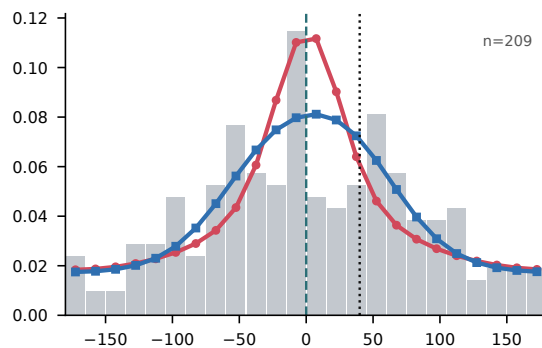

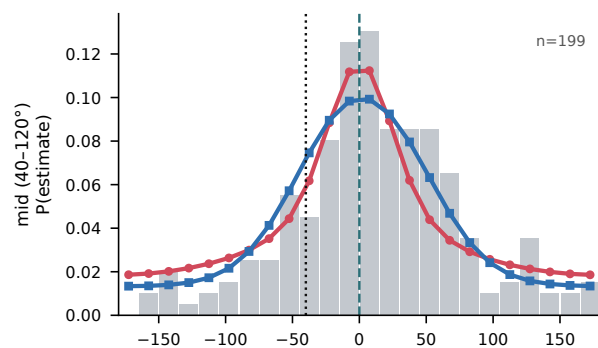

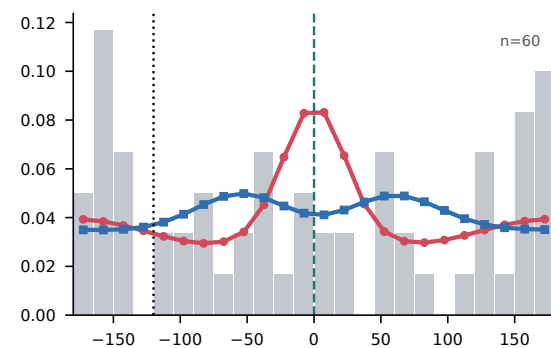

Early

Middle

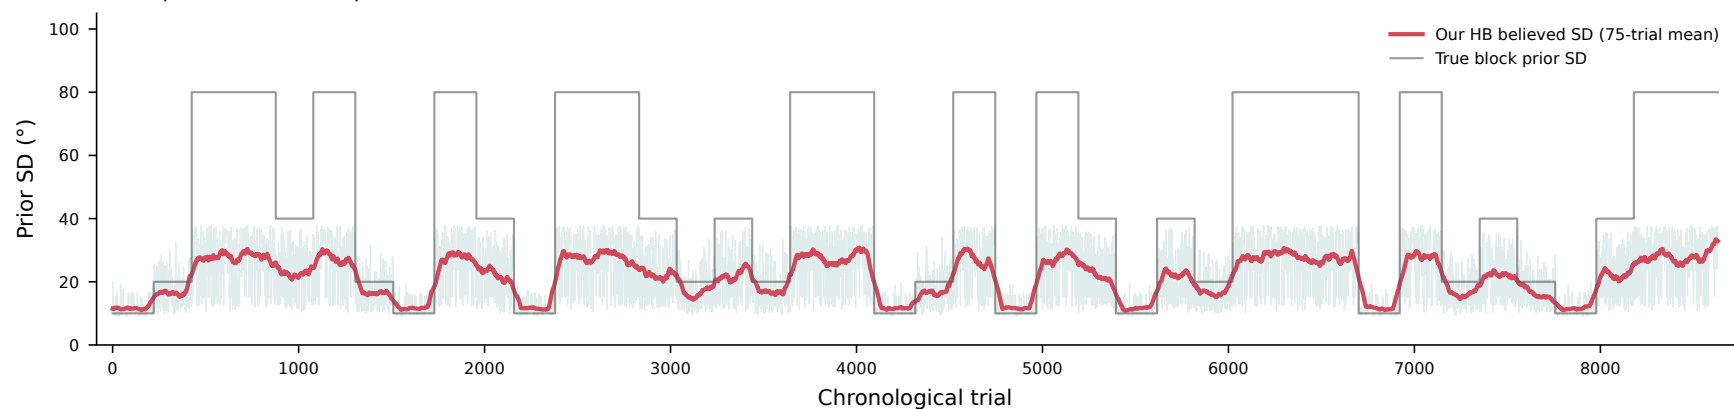

Late

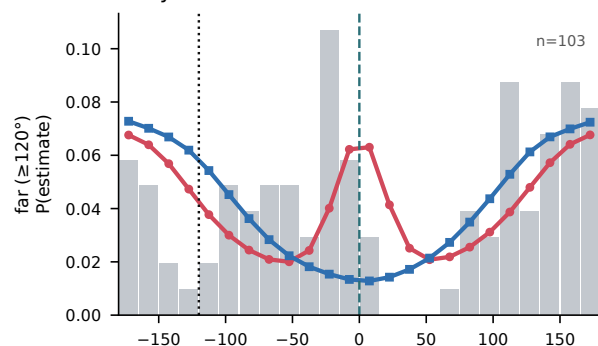

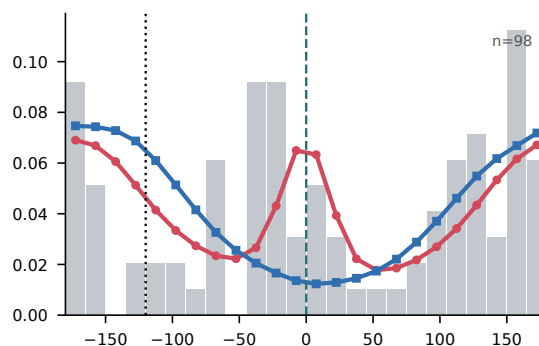

Participant 9 — learned prior confidence (our HB) vs true block width

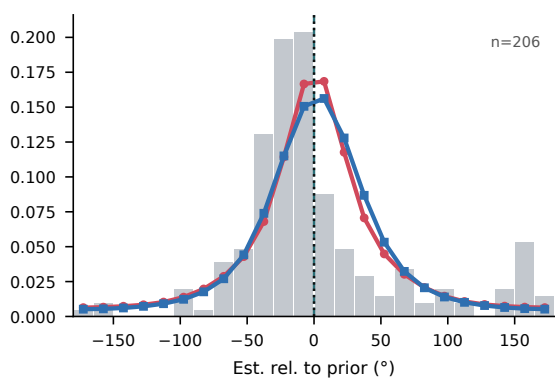

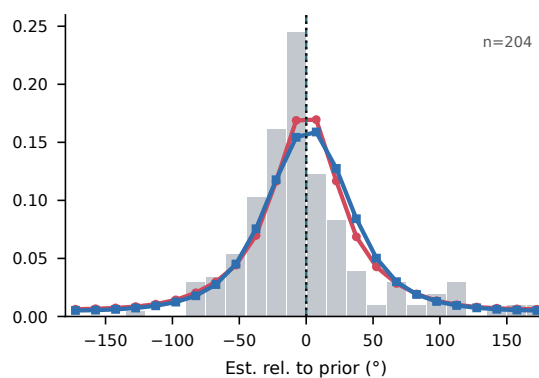

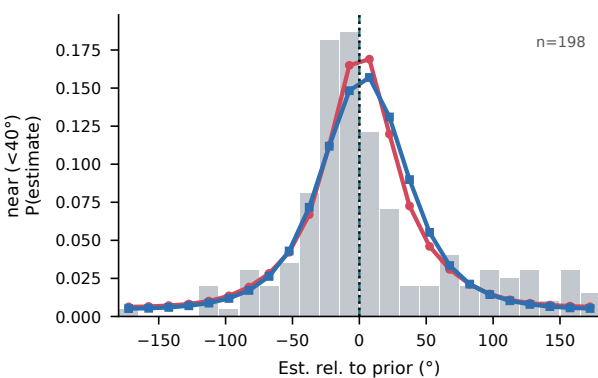

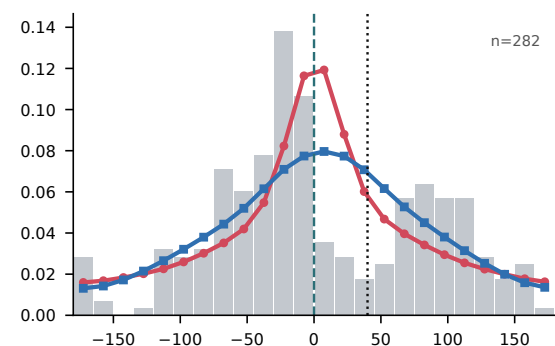

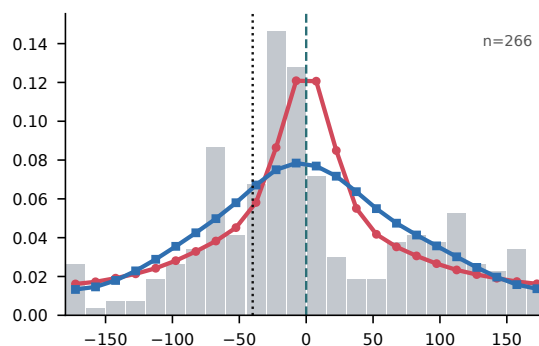

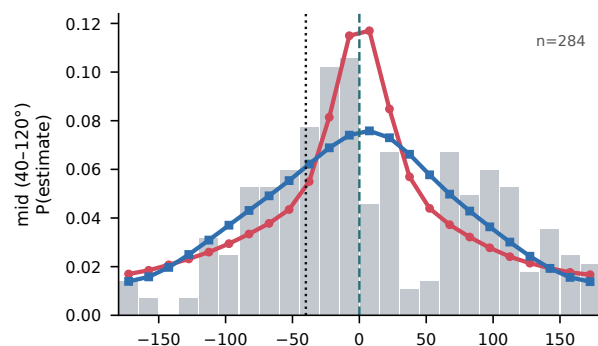

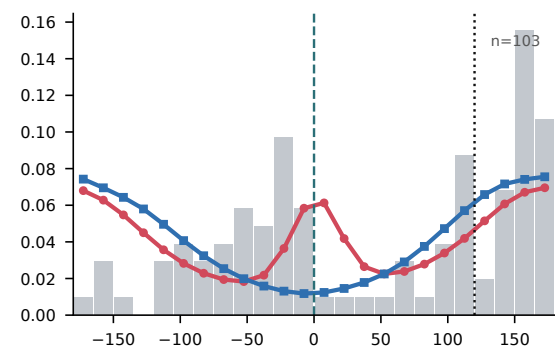

Early

Middle

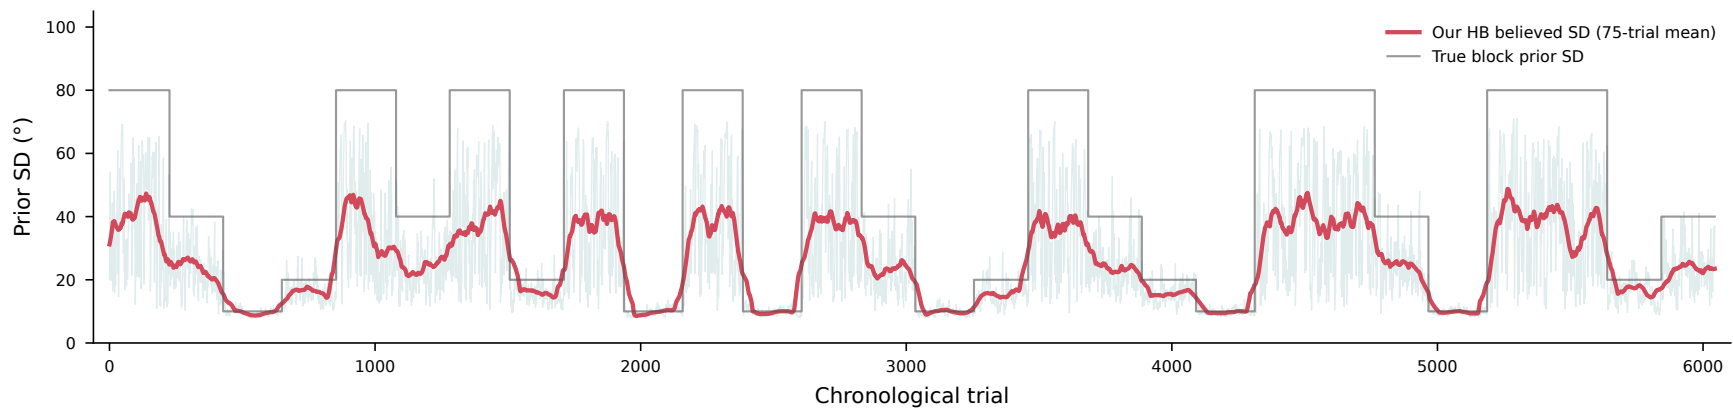

Late

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

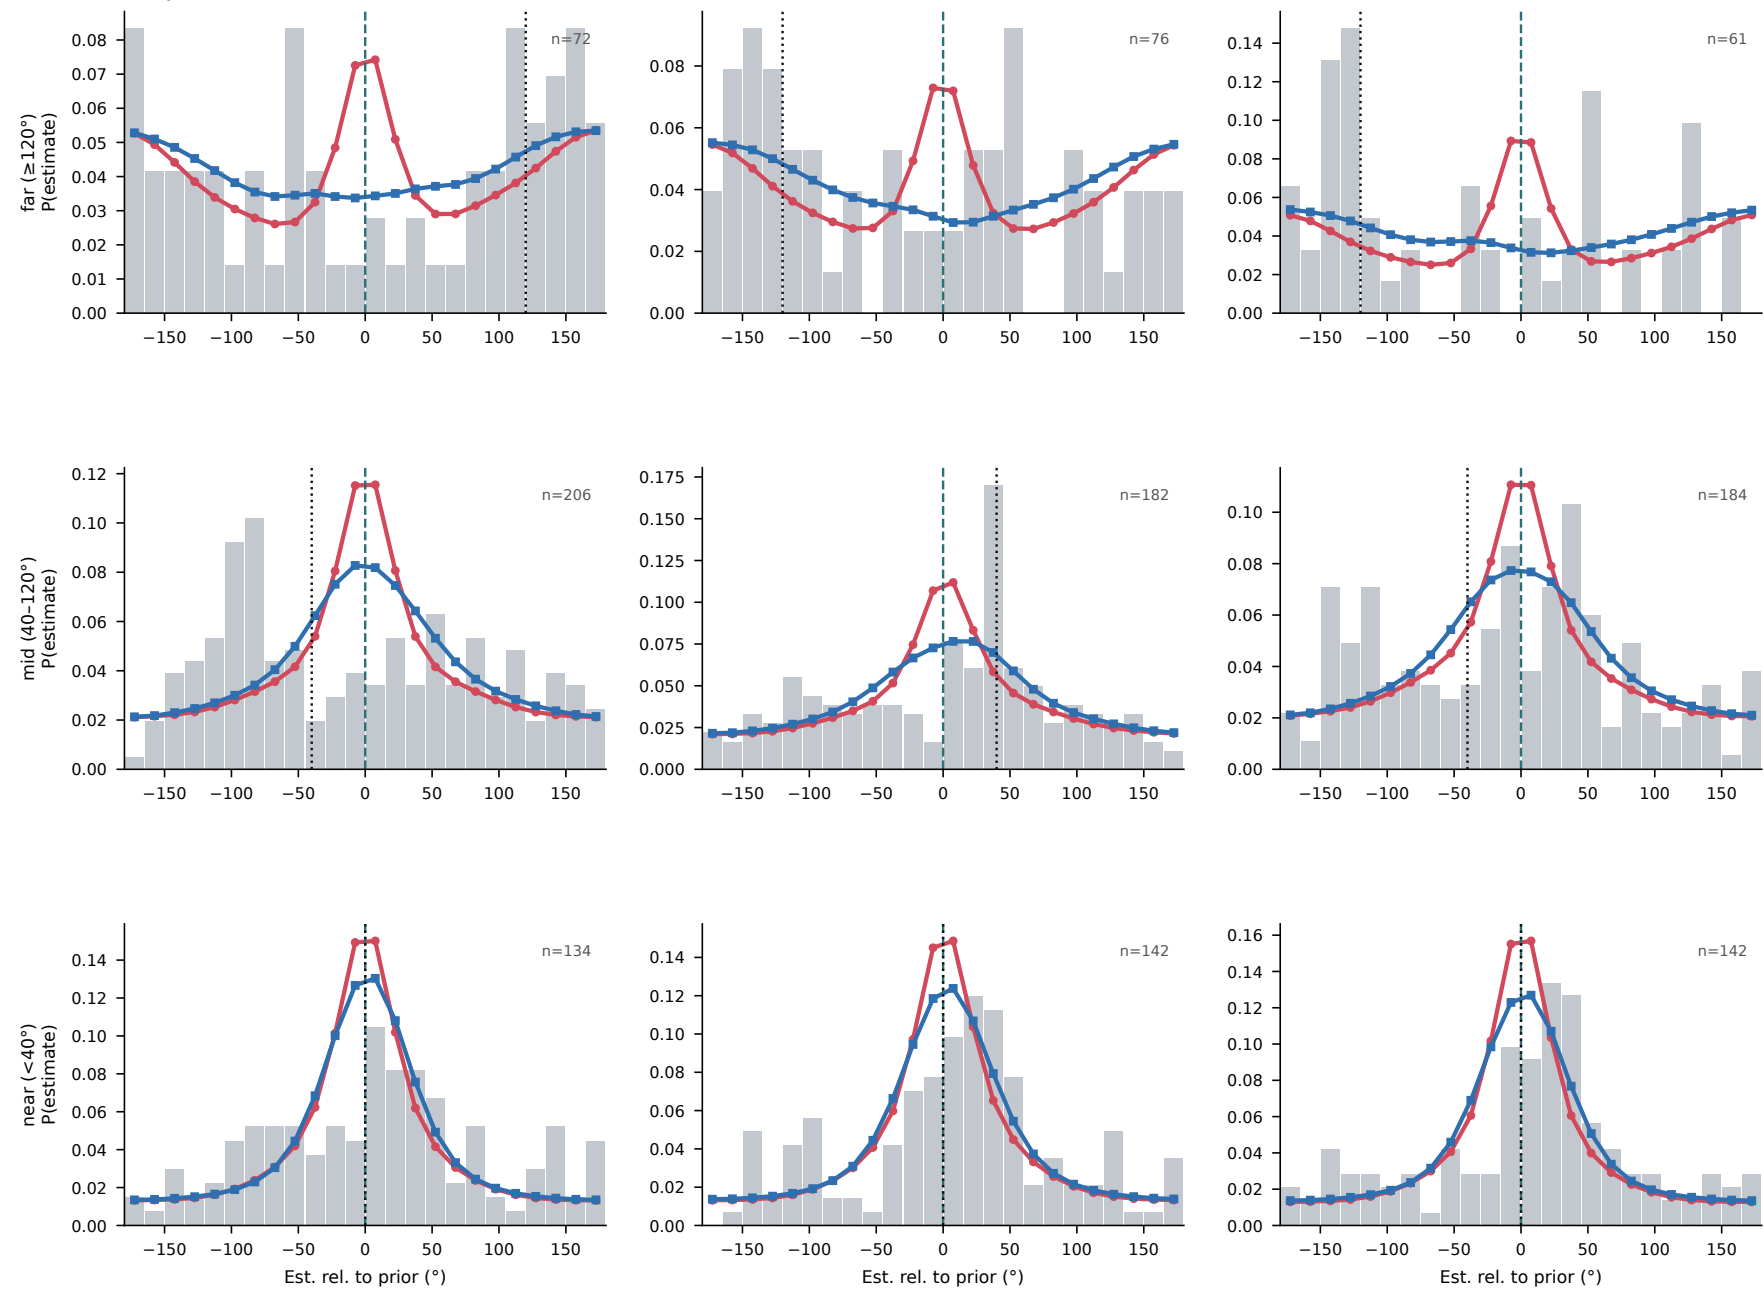

Participant 10 — learned prior confidence (our HB) vs true block width

Early

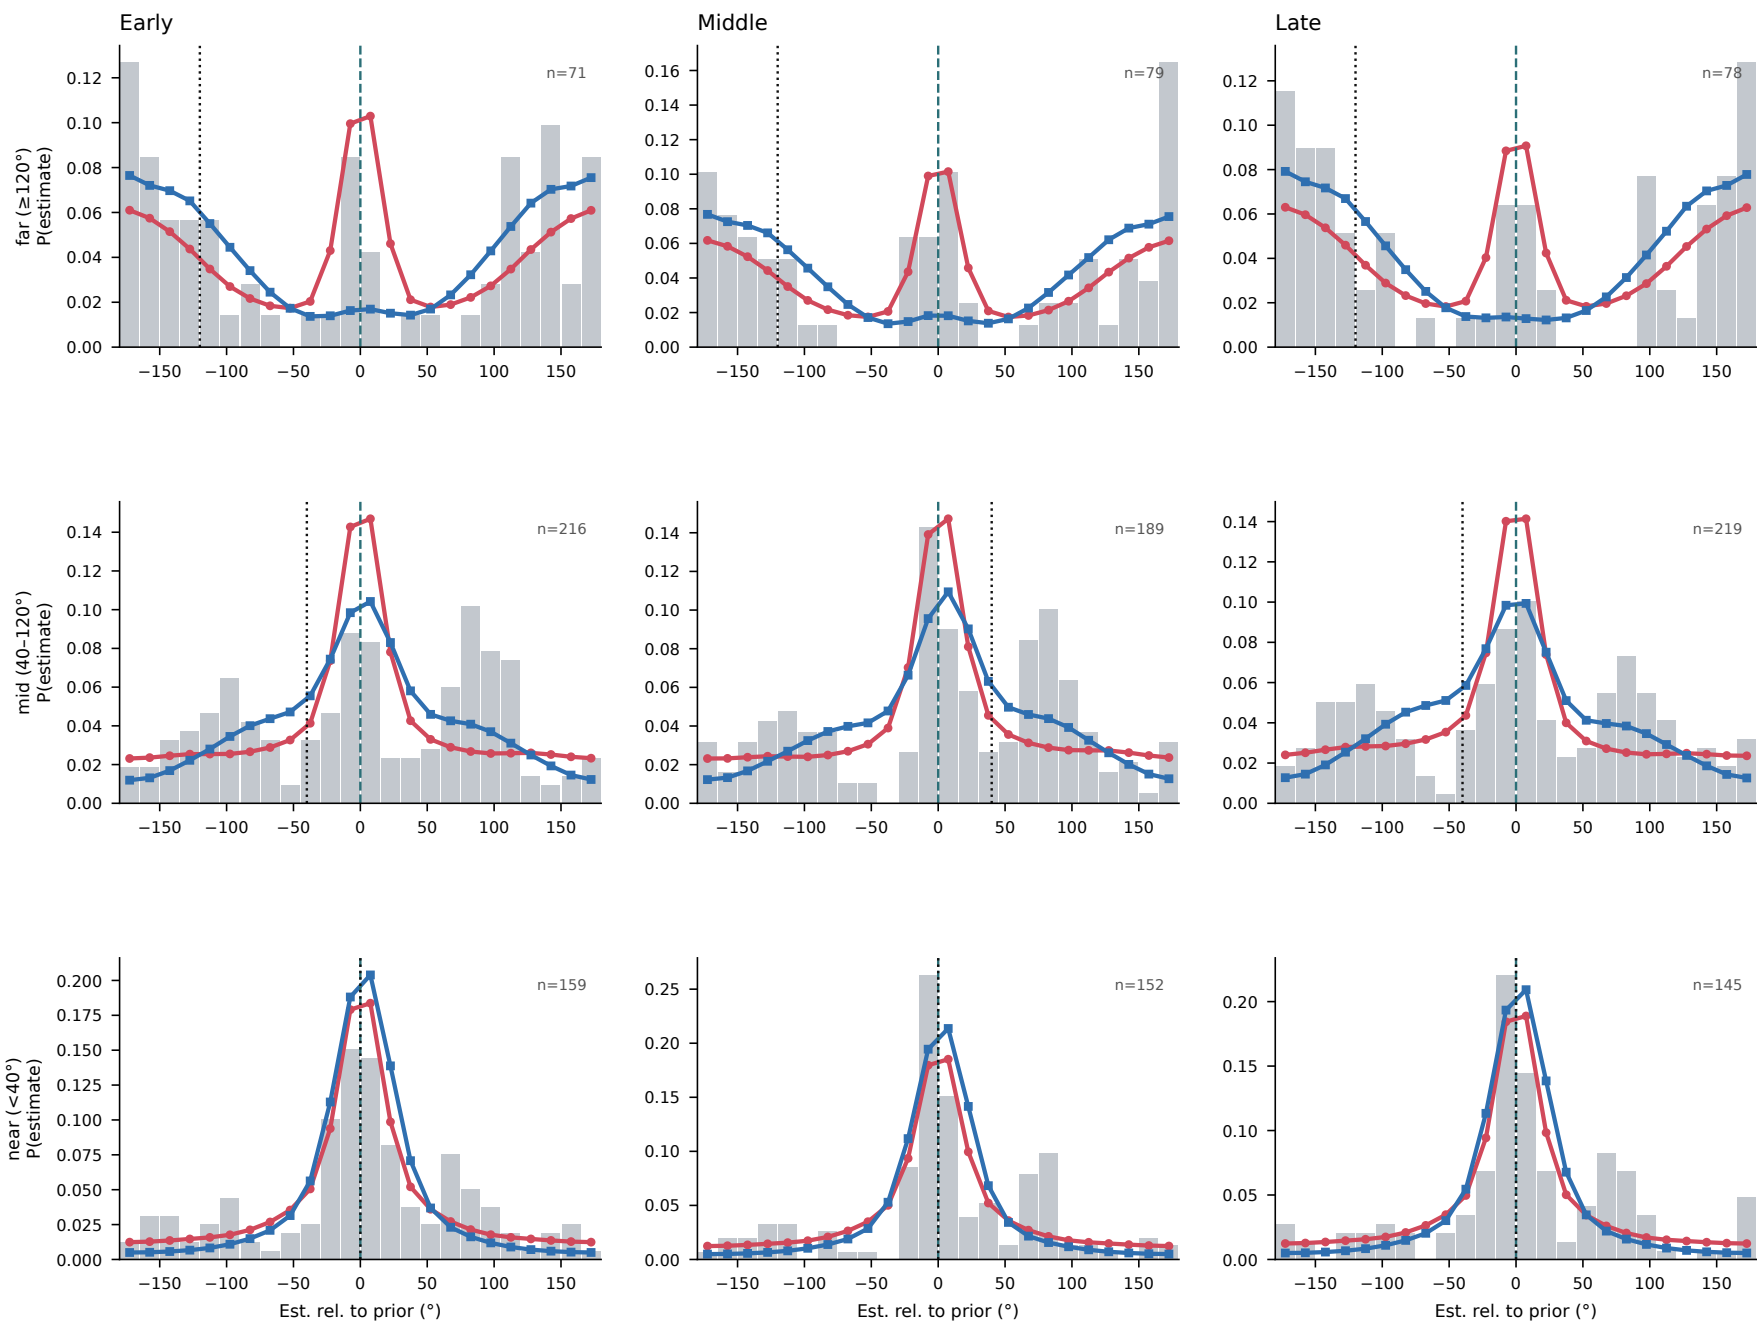

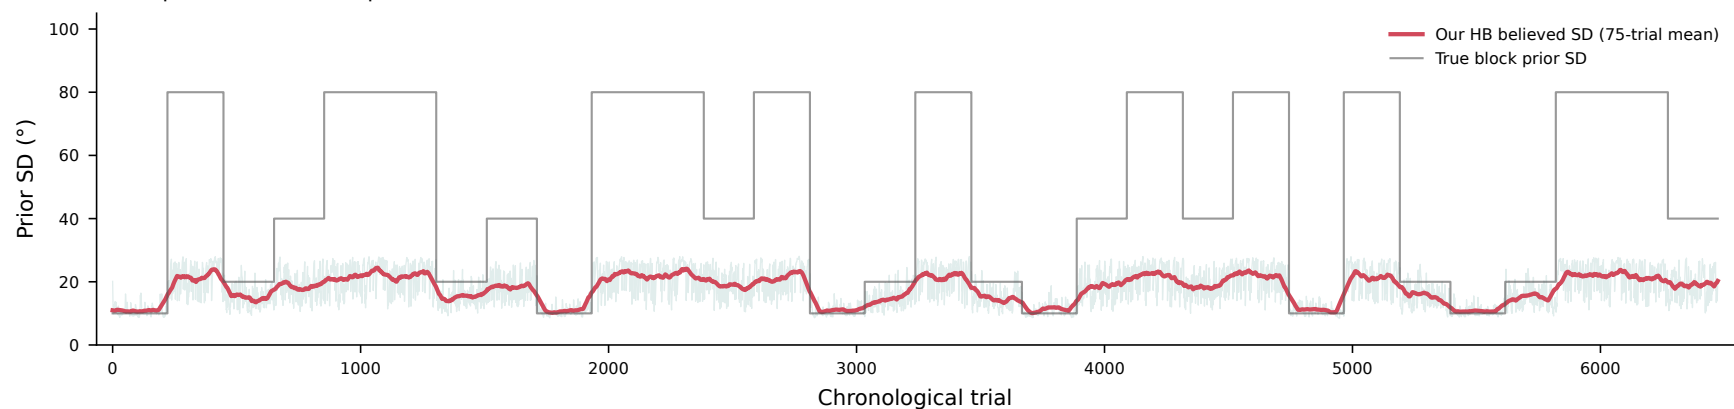

Middle

Late

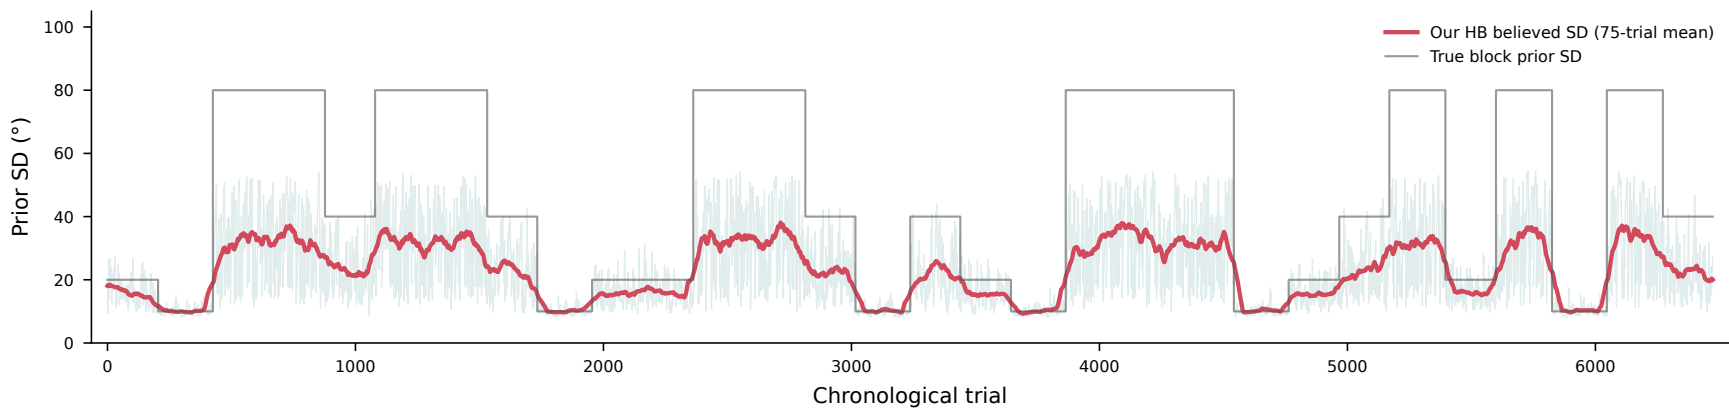

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

Participant 11 — learned prior confidence (our HB) vs true block width

Observed    Our HB integration    Branch hierarchical model    Prior mean (225°)    Stimulus

Participant 12 — learned prior confidence (our HB) vs true block width

Early

Middle

Late
